Feedback:

The European Portable Battery Association (EPBA) is the authoritative voice of the portable power industry. The association supports the common interests of its members regarding portable batteries and battery chargers with European institutions and other leading international bodies to provide consumers with complete power solutions which are sustainable across their life-cycle.

EPBA supports the purpose of this evaluation and believes that it is useful to assess how to improve the Directive and its implementation on the ground. EPBA members are committed to fully cooperate with the European Commission in the achievement of this goal. EPBA has developed important recommendations to be taken into account in the report and evaluation of the Batteries Directive. These recommendations are enclosed.
