Technical description

8.3.2 "Poland–Denmark interconnection [currently known as “Baltic Pipe”]" is part of the PCI cluster 8.3 (PCI 8.3.1 and 8.3.2) related to Baltic Pipe. The PCI 8.3.2 relates to a number of key infrastructure elements, which are part of the Baltic Pipe project, namely:

- a new, bi-directional offshore gas pipeline connecting PL and DK through the Baltic Sea (estimated capacity of approx. 10 bcm/y; estimated length of approx. 260 -310 km),
 - the receiving terminal (PL),
 - the onshore pipelines connecting the offshore pipeline with the national grids in PL and DK,
 - the DN 1000 Goleniów –Lwówek pipeline (PL) of approx 188 km,
 - and three compressor stations in PL i.e. Goleniów CS , Odolanow CS and Gustorzyn CS.

Baltic Pipe will make possible the import of up to 10 bcm/y of gas from Norway to Poland through Denmark and the transmission of 3 bcm/y of gas from Poland to Denmark.
