

## Mini-workshop: Effective LEADER delivery systems to support rural resilience

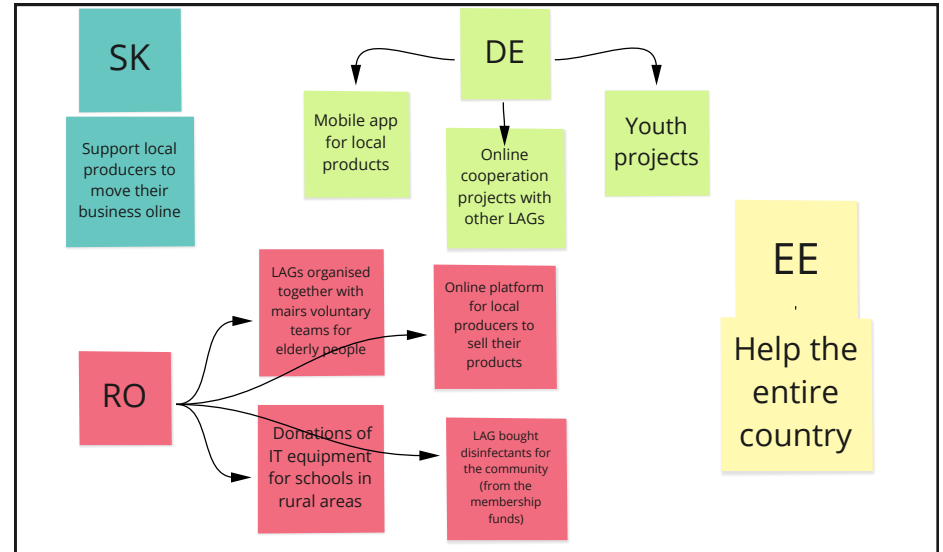

### Resilient LAGs

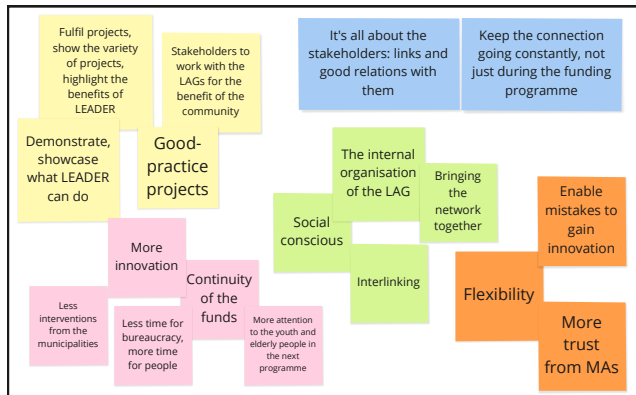

### What are the main characteristics of a 'resilient' LAG?

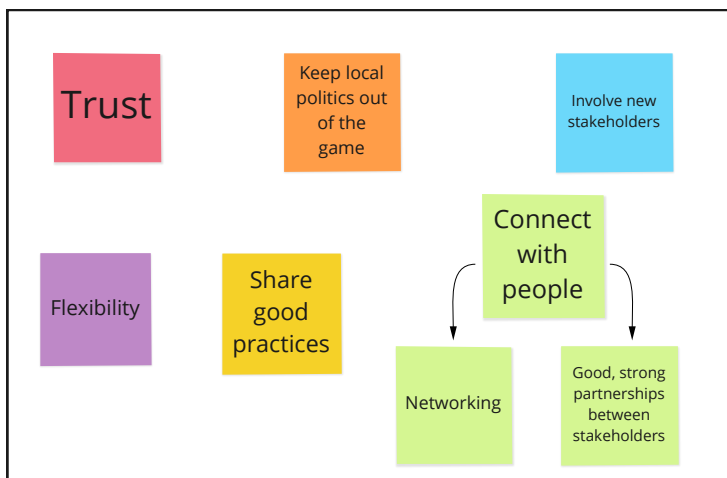

### Concrete examples from LAGs re Covid-19

## What is needed to enable LAGs to maximise their contribution to local rural communities?

## What is the role of other stakeholders in the LEADER delivery system in achieving this?

## What is resilience?

- responding to new challenges
- adapting to new situations
- being flexible
- working with different stakeholders
- helping the community to find solutions
- being innovative
- building trust

**What would be the main message from your group to decision-makers regarding how to strengthen resilience of LAGs? What can you do to contribute to this? What is the most practical way for ENRD to support this?**

less time for  
bureaucracy, more  
time for people

trust in LAGs  
together in  
Europe

remember to listen to  
the young people, they  
are the future, they are  
innovative

LAGs are in for  
the heart (not for  
the funds)

cooperation

always try to think how  
you can do things and  
not why you can't
