

Cooperation among networks

- first thoughts on supporting activities and tools
of the ENRD

Mike Gregory, ENRD Contact Point
5 November 2014, Brussels

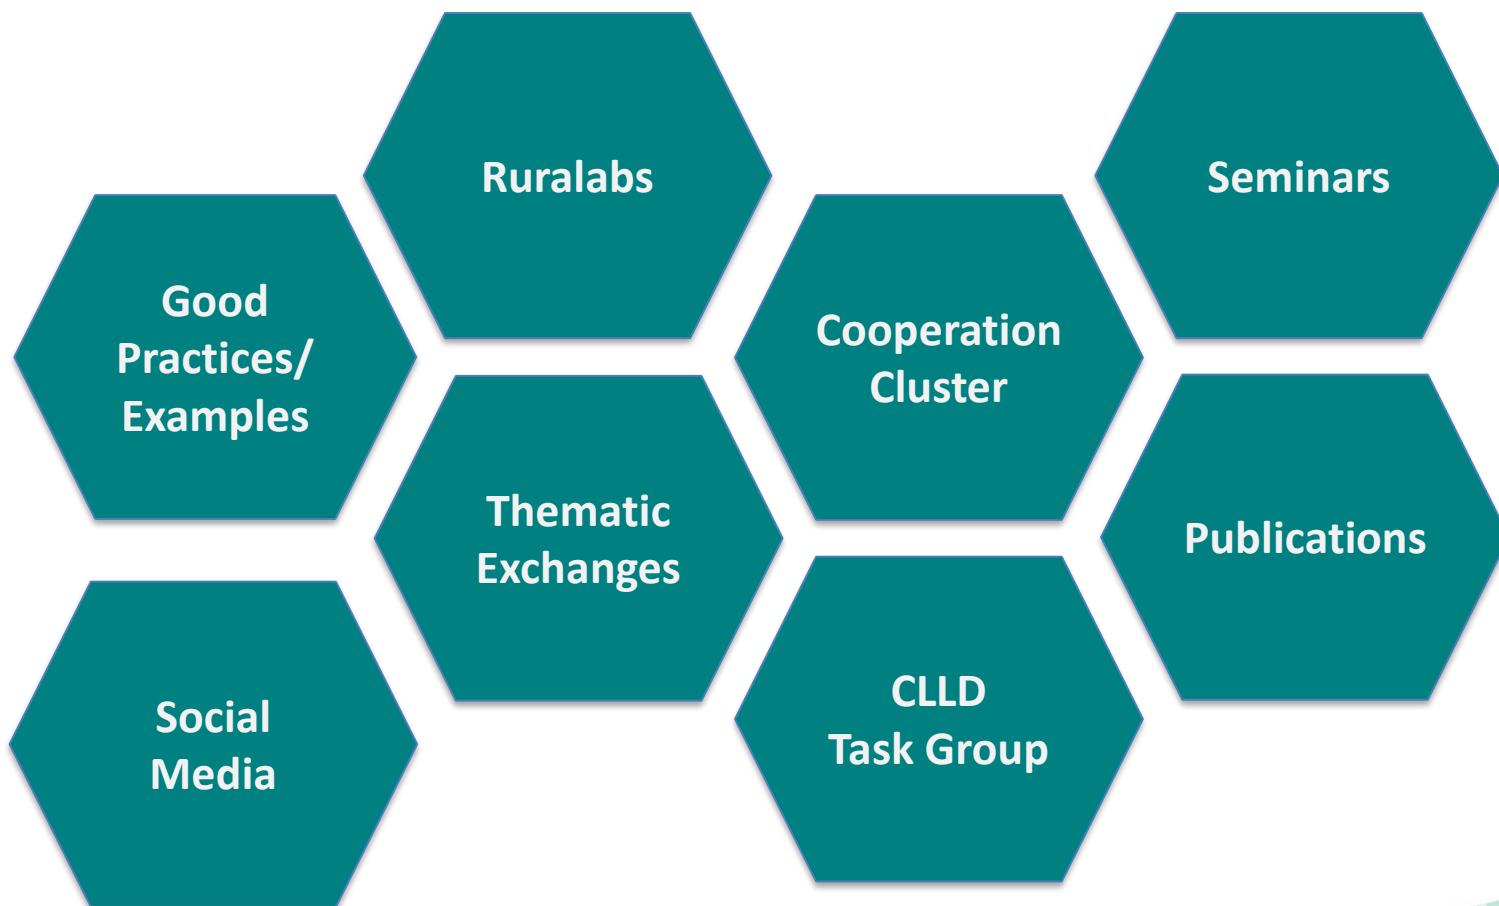

Planned ENRD CP Tasks – Year 1

Task	Key outputs
1. RDP analysis	PA fiches - 28 completed RDP fiches
2. Thematic groups	TG1 Stakeholder involvement TG2 Improving Implementation Meetings reports (may roll over to Year2)
3. Good practices	Coordinated approach agreed 25 examples
4. Website + social media	Website <ul style="list-style-type: none"> • 'live' within 2014 • V2.0 within Yr1 (July 2015) Twitter, Facebook, Youtube channels activated and moderated

Planned ENRD CP Tasks – Year 1

Task	Key outputs
5. Publications	<p>Newsletter monthly from Oct14</p> <p>Thematic Periodical: 2 issues</p> <p>Magazine: 2 issues</p> <p>Projects brochure</p>
6. Events	<p>2 seminars (topics to be confirmed)</p> <p>2 NRN meetings</p>
7. NRNs	<p>Specific actions: MS and macro regional</p> <p>Tools established</p>
8. LEADER & CLLD	Tools established
9. Transnational cooperation	Tools established

Activities where 'common working' will be effective?

Ruralabs

- Focus groups and contacts with key stakeholders
- Go beyond written programme documents to identify opportunities, what is new, what is exportable, needs and where there is real energy for action.
- Will lead to EU 'map' of main needs and opportunities
- Developed with NRNs to fit the national context (à mesure, no duplication)

Targeted support to stakeholders fitting the national context

Thematic initiatives

- Building on the successful methodology of ‘Focus groups’
- NRN (via NSUs and RN Assembly) input into selection of themes
- NRN and other stakeholder organisations involvement in collection and analysis of case-material
- Key role of NRNs, MAs and other organisations in the active dissemination and use of results

Networking priorities more aligned with RDP needs ‘on the ground’

Practitioners consolidated knowledge positively influences implementation of RDPs

Good practices/examples

- Two types of examples: **projects** and **practices**, plans for 100 per year (but starting slow – ca. 25 in Year 1 – and mainly based on 2007-2013 period)
