Preliminary ideas for the governance of the EU CAP Network

Assembly

Networking event

Annual meeting

Clear distinction between Assembly and SG

EU CAP Network Steering Group

Number of meetings in the future TBD

What basis will be organised the rotation? TBD

Rotating members

The type of rotation we reflect on is rather at level of organisations than individuals

Can members rotate to ensure coverage of different topics?

Selection membership mechanisms: needs & opportunities

Example: 2-3 years rounds by group. Aim all groups to take an active part

Size of Steering group - Depending on the option

A) No rotation

B) Selecting members from Sub-groups + members from Assembly

Permanent Sub-groups

for copa is better not to have many rotating members as to give continuity to the discussions and activites

More participants and views included

More "efficient" in networking

Ensure participation

Two way reporting would be relevant

Governance meetings outcomes will be communicated to National Networks

Civil dialogue group structure has change

How to make the best cooperation possible between CDG and Governance bodies?

Leader CLLD

Knowledge and Innovation

In Finland we have one member in steering group per each thematic focus group. That is a good link between focus group and steering group - Teemu Hauhia

Membership extended

Future Membership to be decided

new CSP
