

18th NRN meeting

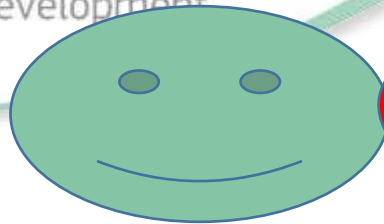

NRN ideas and methods for future networking and Lessons learnt during the Covid-19 pandemic

ENRD Contact Point
Kasia Panfil
22 October 2020

 #NRNMeeting

Q2

Lessons learnt during the Covid-19 pandemic

**miss bringing people
physically together,
having interaction**

- ✓ Re-think our territories, our behaviour, relationships, working time
- ✓ Importance of digital infrastructure in rural areas to facilitate contacts between initiatives & actors
- ✓ Online tools & communication: faster, cheaper & more frequent
- ✓ Too many digital information & webinars: people are tired – need to filter it,
- ✓ Web-meetings require time, specific skills, facilitators & detailed script, but good solution to replace travelling in this specific time
- ✓ Need for digital solutions: App for smartphone and tablet to receive news about RDP measures or call for tenders
- ✓ New rules for the implementation of projects to use of electronic tools
- ✓ Need for publications to reach those not online

- ✓ Pandemic requires flexibility and rapid decision-making,
- ✓ Managing team & other network members virtually
- ✓ Fast acquisition of new skills – training
- ✓ New planning process & resources (HR, financial)
- ✓ On-line tools & safe measures for MA (many restrictions)
- ✓ NRN provide practical support to policy makers for immediate financial resources to farmers and creating resilience conditions
- ✓ Difficulty to reach a target group not familiar with digitalised methods
- ✓ Disparities between rich and poor as well as urban / rural depending on the accessibility of services in rural areas
- ✓ New vigilance in terms of regional planning
- ✓ Dealing with social isolation & Urban exodus

Thank you for your attention
