EU Ecolabel Criteria for Tourist Accommodation

Summary of criteria

Joint Research Centre
the European Commission’s in-house science service

JRC Science Hub: ec.europa.eu/jrc
Commission Decision (EU) 2017/175 of 25 January 2017 on establishing EU Ecolabel criteria for tourist accommodation
Sources of information:

Changes to regulation since the previous revision.

Feedback from stakeholders (licenceholders, associations, organisations and government bodies).

LCA/EMAS reports: LCA review and best environmental management practices for tourist accommodation (Sectoral Reference Document (SRD)).

Other ecolabels: (Nordic Swan, Austrian Ecolabel (Das Österreichische Umweltzeichen), Green Key, TripAdvisor Greenleaders...).
Commission Decision (EU) 2017/175 of 25 January 2017 on establishing EU Ecolabel criteria for **tourist accommodation**

**Merged scope:**
- Tourist accommodation services (TAS)
- Campsite services (CSS)

**Criteria**
- 22 **Mandatory** requirements
- 45 **Optional** requirements (points system)
Mandatory criteria
Number of criteria per section

- General management: 5
- Energy: 8
- Water: 3
- Waste and wastewater: 3
- Other: 3
Optional criteria

Points system

- **Minimum points (TAS):** 20 points.

- **Minimum points (CSS):** 20 points (24 points if collective services provided: sanitary facilities, washing and cooking facilities or information facilities available to campsite tourists, travellers and lodgers for collective use)

**Auxiliary services (extra points):**

- **food services:** + 3 points
- **leisure or fitness facilities:** + 3 points (5 points if it consist in a wellness centre accessible to non-residents)
- **green areas:** + 3 points

**45 optional criteria: 121 points available**
Optional criteria
Points allocation per section

- General management: 16%
- Energy: 34%
- Water: 14%
- Waste and wastewater: 14%
- Other criteria: 19%
the services shall meet all respective legal requirements of the country(ies) in which the tourist accommodation is located, including the obligation for staff to be legally employed and insured.
 Criterion 1: Basis of an Environmental Management System

✓ basis of an EMS to manage and organise the actions for a most efficient environmentally friendly position. → **environmental policy statement, an action program and internally evaluate the organisation performance in relation to the targets.**

Criterion 2: Staff training & Criterion 3: Information to guests

✓ **Training to the staff** (including subcontracted external staff) on all the relevant aspects of the EU Ecolabel.

✓ **Guests shall be actively informed** (oral or written form at the reception or in-room) about the environmentally responsible behaviours.
  - the environmental policy and action plan
  - Energy and water saving actions
  - chemical use minimisation actions
  - waste reduction and separation actions
  - environmentally preferable means of transport available
  - available local touristic points of interest, local guides, local restaurants, markets, craft centres.

✓ A questionnaire shall be provided to **guests** + procedure for collecting input from guests shall be in place.
Criterion 4: General maintenance

✓ A **periodic inspection** of appliances (energy and water equipment) shall be done to ensure their efficiency and proper functioning. **Maintenance register** for criteria verification.

Criterion 5: Consumption monitoring

✓ The applicant shall have procedures in place for **periodically** (monthly or, at least, yearly) **collecting and monitoring data** to ensure the correct application of the basis of the management system

- energy use (kWh/guest night and/or kWh/m² (of indoor area) year);
- percentage of energy use met by renewable energy generated on site (%);
- water consumption per guest-night (litres/guest-night);
- waste generation per guest-night (kg/guest-night);
- consumption of chemical products for cleaning (kg or litres / guest-night);
- percentage of ISO Type I label products (%)

✓ **Short summary** of the data collected (instead of full data set) which shall be provided together with internal evaluation report of criterion 1.
**Criterion 6:** Energy efficient space heating and water heating appliances

- **Energy efficiency** requirements for:
  - **heat generating systems** (water-based space heating, local space heating and water heating appliances) installed during the duration of the EU Ecolabel award.
  - **Existing** hot-water boilers and co-generation units.
- Indicators (e.g. minimum seasonal space energy heating efficiency, energy classes, water heating energy efficiency)

**Criterion 7:** Energy efficient air conditioning and air-based heat pumps appliances

- **Energy classes** for household air conditioning and air-based heat pumps installed during the duration of the EU Ecolabel award.

