Shannon LNG Terminal and connecting pipeline (IE)
North-South gas interconnections in Western Europe

Technical description
Construction of a liquefied natural gas (LNG) regasification terminal (and an associated 500 MW High Efficiency CHP plant), with a capacity of 17 MCM/d at commissioning and 28.3 MCM/d at full build on the southern shore of the Shannon Estuary (County Kerry). The terminal has approval for up to 4 tanks of 200,000 m3 each and a jetty capable of receiving LNG ships of up to 266,000 m3 cargo capacity. Construction of a 26 km gas pipeline to export up to 26.8 MCM/d to the national grid at Foynes (County Limerick, Ireland) with an initial deliverability of 16.1 MCM/d.
