Feedback:

Prevention

- Roadmap doesn't address the need to tackle single-use plastics
- Roadmap doesn't outline the problematic scale of plastic usage and the prevalence of plastics in all the aspects of our lives
- Missing issues: nano materials in packaging and multilayered packaging

Pollution of waters

- The sea based sources of plastic pollution are not covered (fishing nets, containers, etc.)
- Plastic pollution is an issue for all aquatic environment, not only the oceans
- Missing sources of microplastics: pellets, microfibers, biocarriers

Producer responsibility

- It points out the consumer responsibility in matter of littering but not enough the producer responsibility
- It should really be looking at how to strengthen EPR schemes to be a key tool to reduce plastic pollution

Recycling

- Need to provide evidence that 'chemical recycling' (aka pyrolysis or gasification) is not a viable solution and that the priority should be on prevention

Bioplastics

- Need to address the miscommunication towards the consumer
- There is a confusion between bioplastics, bio-based plastics, biodegradable plastics, etc.
