

ENRD workshop

Preparing the CAP Strategic Plans: Programming Regional-Level Interventions

Agenda

9th February 2021

The event will be virtual. A link to join the meeting will be provided to confirmed participants.

In response to the needs of the stakeholders, the ENRD Contact Point is organising an online workshop to discuss the scope for programming regional-level interventions and how to address regional and/or territorial specificities in the future CAP Strategic Plans (CSPs).

The meeting is the third in the series of events launched by the ENRD Contact Point to support Member States' preparations for the CSPs. It follows the [02/10/2020 webinar on the designing of CSP intervention strategies](#) and the [25/11/2020 webinar on the designing of CSP interventions](#).

The event primarily targets future CSP Managing Authorities, Paying Agencies and regional representatives.

Aims

The workshop aims to:

- Present and discuss approaches to programming regional-level interventions and the role and involvement of the regional authorities in the implementation of future CSPs, from the point of view of the legal proposal as well as of the Member States and regions;
- Encourage further exchange on the practical aspects of addressing regional and territorial specificities through the CSPs, with a particular focus on identifying key obstacles, possible solutions and needs for additional support;
- Collect and share opinions, ideas and other useful inputs.
