## Future networking needs for RDPs and CSP preparation during the transition period

## Innovation

Balance between continuity and innovation for networking and knowledge exchange - Karin

Dissimination of innovation is important! EIP Agri results shoult be spread cross border to give inspiration for more innovative projects

More synegries between Innovation CAP strategic plans and territorial approach

Improve communication btw local and EU level - this affects the implementation and funding efficiency

## **Evaluation**

Collecting information from MS and sharing it with FU level

Feedback for MSs on the input they contribute so that they can use locally

Capture inputs from Assembly and other meetings into the agenda

capture the input from LAGs into the Conference on the future of Europe

cooperate with communication resources (visuals, pictures, videos, etc.)

Communication network & support

Disimination of GP, engagement of diverse stakeholders

valorize good examples from practice - go local, regional and cross border - Karin

Networks can disseminate information from local level and share it at EU level Networking

Continuity

Peer-to-peer exchanges/learni ng

Shared database of experts

Language support or at least trainings for national rural networks in policy activities Well functioning AKIS (consultation process, digitalisation, etc.)

Challeges: CAP network and AKIS. Narrow farm advisory system

One single CSP

Collaboration between the various AKIS agents for knowledge transfer

Consultation activities

Thematic working groups (EU/national level)

Strong support for regionalised Member States

Cooperation btw

service units and

MS -

Maintaining stakeholder trust - Maria Custódia

Maintaining and strengthening the engagement of all actors seems to be important during the transition periode a well as in the future CAP periode. Focus on benefits for actors.
