Between:

Solvay group, represented by its Chief Executive Officer, Jean-Pierre Clamadieu,

And:

IndustriALL Global Union, represented by its General Secretary, Jyrki Raina

PREAMBLE

The chemical industry can only operate with a strong sense of responsibility. Solvay insists on a spirit of responsibility in its dealings with employees, customers, suppliers, shareholders, communities living near its sites, the environment and natural resources.

The "Solvay Way" approach, of which this agreement is an integral part, feeds into this development model which combines operational performance with high standards of behavior for ever greater responsibility towards all stakeholders.

This responsibility requires considerable involvement on the part of employees, which is why Solvay's desire to maintain a rich, balanced dialog between management and employee representatives is central to Solvay's values and identity.

Such responsibility concerns all of Solvay's activities worldwide and thus requires dialog with an organization operating at an international level.

That is the rationale for this agreement, through which Solvay and IndustriALL Global Union which organizes chemical industry employees worldwide, are creating a structure for information and dialog and affirming their joint commitment to good industrial and labor practices wherever in the world the Group operates.

Solvay makes this commitment voluntarily, over and above its compliance with the statutory and legal obligations in every country where the Group operates. The global standards listed below will be complied with by all Solvay entities worldwide.

The Group's subsidiaries, while taking the economic, social and cultural realities specific to their own country into account, will do their best to ensure that this agreement is applied in a spirit of continuous progress based on the provisions stipulated in this agreement.

Both parties to this agreement agree that the internationally recognized standards and principles contained within this Agreement will be applied at all Solvay sites throughout the world, regardless of whether or not they are required by national law or regulations.