**Criterion 8:** Energy efficient lighting

- **At application:** 40% lighting in the TA → at least Class A (50% for lamps turned on more than 5 hours/day)
- **2 years after application:** 80% lighting in the tourist accommodation shall have at least Class A (100% for lamps turned on more than 5 hours/day)
Criterion 9: Thermoregulation
✓ The temperature in common areas shall not exceed 22º (±2º) during winter and not be lower than 22º (±2º) during summer.

Criterion 10: Automatic switching off HVAC and lighting
✓ Automatic switching off HVAC in case of installation of new HVAC systems
✓ Automatic switching off lighting shall be installed at construction or renovation. (Not applicable for small TA with less than 5 rooms)

Criterion 11: Outside heating and air conditioning appliances
✓ Heating or air conditioning appliances installed outside of the tourist accommodation are not allowed.

Criterion 12: Procurement of electricity from a renewable electricity supplier
✓ Electricity from green suppliers.
✓ (50% from RES, 100% from RES or exemption) depending on the availability of electricity suppliers from RES where the accommodation is located.

Criterion 13: Coal and heating oils
✓ Coal heating system not allowed
✓ For heating system using oils, the sulphur content shall be below 0.1%.
**Criterion 14:** Efficiency water fittings: bathrooms taps and showers

- The **average water flow rate** of the bathroom taps and showers shall not exceed **8.5 litres/minute**. (bathtubs, rainshowers and massage-showers are exempt)

**Criterion 15:** Efficient water fittings: toilets and urinals

- Continuous flushing is not permitted in any urinal.
- Toilets installed within the duration of the EU Ecolabel shall have effective toilet flush of ≤ 4.5 L.

**Criterion 16:** Reduction in laundry achieved through reuse of towels and bedclothes

- TA shall change sheets and towels with a **frequency inferior to every day**. (More frequent changes: explicitly requested by law or national regulation, established by a third party certification scheme, or requested by guests).
**Criterion 17:** Waste prevention: food service waste reduction plan

- Food and packaging waste should be minimised

- **Criterion 17.a): for non-perishable food stuffs**
  - No single dose packages shall be used for food services

- **Criterion 17.b): for perishable food stuffs**
  - Balance of package/food waste:
    - Manage the provision of food to guests to minimise both food and packaging waste.

- **Exempt of the criterion**
  - Shops and vending machines under management of the tourist accommodation
  - Single-dose sugar and coffee inside rooms if:
    - Only fair trade and/or organic certificated products
    - Used coffee capsules are given back to the producer for recycling

**Criterion 18:** Waste prevention: disposable items

- Disposable toiletries, food service items, bed sheet and towels items available in the rooms only under specific circumstances.

**Criterion 19:** Waste sorting and sending for recycling

- Adequate containers for waste separation by guests shall be available
- Waste shall be separated into the categories required or suggested by the available local waste management facilities.
**Criterion 20:** No smoking in common areas and rooms

✓ *No smoking* is allowed in any *indoor common areas* and in *at least 80% of guests' rooms*.

**Criterion 21:** Promotion of environmentally preferable means of transport

✓ *Information about preferable means of transport* shall be given to the guests and staff.

**Criterion 22:** Information appearing on the EU Ecolabel

✓ The optional label with text box shall contain the following text:

"*This tourist accommodation is actively taking measures to reduce its environmental impact*

- *promoting renewable energy sources use,*
- *saving energy and water,*
- *and reducing waste.*"

✓ The logo will be provided to the TA after the license is approved, in an electronic and easily printable form. The logo can be used on brochures, letters, envelopes, booking confirmation, invoices, etc.
Criterion 23: EMAS registration, ISO certification of the tourist accommodation
Eco-management and audit scheme (EMAS) of the Union (5 points) or ISO 14001 standard (3 points) or ISO 50001 standard (2 points).

Criterion 24: EMAS registration or ISO certification of suppliers
At least two of the main suppliers or service providers of the TA shall be local (within a 160 Km) and: EMAS (5 points)/ISO 14001 (2 points)/ISO 50001 (1,5 points).

