

Achieving results the CLLD way: Putting the method to work

Båstad, 7 December 2016

Niclas Purfürst
Director, Rural Development
Swedish Board of Agriculture

Why multi-fund CLLD?

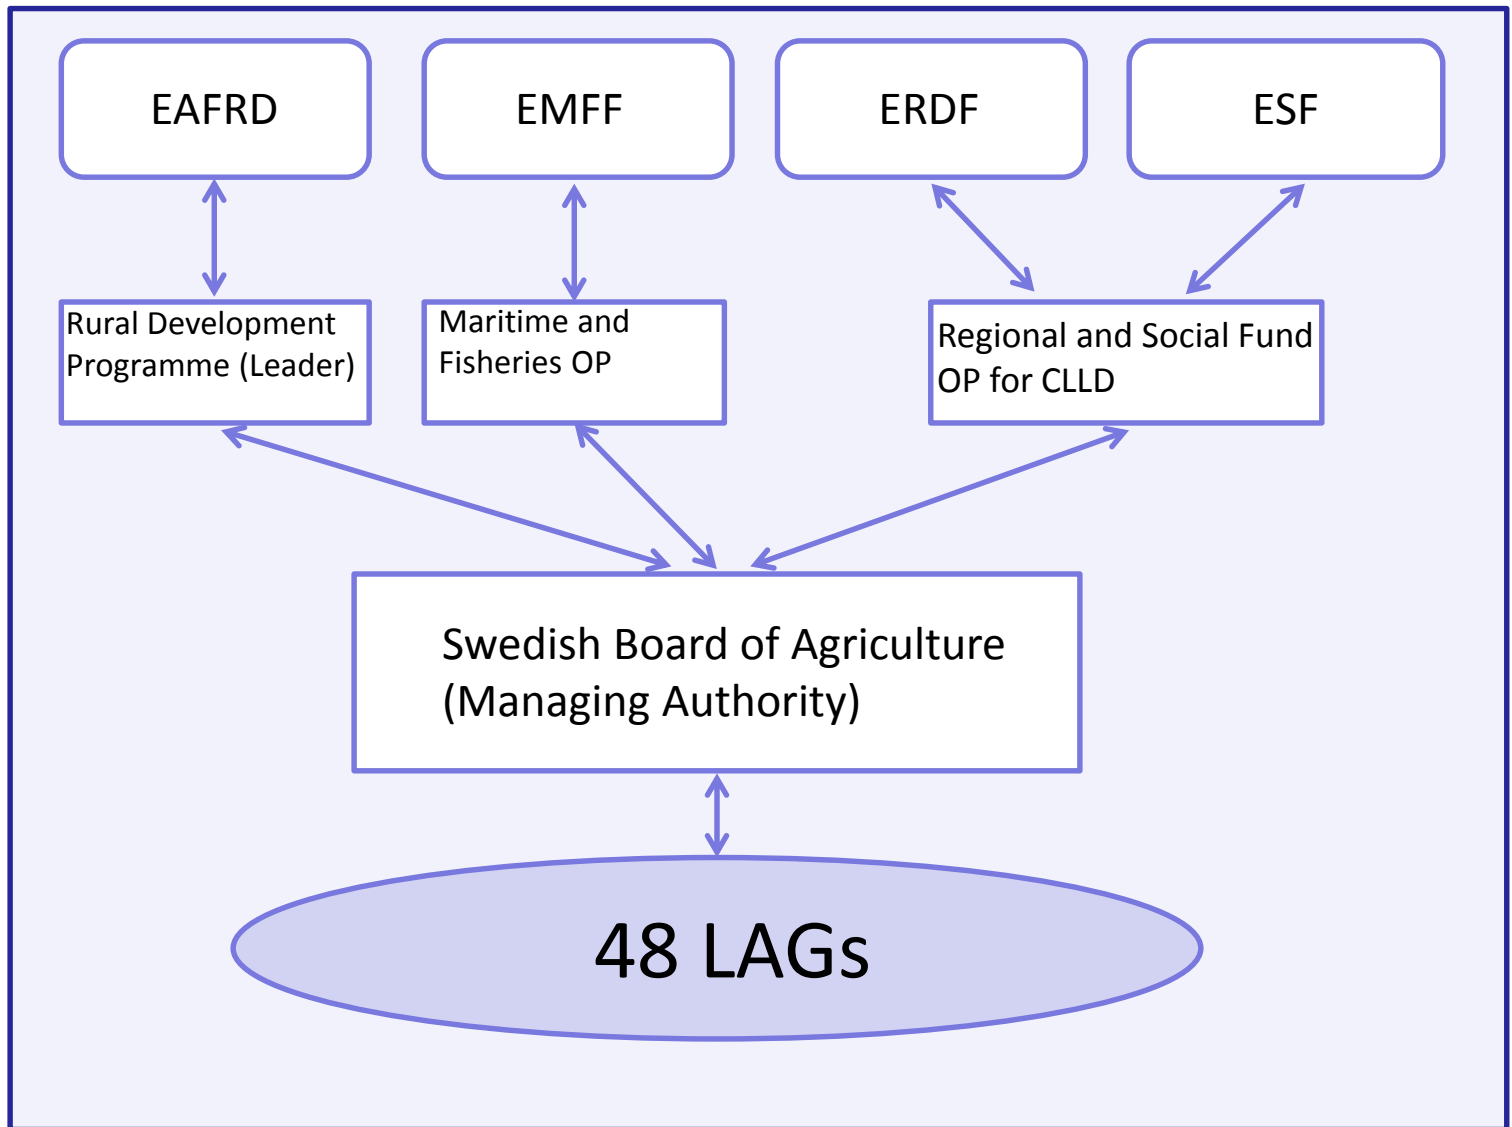

- Broaden the coverage and scope of interventions
- Broaden the partnerships and increase synergies
- Enhance economies of scale
- Desire to integrate funds has been listened to
- Simplification: one single entry point for the beneficiary, one single MA for all funds, harmonised national implementing rules

References in the Partnership Agreement

- *Local action groups will have the possibility to develop fund-integrated local development strategies covering actions funded by different funds. This provides a possibility to develop strategies **with a broader scope**, with **more of an integrated approach** and that provide the opportunity to **involve a broader spectrum** of stakeholders in the development and implementation of the strategy. The local action groups themselves select the actions and which funds they prefer to use in the implementation of their strategy*
- *Community-led local development falls under **thematic objectives 8 and 9** but contributes to the fulfillment of objectives **within all TOs***

Designing a user-friendly approach

- LAG serves as one single entry point for the beneficiary
- Multifund strategies at LAG-level
- One single MA for all 4 funds
- One single PA for all 4 funds
- Harmonised national implementing rules
- Close contacts with key stakeholders (i.e. LAGs, LUS - Local Development Sweden, National Rural Network)

Current challenges

- Administrative rules applicable to all funds
- Few applications and problems to get national co-financing at some LAGs
- Assessment of reasonableness of costs in umbrella projects
- Further development of IT-systems
- Coordination with other ERDF and ESF MAs
- Upcoming: Cities and urban-rural linkages

A few recommendations

- Consensus at government level
- Strong cooperation between ministries and other responsible bodies and stakeholders
- Build internal visibility and knowledge development, in particular as regards "new" funds
- Communicate with all stakeholders
- Build knowledge at LAG-level
- It takes time!
