

Transnational cooperation projects in the EU

State of play
(February 2022)

Introduction	2
Methodological note	2
Interesting facts about TNC projects	2
Annex 1: Summary of transnational cooperation project fiches notified in SFC	5

Introduction

This document provides a summary about LEADER *transnational cooperation (TNC) projects approved and notified* by Managing Authorities of EU Member States in the Shared Fund Management Common System (SFC). The data presented in this document is based on SFC information provided from the beginning of the programming period until 9 February 2022¹. The document will be updated twice per year (next update scheduled for October 2022) and aims to provide information to LEADER stakeholders about the state of play of LEADER transnational cooperation in the EU, supplementing [other relevant information provided by the ENRD Contact Point](#).

Methodological note

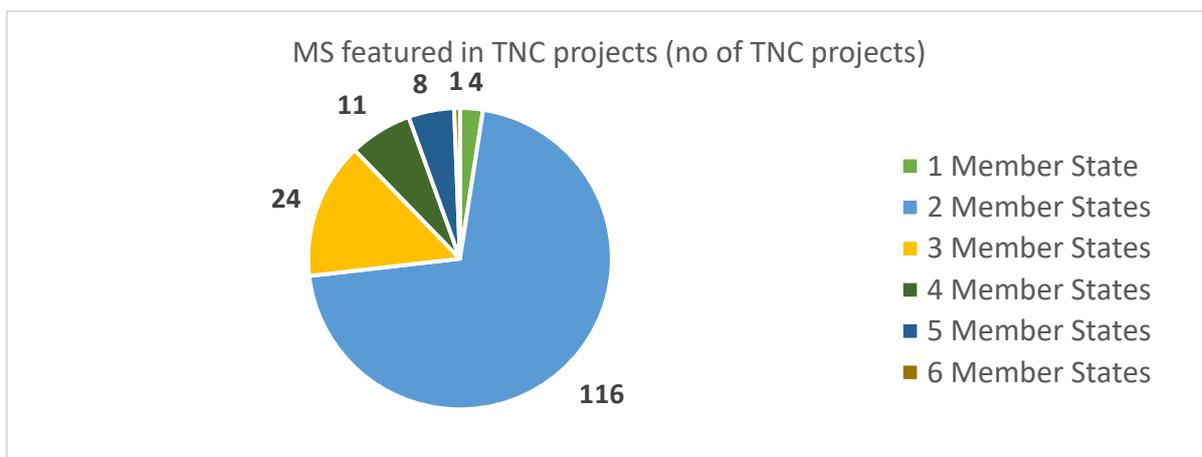

Apart from a LEADER LAG (or local actor from the LAG area) situated in the EU, LEADER transnational cooperation projects have to involve at least one partner from another country (EU or third country). In addition to this basic condition of involving partners from more than one country, it is also possible that a project involves more than one partner from the same country. In such cases, for the purposes of this document, the country having more than one partner involved in the project is counted only once.

This summary document refers to only those transnational cooperation projects that have been approved and notified to the SFC by more than one EU Member State. The annex of the document is based on the project fiches submitted by relevant EU MS authorities.

Since 1 February 2020, the UK is no longer an EU Member State. TNC partners from the UK in projects which started before February 2020 are counted as Member State partners in this document, as the UK was still a Member State then. TNC partners from the UK in projects starting as of February 2020 will be counted as third-country partners.

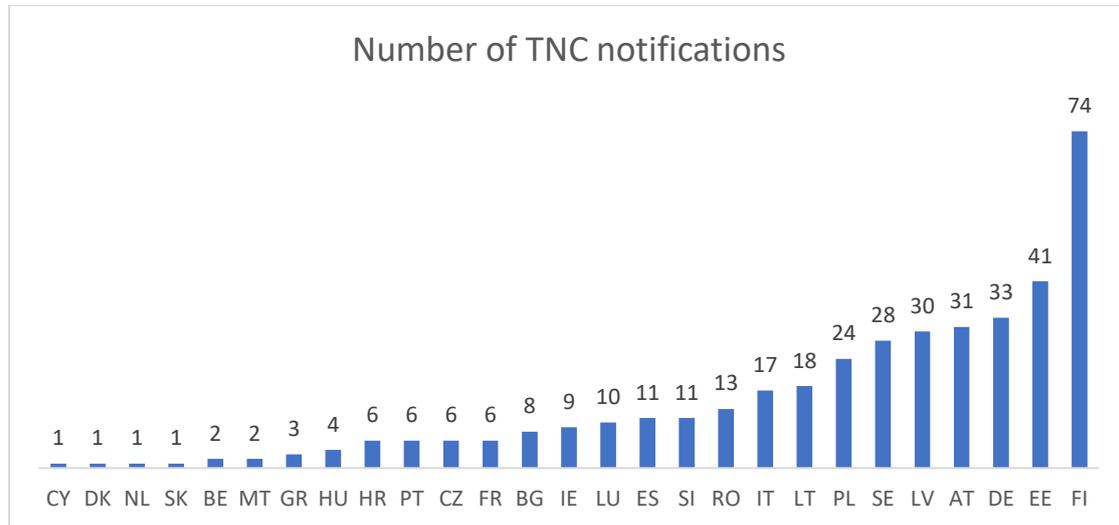

Interesting facts about TNC projects

- ✓ This analysis concerns 164 projects. 27 EU Member States were involved in at least one of them.
- ✓ There are 116 projects involving 2 countries.
- ✓ The highest number of countries in one project is 6. This is the case for one project, while 8 projects involve partners from 5 EU Member States.
- ✓ Out of the 164 TNC project notifications analysed, 11 include the UK with a cooperation partner.

¹ This document presents an update based on its previous version (presented at the 9th LEADER/CLLD Sub-group meeting). The number of TNC notifications with only one EU MS (and no third country included) was 55.

- ✓ EU Member States vary considerably in the number of TNC projects they are involved in, ranging from 1 to 74. The highest numbers of TNC projects were approved and notified by Finland (74), Estonia (41), Germany (33), Austria (31), and Latvia (30).

A large number of EU Member States cooperate mostly with neighbouring countries. With the exception of Italy and Spain, the number one cooperation partner for the MS with >10 TNC projects notified is a neighbouring EU MS (e.g. RO-BG, SI-AT, AT-DE, FI-EE, SE-FI, etc.).

In terms of number of partner MS, on average, the countries listed below have joint cooperation projects with 13 other EU MS. The countries with more than 10 cooperating EU MS are: Germany / Latvia / Lithuania (all three of them with 12 cooperating EU MS), Sweden (13), Italy (15), Spain (16), Poland (16), Estonia (18), and Finland (21). This indicates some diversification in terms of partner MS towards non-neighbouring countries as well.

109	Natural Future of Cosmetics – Irish-Finnish collaboration project (Nacos)	IE, FI	P6	Employment, job creation	The aim of the Irish-Finnish collaboration project. Natural Future of Cosmetics (NACO) is to identify and address the industrial needs of rurally based cosmetic companies in both Ireland and Finland. Despite a high consumer demand in Europe for natural cosmetics, limited support structures can restrict rural SME's competitiveness in this sector. In particular, the project will focus on supporting rural cosmetic SMEs whose products utilise natural extracts, sourced regionally or nationally in each of the participating nations.	North East & West Kerry Development Company (IE); Oulujarvi LEADER (FI)
110	Government of Sustainability, acronym: GoS	BG, IT	P1, P3, P4	sustainability	The current project proposal will be implemented on the territory of the LAG-Razlog from Bulgaria in partnership with the LAG Sere Calabresi from Italy.