Criterion 25: Ecolabelled services
outsourced laundry and/or cleaning provider → ISO Type I label (2 points service, to a max. 4 points).

Criterion 26: Environmental and social communication and education
• communication/education notices: local biodiversity, landscape and nature conserv. (1p).
• Guest entertainment includes elements of environmental education (1 point).

Criterion 27: Consumption monitoring: Energy and water sub-metering
Energy and water meters (1p cat., to a max. 2 points): (a) rooms; (b) pitches; (c) laundry service; (d) kitchen service; (e) specific machines.

5 optional criteria: 18 points available
**Criterion 28:** Energy efficient space heating and water heating appliances
Existing a water-based space heating EU Ecolabel (1p) & local space heating appliance at least Class A (1p).

**Criterion 29:** Energy efficient air conditioning and air-based heat pumps appliances
a) 50 % household air conditioners/air-based heat pumps: **15 % higher Energy Class** (1,5 point); **OR 30 % higher Energy Class** than mandatory 7 (3,5 points).

**Criterion 30:** Air-based heat pumps up to 100 kW heat output
An air-based heat pump meeting **ISO Type I label**.

**Criterion 31:** Energy efficient household appliances and lighting to a maximum of 4 points):
50% (0.5 point) or 90% (1 point) of appliances certain energy efficiency class

**Criterion 32:** Heat recovery
heat recovery system for one (1,5 point) or two (3 points) of categories: refrigeration systems, ventilators, washing machines, dishwashers, swimming pools, and sanitary waste water.
Criterion 33: Thermoregulation and window insulation (2p each)
a) Thermoregulatory system individual regulation (designated range): (at or above 22 °C for the duration of the summer; at or below 22 °C for the duration of the winter).
b) 90% windows (heated and/or air cond. spaces) → double glazing or equivalent.

Criterion 34: Automatic switch off appliances/devices (1,5p each)
a) 90% rooms → automatic switch off HVAC systems (windows open & leave room).
b) 90% rooms → automatic system turns lights off when guests leave the room.
c) 90% outside lighting turn off automatically (defined time/activate proximity sensor).

Criterion 35: District heating/cooling and cooling from cogeneration (2p each)
(a) The heating and/or cooling provided by efficient district heating or cooling system. District heating or cooling system using at least 50 % renewable energy, 50 % waste heat, 75 % cogenerated heat or 50 % of a combination of such energy and heat; as defined by Directive 2012/27/EU.
(b) Cooling of the tourist accommodation shall be provided by a high efficiency cogeneration unit according to Directive 2012/27/EU.

Criterion 36: Electric hand driers with proximity sensor
All electric hand driers fitted with proximity sensors, OR ISO Type I label.

Criterion 37: Space Heater emissions
Space heaters (NOx) content of the exhaust gas shall not exceed the limit values.
Criterion 38: Procurement of electricity from a renewable electricity supplier
(a) individual electricity tariff containing the **100 % of the electricity from renewable energy** sources (3p) + **certification** by an environmental **electricity label** (4p).
(b) **100 % electricity unbundled purchase (guarantees of origin)** + certification label (3p).

*electricity label conditions*: (1) 3rd party; (2) from new renewable plant capacity of past 2 years/promote the investment in new renewable power capacities.

Criterion 39: On site self-generation electricity (renewable energy sources)
on site electricity generation from: photovoltaic (solar panel) or local hydroelectric system, geothermal, local biomass or wind power electricity generation that generates: **10 %** (1p); **20 %** (3p); OR at least **50 % of the overall electricity consumption per year** (5p).

*local biomass → 160 km radius of the tourist accommodation*

Criterion 40: Heating energy from renewable energy sources (up to 2p)
At least **70 %/100%** of total energy used to heat or cool the rooms and/or heat sanitary water → from renewable energy sources (Article 2(a) of Directive 2009/28/EC).

Criterion 41: Swimming pool heating (up to 1,5)
At least **50%/95%** of the total energy used to heat swimming pool water → from renewable energy sources as defined in Article 2(a) of Directive 2009/28/EC.