- Used for searchable database and other tools (e.g. thematic work, publications, seminars)
- Aiming to collaborate with NRNs in order to collect and consolidate relevant practices across the EU

..... In order to strengthen the process so that it is more directly aimed at the **adoption** of better practices

At EU level – better consolidation (understanding of systematic success factors for projects)

Exchange of effective RDP delivery methodologies across MS

Social Media exchanges

- NSUs / NRNs flagging MS updates on the ENRD platforms (virtually no extra work!)
- NSUs /NRNs using ENRD social media in cases where dedicated NRN accounts do not (yet) exist

Reaching – and engaging with - more stakeholders

Sharing a wider range of perspectives

More ownership by the ENRD ‘family’ - positive feedback loop

....and do not forget that some stakeholders are not reached in this way!

Publications

- Newsletter items (information – links to other material)
- NSU-NRN-other networks contribution to Magazine articles ('Points of view')
- Support for identifying the content for the
 - ENRD Periodical
 - EAFRD Projects Brochures

Will lead to Better targeting and More relevant outputs

LEADER and CLLD

- Continue and build on work started in 2007-2013
- Facilitate exchange via the **CLLD task group** (can only work with NRNs and Ms willing to participate/lead activities)
- Support capacity building (1st step within Year 1: analyse capacity building needs and existing provision via a survey)
- Update and improve tools (Leader Toolkit, FAQs, LAG database...)
- Real time exchange possibilities

Practitioners consolidated knowledge positively influences implementation

Early identification of issues and exchange which will pay dividends later on

Transnational Cooperation

- TNC Fiches – initial preparation and update
- Proposed **Cooperation cluster** (NRNs and other stakeholders)
 - Addressing the identified and expressed needs (including a direct feed into EC)
 - Exchange of experience (planning – later implementation)
- Real time exchange possibilities

Specific input by MS will provide benefits to all

Early identification of issues and exchange which will pay dividends later on

Our joint work starts here!
