

iPoint

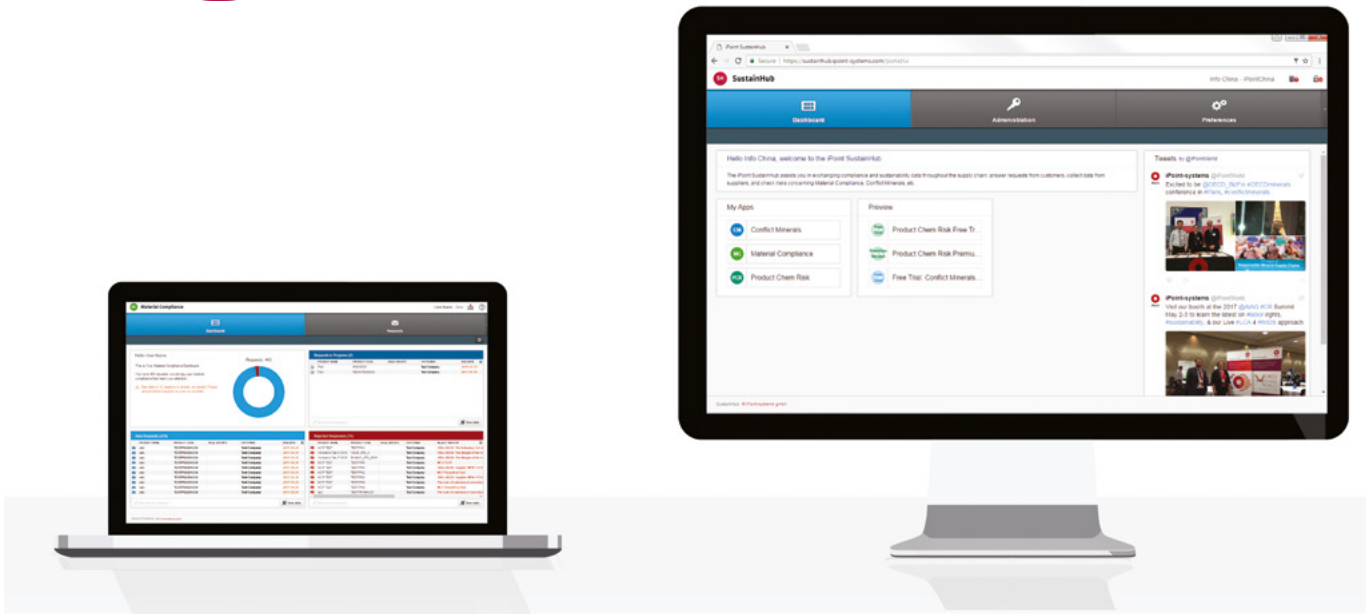

The Universal Compliance & Sustainability Platform

iPOINT SUSTAINHUB

SH

The iPoint SustainHub: Your Expert Community Platform

Multiple Challenges – One Solution

International regulations as well as customer requirements for environmental, social, and materials compliance are constantly increasing in number and complexity. Therefore iPoint has created a single point of entry to make communication and data collection in supply chains and value chain networks as easy and efficient as possible: The iPoint SustainHub.

Select & Scale

As a universal cloud platform, iPoint's SustainHub gives you easy access to various sustainability and compliance applications, e.g. Material Compliance or Conflict Minerals. Simply select the apps you need to fulfill your tasks to comply to regulatory or customer requirements. Each app offers suitable licenses depending on your company's size and reporting requirements.

Request & Report & Reuse

The SustainHub apps enable you to highly automate supply chain requests and use the data for your compliance and sustainability reports in standard formats. Suppliers can use the free basic licenses to answer customer requests and can easily reuse their declarations for new requests.

Communicate & Collaborate

Join the biggest community of compliance experts and benefit from tried and tested processes. Manage roles and tasks for your team. Engage with your supply chain – many of your suppliers may already be there!

Easy Onboarding & Overview

Unified user interfaces make it easy to quickly start working with any new app. Additional features like knowledge base and guided tours support your onboarding process. Dashboards give you an instant overview of open tasks and requests.

Manage All Your Compliance & Sustainability Challenges in One Place

CM Conflict Minerals

The pioneer project for compliance solutions in the cloud since 2012, the iPoint Conflict Minerals Platform (iPCMP) became part of the iPoint SustainHub in 2016. With more than 45,000 users, the iPCMP is the market-leading software solution for Conflict Minerals compliance. Building on standard industry formats, it helps you fulfil the enormous challenge of collecting, managing, aggregating, and reporting Conflict Minerals information and meet the requirements of customers and international regulatory authorities.

- ➔ One solution for the entire supply chain
- ➔ Supports compliance with existing and upcoming Conflict Minerals regulations (USA, EU)
- ➔ CMRT and IPC-1755 standard reporting options
- ➔ Comprehensive smelter management
- ➔ Extensive Documentation

PCR Product Chem Risk

The Product Chem Risk app shows you which substances in the REACH Candidate List may typically be found in which materials. The app has been developed by iPoint in collaboration with DEKRA.

- ➔ Efficient, pragmatic SVHC management
- ➔ Material- and article-based information
- ➔ Focused on critical products and parts
- ➔ Supports material selection in the product definition phase
- ➔ SVHC list is always up to date
- ➔ Upgradeable substance list (RoHS, POP, etc.)

MC Material Compliance

The Material Compliance app supports you in collecting, aggregating, exchanging, and reporting REACH- and RoHS-relevant information in your supply chain. Proven processes and efficient data management features help you automate many of the tasks.

- ➔ Use only one solution for the entire supply chain
- ➔ Request and report information for REACH, RoHS, and other substance regulations
- ➔ Reuse existing declarations for new requests
- ➔ Upload and manage attachments where needed
- ➔ Supports standards like IPC 1752a
- ➔ Supports various declaration types like partial and full declarations as well as a simple compliance confirmation

NXT Upcoming Apps

To ensure you can fulfil all your current and future compliance and sustainability requirements on one platform, the iPoint SustainHub is growing app by app. Next on the agenda are the following apps:

- ➔ Supply Chain Questionnaire (SCQ)
e. g. for Social Compliance, corresponding to the “electronic Labor Rights Template (eLRT)”
- ➔ Life Cycle Assessment (LCA)
- ➔ ...

iPoint is your reliable partner for product and process compliance and sustainability – and your door opener to the Circular Economy. Create business value with our market-leading software solutions and services for business processes and sustainable products. Worldwide, more than 50,000 customers from various industry sectors rely on iPoint – including Fortune 500 companies such as Becton Dickinson, Caterpillar, Emerson, Ford, and Toyota.
