

Your Voice In Europe: ROADMAP feedback for Circular Economy Strategy

Related document: Circular Economy Strategy

Feedback:

I am writing from the point of view of policy implementer and policy adviser. I feel the roadmap is overall very good. But some comments: (1) There is a discrepancy between Objectives and Options, i.e. circular economy is rightly emphasised in the Objectives but not sufficiently addressed in the Options, the latter are rather focusing more on waste management again. (2) Whereas demand-side measures should be more prominently promoted, also as part of regional policies, excellence-led solutions relevant to circular economy can be probably identified/ promoted by excellence level actors, and there need to be linkages between these two "categories" in terms of both learning and investments. (3) Funding is very important of course for any policy implementation. Maybe more options on how it might be possible to fund / co-fund this type of policy should be discussed.
