## **Feedback:**

*The European Recycling Platform (ERP) welcomes the initiative of the European Commission to evaluate the application of the Waste Shipment Regulation (WSR) in all EU Member States.*

*ERP, as part of the Landbell Group, is the only pan-European producer responsibility organisation (PRO) for WEEE, batteries and packaging. ERP is active in 16 European countries with different regulatory frameworks and also offers global solutions.*

*With more than 15 years of experience of transboundary operations, we can contribute valuable evidence to the state of enforcement of the WSR in different European countries and highlight the issues that a pan-European organization has with the implementation of the regulation and how it could be improved. Therefore, we hereby express our interest to take an active part in the upcoming stakeholder meetings and consultations and we are at your disposal for any questions.*
