- Diversifications

Support for increased farm productivity

- Capital investment in equipment generating new business, improved productivity and innovation.
- Marketing initiatives that develop new markets, promote new products, or support a co-operative/collaborative approach.
- Small scale improvements to enable more productive and sustainable use of land or to improve animal welfare.

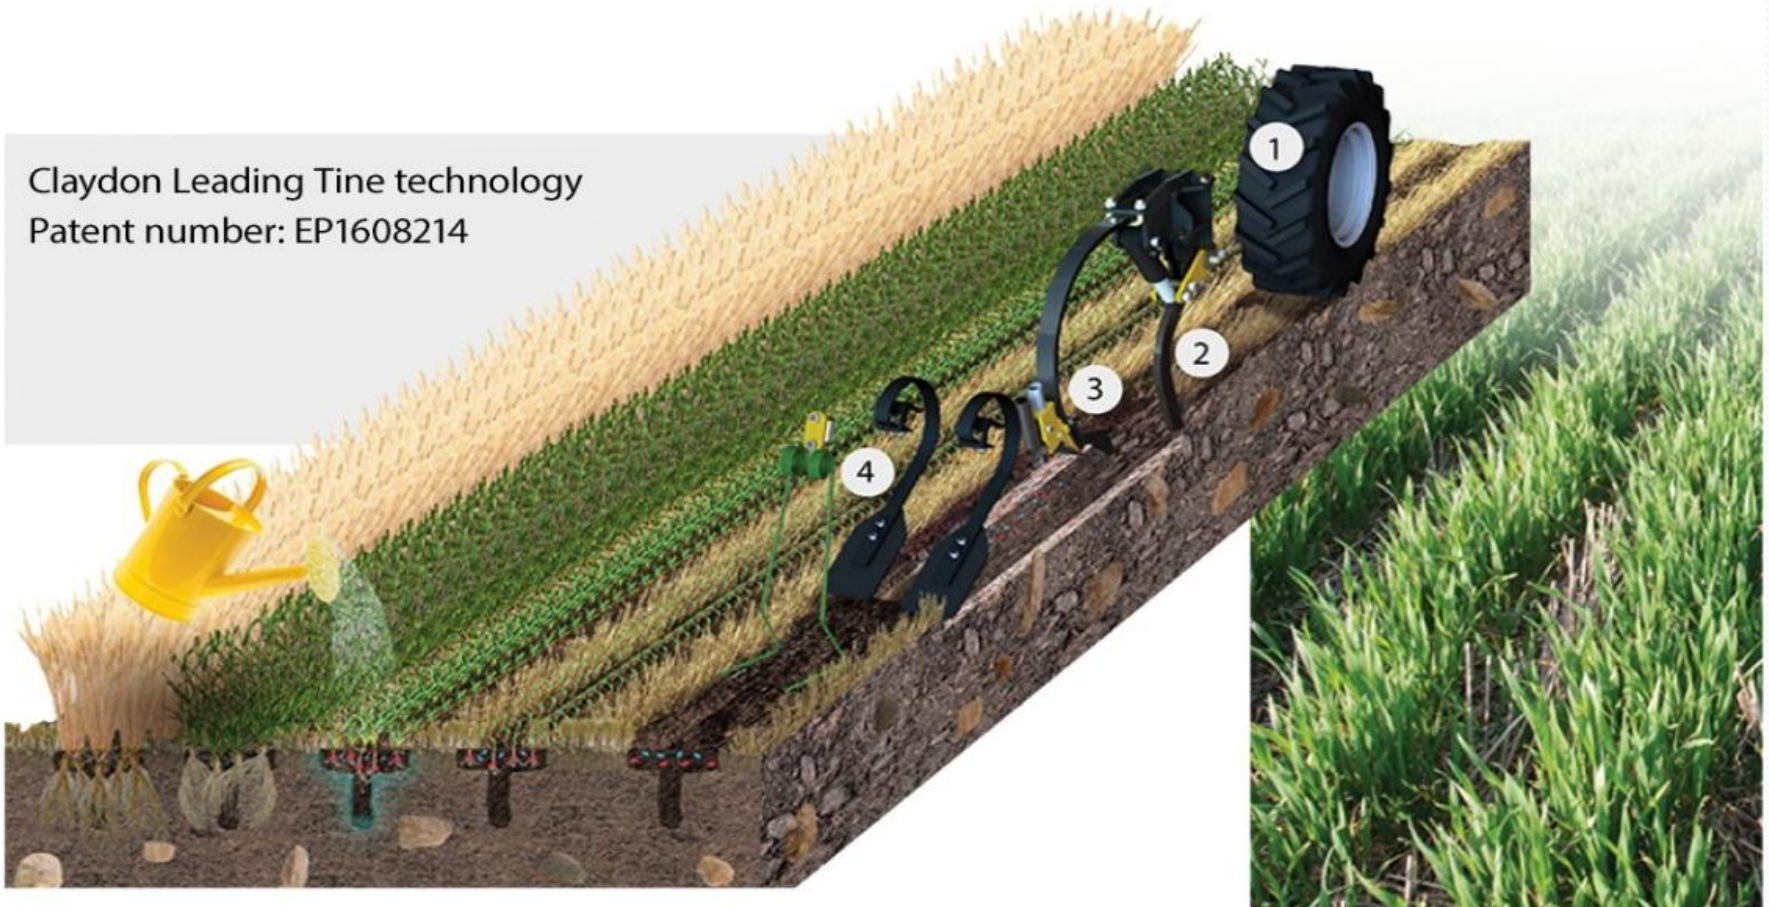

Support for increased farm productivity

- Supports small scale 'Proof of Concept' schemes to encourage innovation
- early adoption of new techniques to farming and to create and grow new products.
- Specific content that each LAG will want to tailor to be appropriate to their local area – e.g. size of local budget, the local priorities that the LAG wishes to emphasise and a map to show the geography covered by each LAG.

Strip tillage

Claydon Leading Tine technology
