

Your Voice In Europe: ROADMAP feedback for Commission Implementing Act containing the List of invasive alien species of Union concern

Feedback:

It appears you are about to implement an act in which you have sought input from stakeholders. I have kept past and present a large number of animals, including some that i am told you are looking to put on a banned list, although i cannot verify this as no where easily accessed is there any information on this act, let alone any information concerning which animals to wish to ban. Why on the 02/11/15 am i, most certainly a stake holder, only now hearing third/fourth hand that the EU wishes to ban the animals that i keep? Some democracy this is, hey?

Forward to me links such that i can see what you are proposing? Im led to believe we have a few weeks until you vote upon matters that impact me greatly yet you've not bothered to alert me to or involve me in. How can i answer anything via this ridiculous exercise when you provide no information?

So at present i do not support any ban nor any legislation concerning alleged invasive species and i will not be alone in my country with this view. I will also not be abiding by this draconian undemocratic bulldozing of legislation.
