

**Mini-workshop:
Effective LEADER delivery systems
to support rural resilience**

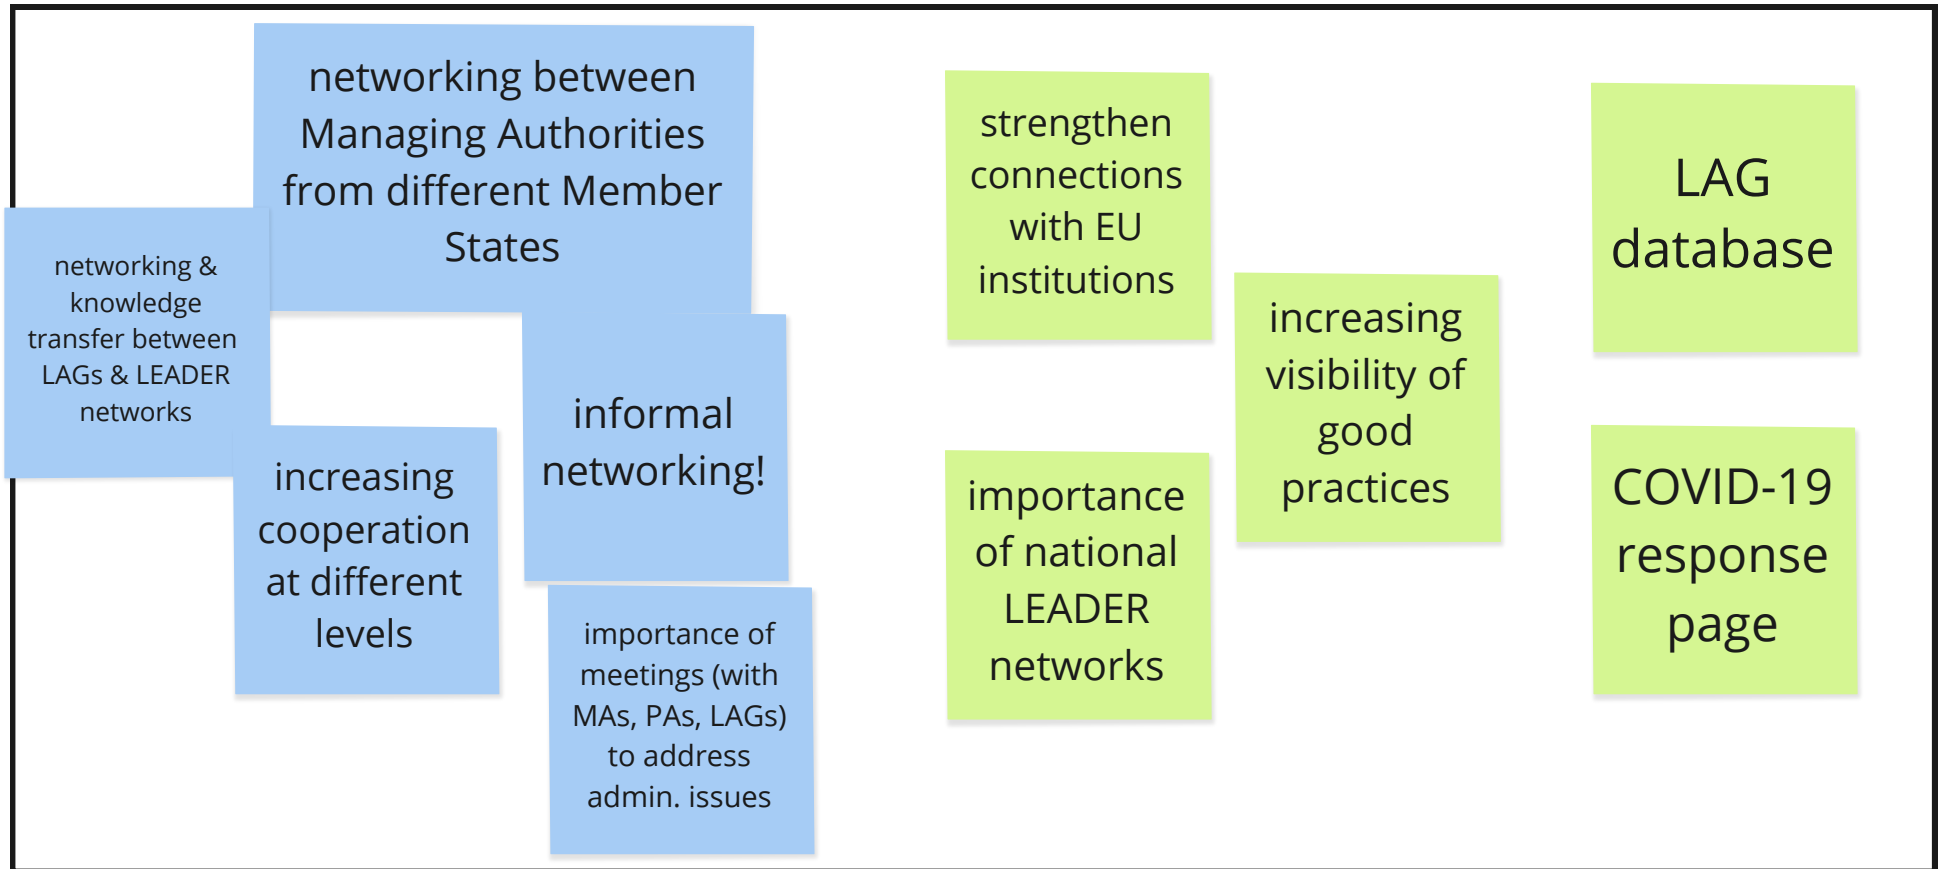

What are the defining characteristics of an effective LEADER delivery system that can support rural resilience?

How can MAs and NRNs best contribute to building such a LEADER delivery system?

What could be the role of networking (at EU level and at MS level) to support the development of an effective LEADER delivery system? How best to make the most of this?

How can you (we) make use of the ENRD and networking in the best way to build delivery systems that support rural resilience?

ENRD helps LEADER stakeholders raise specific issues w/ EU policy-makers

independent study on highlight different delivery systems across EU Member States

ENRD CP meetings (e.g. SCOs, LTVRA) for collective discussion

get out of the box!
(show results - outside the LEADER community)

In what practical ways can the ENRD CP best support this?

be more involved in
(online) workshops for
LAGs in different
Member States

more
participation in
LEADER events
in different MS

ensure EU
recovery fund
can be used
for LEADER

More informal
meetings (on topics
e.g. links LEADER -
SDGs)
