

Environment and Climate

Q1: What are the key issues in relation to environment and climate that you have been working on or are envisaging for near future?

Forest measures and renewal (cooperation with Ministry). Open public consultation (SK)

Improve forest resilience and ecosystem. MA will report on these measures next year (SK)

Environment and climate is a focus. Brochure on biodiversity. (VL, BE)

Annual topics in focus. This year EU Green Deal (AT)

Workshops on agri-environment measures and CSP (RO)

large meetings for farmers in every province, to explain the new CAP, with a big focus on the green architecture. (VL, BE)

Potential of Greener economy, circular economy, etc (AT). Through workshops, events, and good practices.

360 biodiversity, carbon certification and compensation mechanisms (Walloon, BE)

Workshop on youth entrepreneurship. Organic sector. (ES)

Thematic Group on Green growth (FI)

Repeated topics Management of natural resources, renewable energy, green farming practices (PL)

Demonstration farms and regenerative farming through smart villages work. TGs Green farming and agricultural protection and and regenerative farming (PL)

LAGs strategies. Feedback sessions on LEADER groups. How to include environmental issues better (FI). Sometimes they include the climate angle but they don't realise

Environment under LEADER will receive more funding. (IE)

Environment and climate will be more present on RDP not on LEADER (LU)

Stimulate the environment through innovation (NL)

Awareness of eco-schemes (CY)

Q2: What sort of topics in this area would you be interested in being covered through EU-level networking?

Workshops on eco-schemes and environmental measures (DE)

Agro-forestry systems is new in DE. It would be helpful to have further information

Connect P1, direct payments and eco-schemes with environmental conditions. What can be done in RD measures? What can NRNs do to support this?

How to connect P1 and P2 (NL)

Further disseminate and showing off the potential of fields like greener economy and sustainability (AT)

Small networking events for good practices

More information on eco-schemes since it's new and how to bring closer the topic of biodiversity to farmers (SI)

Include the environmental perspective not only on Forest measures but other topics (SK)

How LAGs can include environmental strategies narratives. Climate proof in LEADER. (FI)

Healthy soil

Climate adaptation (SE)

In PL the Ministry doesn't deal with Forestry so this is a challenge

Circular economy. Support to get a better understanding on the finance sources and mechanisms (PL)

Further information about measures (VL, BE)

Communicate on EIP OG next steps and other alternatives and facilitate networking (IE)

Good practices on how to disseminate information for every subtopic

Change the perspective of agri-environment measures (RO)

Workshops to exchange GP from the LAGs (ES)

Strategic approach on coordination of different funds on climate and environment (FI)

How to transition LEADER funds on environment to the practice (IE)

Good practice examples and peer-to-peer exchanges (CY) E.g. on Smart Villages projects

Q3: Do you have any examples of good practice / success stories in your countries?

Couple of case studies on social farming (IE)

Sharing experiences on carbon fixations (Walloon, BE)

Agricultural newspaper section about green growth and sustainable farming (regenerative farming and digitalisation) (FI)

VL, BE. Good practice brochure on biodiversity.

Farm visits to inform about P1 and green architecture (VL, BE)
