

CLEAN AIR BUSINESS OPPORTUNITIES

*Profiting from
less air pollution*

*Cleaner air benefits both people
and the planet – and makes
perfect economic sense.*

*Air pollution costs the EU at least €24 billion a year. Tackling the problem not only saves money but also creates new business opportunities and jobs. **More action** is needed to implement measures to reduce dangerous emissions and foster further innovation.*

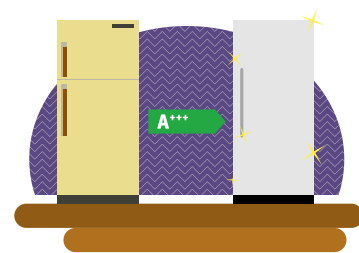

Examples of clean air business opportunities

Cleaner transport such as electric cars or buses and **retrofitting dirty vehicles and ships**

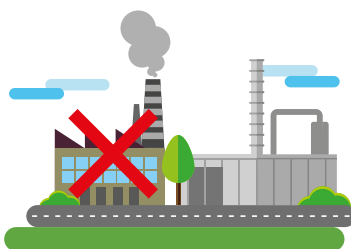

Harnessing **renewable energy sources** like wind and solar

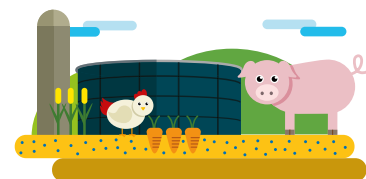

Replacing **energy-hungry household appliances** such as old stoves, boilers and refrigerators

Boosting **energy efficiency** by refurbishing buildings

Implementing **cleaner industrial processes**

Better **livestock feed and low-emission mineral fertilisers, manure storage and spreading techniques**

Did you know?

Air pollution costs **€4 billion in healthcare** and **€16 billion in lost workdays**

Air pollution costs **€3 billion in lost crops** and **€1 billion in building damage**

400 000 premature deaths in the EU every year are linked to air pollution

#CleanAirEU

EU funding is available for implementing air quality policy.
