## **Feedback:**

*The Plastics Strategy will aim at improving the economics, quality and uptake of plastics recycling and reducing plastic waste in the environment. The European Recycling Platform (ERP) welcomes the initiative of the European Commission. ERP, as part of the Landbell Group, is the only pan-European producer responsibility organisation (PRO) for WEEE, batteries and packaging. The group supports producers to implement EU waste legislation and has collected more than 7 million tonnes of packaging and more than 2.5 million tonnes of e-waste containing significant amounts of plastics. ERP's extensive expertise is built upon more than 15 years of experience operating under various national compliance frameworks. We have advocated for higher recycling targets and quality standards for recycled materials. Apart from targets, we would welcome the improvement of harmonized economic incentives and security of investment for recycling innovations. As the only pan-European producer responsibility organisation we would like to give further insights and contribute to solutions to address existing problems. Therefore, we hereby express our interest to be an active part in the upcoming stakeholder meetings and consultations and we are at your disposal for any questions.*
