COMMISSIONING DATE
01/2028

Project Description
The core of the project is to build new, additional renewable power plants in Italy, Spain and Germany and then convert the green power produced to green hydrogen and/or ammonia. Part of the ammonia will be used for off-takers directly in the Netherlands, but the bulk part will be converted to hydrogen and transported to Germany. To make the low-carbon transition a success story, additional renewable energy sources need to be developed and linked by different types of infrastructure to final off-takers.

CEF funding
Action code: 2022-07-EU-S-M-22-CICERONEGreenNH3stud
Awarded CEF co-funding: 3,377,473.00 €

Implementation status
Planned, but not yet in permitting
