

Rural environment database

Irish Rural Network support unit

The Irish NSU has developed an interactive storyboard database of project examples funded under the 'Rural Environment' theme of the 2014-2020 LEADER programme.

The database includes 12 projects, graphically displayed on a storyboard platform, a geographical map of Ireland combined with user-friendly interactivity and infographics. Additional outputs include A1 size posters on each of the projects and an overarching infographic of the 12 project examples.

The database and its related products are accessible via the NRN website and are promoted via social media and newsletter.

Target audience

Anyone interested in accessing funding under the 2014-2020 LEADER programme and specifically rural dwellers/communities/organisations who are planning on applying for funding for projects that fall under the 'Rural Environment' theme of LEADER.