**14 optional criteria: 45.5 points available**
**Criterion 42**: Efficient water fittings: Bathroom taps and showers
(a) **water flow rate** showers < 7 L/min & bathroom taps (except bathtubs) < 6 L/min (2p).
(b) At least 50% bathroom taps and shower **EU ecolabel /ISO type I label** (2 points).

**Criterion 43**: Efficient water fittings: Toilets and urinals
(a) All urinals shall → **waterless system** (1,5 point).
(b) At least 50% of urinals EU ecolabel /ISO type I label (1,5 point).
(c) At least 50% of toilets EU ecolabel /ISO type I label (1,5 point).

**Criterion 44**: Dishwasher water consumption
Water consumption of the dishwashers measured according to the **standard EN 50242**, using the standard cleaning cycle: From **7 to 10 depending on the capacity (L/cycle)**

**Criterion 45**: Washing machine water consumption
Washing machines used within the TA: **37 to 56 litres /cycle depending on capacity**

**Criterion 46**: Indications on water hardness
(a) in proximity to sanitary areas/washing machines/dishwashers → displayed **explanations local water hardness** (0,5 point); OR

(b) **automatic dosage system** which optimises detergent use according to water hardness shall be used for washing machines/dishwashers (1,5 point).
Criterion 47: Optimised pool management
(a) Heated swimming pools and outside whirlpool shall be covered at night. Non-heated swimming pools and outside whirlpool covered when not used for more than a day (1p).
(b) Swimming pools and outside whirlpool → automatic system optimises chlorine dosing OR supplementary disinfection (ozonation and UV treatment) (0,5 point)/Natural plant-based filtration systems (1,5 points).

Criterion 48: Rainwater and grey water recycling
Alternative water sources for non-sanitary and non-drinking purposes: (i) reclaimed water or grey water from laundry and/or showers and/or lavatory sinks (1 point); (ii) rainwater via rooftop (1 point); (iii) condensate from HVAC systems (1 point).

Criterion 49: Efficient irrigation
(a) documented procedure for watering outside areas/plants (1,5 points);
(b) automatic system which optimizes watering times/water consumption. (1,5 points).

Criterion 50: Native/non-invasive alien species used outdoor planting
Vegetation of outdoor areas → composed of native and/or non-invasive alien species up to 2p.
(i) absence of invasive alien species of Union concern (0,5 point)
(ii) exclusively non-invasive alien species (1 point);
(iii) native and/or non-invasive alien species (1,5 point);
(iv) exclusively native species (2p)

9 optional criteria: 23.5 points available
Criterion 51: Paper Products (up to 2 points)
90% different categories of paper products used → EU Ecolabel or other ISO type I

Criterion 52: Durable goods (up to 4 points)
At least 40 % (a) bed-linen, towels and table clothes; (b) computers; (c) televisions; (d) bed mattresses; (e) wooden furniture; (f) vacuum cleaners; (g) floor coverings; (h) imaging equipment. → EU Ecolabel or other ISO type I

Criterion 53: Beverages provision
If beverages are offered (e.g. bar/restaurant service, shops and vending machines) → at least 50 % (1 point) or 70 % (2 points) on returnable/refillable containers.

Criterion 54: Detergents and toiletries procurement (up to 2 points)
At least 80 % purchased volume or weight of at least one of the following detergent and toiletry categories → EU Ecolabel or other ISO Type I label (a) hand dishwashing detergents; (b) detergents for dishwashers; (c) laundry detergent; (d) all-purpose cleaners; (e) sanitary detergents; (f) soaps and shampoos (g) hair conditioner.

Criterion 55: Minimisation of the use of cleaning products
Precise procedures for the efficient use of cleaning products
Criterion 56: De-icing
Where de-icing of roads is needed (carried by the accommodation provider) → mechanical means, sand/gravel or de-icers (ISO Type I label).

Criterion 57: Used textiles and furniture
Procedure:
(a) all donation activities for all furniture and textiles. (1 point);
(b) all reused/second-hand products procurement activities for furniture. (1 point)

Criterion 58: Composting
(1 point for each category, to a maximum of 2 points): (a) yard waste; (b) food waste from the food services; (c) biodegradable products (e.g. disposable items made of corn-based materials); (d) biodegradable waste produced by guests at their room/accommodation.

