

CZECH REPUBLIC

Date of data collection or reference period	Consumer prices on Monday
Reporting body	Czech Statistical Office
Reporting price discounts on motor fuels	No
Market coverage and data sources	<ul style="list-style-type: none"> • Data sources: 9 oil companies, 3 large stores. These operate 1789 public petrol stations, which represents 46% of all public petrol stations in Czech republic. • Approximate shares of surveyed enterprises in total road transport consumption of petroleum products are as follows (at least): 56% for Euro super 95, 50% for diesel and 44% for LPG.
Price averages	Weighted average based on the annual sales volume of motor fuels.
Biofuels	<ul style="list-style-type: none"> • Unleaded petrol with a minimum 4.1% bioethanol by volume per year (but maximum of 5% in every fuel specimen), diesel oil with a minimum of 6% FAME by volume per year (but maximum of 7% in every fuel specimen). • The obligatory proportion of bio-components ordered by the state is taxed together with the main components (fossil fuels). Tax allowances are only applicable to fuels with high percentage of biocomponents (e.g. diesel blends with no less than 30% of rapeseed oil FAME of volume), but these have marginal consumption and are not surveyed at present.
Other indirect taxes reported	NA
