# Danube Soya Declaration

**Preamble**

International Danube Soya Congress 2012 in Vienna agricultural experts and policy makers from 17 Danube countries have expressed their will to strengthen the cultivation of soya in the Danube region and thus contribute positively to a European Protein Strategy.

By, on 19th January 2013 in Berlin, the signatories commit to the goals of the joint declaration below and will work to achieve their goals.

The signatories state want to support the agricultural policy goals of the declaration and do so through separate agreements and measures. The project Danube soy should be achieved through the support of the Danube Soya Declaration is thus a

To these ends, research is needed in the areas of breeding, production, plant protection, processing and marketing, which together form the basis for competitive European soybean cultivation.

The Danube soy initiative is an excellent platform for an alliance between all stakeholders (government, academia, industry and the consumer) with which to realize the expansion of soybean cultivation in the Danube region as part of a European protein strategy. The Danube region provides favorable climatic and agricultural conditions for soya cultivation, and Danube Soya's initiative focuses on Europe's growing demand for GMO-free soya.

The project's vision and scope must be long-term in order to tackle the variety of challenges that can only be solved by strengthening cooperation in the European Union. The signatories are committed to the following goals:

- > developing useful cooperation programs with partner countries and regions in Europe
- > accelerating the expansion of production of European protein crops including soya with appropriate incentives in the context of the CAP at the EU level
- > meeting consumer demand for freedom of choice by creating transparency and traceability in production, credible and controlled product labelling for brand programs and clear labeling for GMO-free plant-based and/or GM-free fed animal foods.
- > intensifying research on the expansion of soya cultivation in the Danube Region (breeding, cultivation, processing, production-related criteria, ecological aspects, market research on potential demand and implementation)
- > developing programs, know-how transfer and better practice models to support soybean cultivation along the Danube river basin
- > establishing reliable supply and value chains as well as complete quality control systems to ensure sustainable production and processing

Berlin, 19.1.2013

For the  
Federal Office for Agriculture  
Secretary of State Bernard Lehmann, Switzerland

For the  
Ministry of Agriculture, Forestry and Water Management  
Secretary of State Dr. Gidon Gidonov, Serbia

For the  
Ministry of Agriculture and Environment  
Franc Bogdan, Slovenia

For the  
Ministry of Rural Development  
Secretary of State György Csorba, Hungary

For the  
Ministry of Agriculture, Forestry and Water Management  
Minister of Agriculture, Forestry and Water Management  
Minister of Agriculture, Forestry and Water Management  
Minister of Agriculture, Forestry and Water Management

The signatories firmly believe that the expansion of agricultural and food production is essential to counteract excessive use of agricultural land and to ensure the goal of more efficient use of nutritionally rich crops. The goal is to ensure also that the use of GMO-free

Signed by 12 Ministers of 12 Countries
