Sustainable mobility for tourism and recreation

The international project STREAM is about mobility management for leisure trips. Demonstration projects have been carried out in 7 countries:

Nature and recreation areas
- **Austria**: sustainable transport for hikers to remote areas of the Lungau-Murau-Nocky Mountains
- **Belgium**: development and implementation of a mobility policy for 17 tourist destinations
- **Poland**: education and awareness-raising about using sustainable transport to reach the Lagiewnicki forest in Lodz
- **Italy**: development and promotion of multimodal transport, Paneveggio - Pale di San Martino Park

Green corridors
- **Vilnius, Lithuania**: green tourist routes within the city and to the tourist attractions in the outskirts
- **Belgium**: a corporate image and a tourist map for a cycling corridor using old railway tracks

Beach tourism
- **Portugal**: Bike & Boat, a sustainable multimodal link between Lisbon city and the Costa da Caparica
- **Bulgaria**: special tourist packages for day trips aimed at visitors to the coastal region
