Q1: What are the key issues in relation to food supply chains that you have been working on or are envisaging for near future?

Shorter supply chains - mobile slaughter houses (DE)

Reinforce the cooperatives

to make them strongers in

the role of the negociation

with the markets (ES)

We are building stronge

local MAs in P1 in Finlan

We are strengthening thi

cooperation. (FI)

connection as NSU to

Animal wellfare.

climate issues

(DE)

Innovation Route was devoted to new ways of

value for producers and strengthen their bargaining

field practices currently at work in Wallonia. The

lessons and to formulate several operational

recommendations in terms of the development of

"short circuits" likely to be of interest to both actors in

Support to OGs through M16 - calls out already (PL)

Grants for supplying direcct to consumers (PL)

Green regional clusters, to support and promote the collaboration in the supply chain (SE)

Increasing

organic

production (IE)

Stronger links with Municipalities as they are closer to the farmers

> Role of the consumers. Reputation management (PO)

> > Organisation of the agricultural sector (PO)

> > > food

Important role fo the fair prices (taking into diferenciation (BE).

Marketing (production produced from a sustainable way) (ROI)

Q2: What sort of topics in this area would you be

interested in being covered through EU-level networking?

Quality certification of the production

Keep joining quality + sustainability + marketing

Networking activities to support food chain (SL)

Value chain: primary sector, restaurants, etc. Educate consumers on why they should buy organic/local products (BE)

Information to the

consumer about how

they contribute buying

one specific product (BE)

How to join up with P1 activites Q3: Do you have any examples of good practice / success stories in your countries?

"Buy from the Farm Day" event. It is real "Farm-to-Fork day." It has been organized for several years. Now our (NSU) role is stonger in organizing the future. We want to develop it further. (FI)

We are now working on the development of food areas and more particularly on the development of market gardening (good translation? Vegetables producers) on small and medium surface through a similar process. (BE - Wal - Example of good practice : Good excample: As a Ministry we have establish a special institution called The Food Supply Chain Relationships mbudsman who takes cares on better realtionship during tha Leng (SI)

de-keten (NL)

atoriaterralimenta/ (ES)