Criterion 59: Waste water treatment
a) If car washing facilities → only in areas specially equipped to collect the water and detergents used and channel them to the sewerage system (1 point).
b) Where it is not possible to send waste water for centralised treatment, on-site waste water treatment shall include pretreatment, followed by biological treatment with > 95 % BOD (biochemical oxygen demand) removal, > 90 % nitrification and anaerobic digestion of excess sludge (2 points).

9 optional criteria: 19.5 points available
**Criterion 60:** No smoking in rooms
No smoking allowed in guests' rooms.

**Criterion 61:** Social policy
*Written social policy* to ensure at least one social benefit for staff (to a maximum of 2 points):
- (a) time off for education;
- (b) free meals or meal vouchers;
- (c) free uniforms and work wear;
- (d) discount on products/services in the tourist accommodation;
- (e) subsidised sustainable transport scheme;
- (f) caution to get a house loan.

**Criterion 62:** Maintenance vehicles
No combustion motor vehicles shall be used for the maintenance (1 point)

**Criterion 63:** Environmentally preferable means of transport offer
- (i) **electric vehicles** for guests pick up service or for guests' leisure;
- (ii) plugs (**charging stations**) for electric vehicles;
- (iii) at least **1 bike for every 5 pitches or rooms**.
Criterion 64: Unsealed surfaces
At least 90% of the open air area surface under management of the tourist accommodation is not covered with asphalt/cement or other sealing materials.

Criterion 65: Local and organic products
(a) At least two locally sourced and not out of season (for fresh fruit and vegetables) food products at each meal (1 point).
(b) local suppliers of goods and services (1 point).
(c) At least two products (1 point) or four products (2 points) in daily meal preparation organic.

Criterion 66: Pesticide avoidance
Outside areas managed without any use of pesticides

Criterion 67: Additional environmental and social actions
(a) additional environmental actions (to a maximum of 2 points); and/or
(b) additional social actions (to a maximum of 1 point).

8 optional criteria: 16.5 points available
QUESTIONS & ANSWERS
PRACTICAL INFORMATION

Why apply?

- HELPS EU citizens to make informed choices
- CERTIFIES that your product is among the MOST environmentally-friendly
- DIFFERENTIATES your product on the European/global market
- CONTRIBUTES to resource and monetary SAVINGS in water and energy consumption, reduce waste production, to improve the CO2 footprint etc.
- TAKE ADVANTAGE OF MARKETING activities
- HELPS stand out amongst other companies in terms of environmental EXCELLENCE and CSR
PRACTICAL INFORMATION

Which companies can apply?

**European TA and TA from non-EU country that are marketing their service in the European market**

Important links and information:

EU Ecolabel Helpdesk: address soon available on the EU Ecolabel website

**Factsheet: criteria in nutshell**

Awarded to sustainable goods and services encouraging eco-innovation, the EU Ecolabel contributes to the EU goal of climate neutrality by 2050 and to the circular economy. Tourists are increasingly looking for accommodations that care for the environment.

The EU Ecolabel is a tool for tourist accommodation and campsites services to engage in a sustainable recovery, together with their staff and their customers. With the EU Ecolabel, it is possible to offer an eco-friendly and high-quality alternative to conventional hotels and campsites.

The time has come to promote tourism differently! Because quality and environment matter.

Stringent criteria, focusing on the main environmental impacts of the services, ensure that EU Ecolabel tourist accommodations are among the best on the market in terms of environmental performance. Specifically, the EU Ecolabel guarantees:

- An optimized environmental management of the tourist accommodation.
- Reduced energy consumption and CO2 emissions through energy savings, use of efficient devices and of renewable energy sources.
- Reduced water consumption.
- Reduced use of chemicals as well as of pesticides.
- Reduced waste generation and optimized waste management.
- Reduced emissions from cars.
- Limination of food waste.

Environmental excellence can also mean excellent savings! Tourist accommodations worldwide can apply for the EU Ecolabel, if their service is offered on the European market.
In each European Union Member State, a nationally appointed Competent Body evaluates applications to award the EU Ecolabel, and is available to provide technical support throughout the application process.

Select and contact the Competent Body
PRACTICAL INFORMATION

How to apply?

ECAT registration → part of possible marketing activities from the Commission
