CATEGORY
Gas

CLUSTER

7.1: PCI Cluster of integrated, dedicated and scalable transport infrastructure and associated equipment for the transportation of a minimum of 10 bcm/a of new sources of gas from the Caspian Region, crossing Azerbaijan, Georgia and Turkey and reaching EU markets in Greece and Italy.

COUNTRIES CONCERNED

Azerbaijan(AZ)
Georgia(GE)
Turkmenistan(TM)

PROMOTERS

SCPFX: SOCAR
MIDSTREAM OPERATIONS
(AZ)
TCP: W-Stream Caspian
Pipeline Company Ltd (GE)

PCI WEBSITE(S)

<http://www.w-stream-transcaspian.com/>
https://www.bp.com/en_az/caspian/operations/projects/pipelines/SCP.html

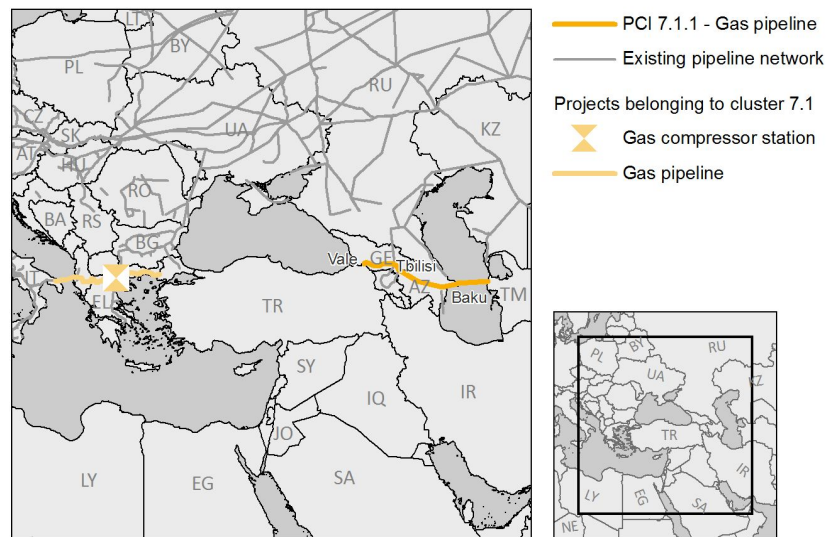

LOCATION

TCP: From Turkmenistan (tie-in to the East-West Pipeline or offshore collection points) to Azerbaijan through the Caspian Sea.
SCPFX: From Sangachal Terminal (AZ) through Azerbaijan and Georgia to Georgia/Turkey border with subsequent tie-in to TANAP.

COMMISSIONING DATE
05/2026

Gas pipeline to the EU from Turkmenistan and Azerbaijan, via Georgia and Turkey, [currently known as the combination of “Trans-Caspian Gas Pipeline” (TCP), “South-Caucasus Pipeline Future Expansion” (SCPFX)]

Southern Gas Corridor

Source: PLATTS, GISCO, European Commission

Technical description

TCP: Offshore pipeline in the Caspian Sea with a length of 300 km and an ultimate capacity of 32 bcm/a will branch-off at a connection with the East-West pipeline in Turkmenistan or, for the first stage, from a collection point of offshore Caspian production/treatment in Turkmenistan. It will feed into Sangachal terminal/SCP in Azerbaijan.

SCPFX: Upgrade of the existing SCP pipeline system between Azerbaijan and Turkey via Georgia with throughput capacity upgrades of 5 bcm/y by 2024 (on top of the expanded capacities under SCPX project). SCPFX project currently envisages the construction of 3 additional loops in Georgia, with the total length of about 93 km and 1 additional compressor station in Azerbaijan.
