

Did you miss Green Week 2007 or would you like to refresh your memory?

Green Week took place in Brussels from the 12 to 15 June. Linking in with the festivities for the 50th anniversary of the Treaty of Rome, the theme for this year's Green Week was *Past Lessons Future Challenges*. Debates, workshops and other events reviewed the actions of the environmental policy to date, and assessed how lessons from the past can be applied to current and emerging environmental problems.

The Green Week website offers a variety of possibilities for reading, hearing or watching the presentations and happenings which took place during the four days of Green Week

A lot of different audio-visual material can be downloaded, including video reports from each day of the conference and video-clips with hot topics.

A Green Week Daily "newspaper" was produced for each day at the conference. Here you can read interesting articles relating to the activities of the day. If you want to analyse specific presentations of the conference, the full text of each presentation may also be downloaded.

There is also a comprehensive photo gallery covering all the different events.

Everything may be downloaded from the Green Week website:
