# PROJECT OBJECTIVES

IoF2020 fosters a **large-scale uptake of IoT** in the European farming and food sector. In brief, it aims to:

1. Demonstrate the **business case of IoT** for a large number of application areas in farming and food sector;
2. **Integrate** and reuse available **IoT technologies** by exploiting open infrastructures and standards;
3. Ensure **user acceptability of IoT** solutions in farming and food sector by addressing user needs, including security, privacy and trust issues;
4. Ensure the **sustainability of IoT** solutions beyond the project by validating the related **business models** and setting up an **IoT ecosystem** for large scale uptake.
