

AUSTRIA			
POLICY FRAMEWORK	AUTHORITIES IN CHARGE OF GPP POLICY	Joint responsibility of Federal Ministry of Climate Action, Environment, Energy, Mobility, Innovation and Technology (MoC) Ministry of Finance	
	NATIONAL STRATEGY or ACTION PLAN	NAP or National Strategy on GPP in force (Y/N): YES Period of validity:	
		NAP was adopted by the Council of Ministers in July 2010 concluding 16 product groups, partly based on core criteria of EU-Toolkit. The criteria were already revised. A decision by the government is planned by June 2020, which brings the NAP in force and is binding for the federal level. Based on the governmental decision 10 criteria sets will be taken up by the provinces (harmonisation process with Länder).	
	GPP TARGETS	National level General obligation for the federal level to procure sustainable products and services.	Sub-National level Initiative between MoC and Länder to implement criteria of the NAP in their procurement procedures
LINKS WITH OTHER POLICIES (Sustainability, Innovation...)	Integrated National Energy and Climate Plan		
MANDATORY RULES ON GPP USE	The Federal Procurement Agency, per instruction of the Ministry of Finance, must include the national green public procurement in their procurements Regarding road vehicles (transposition of Dir 2009/33 EC) and energy efficiency strong legal requirements in § 80 and § 80 the Federal Procurement Law.		
IMPLEMENTATION	WEBSITES	National level Information on GPP: www.nachhaltigebeschaffung.at Austrian ecolabel: http://www.umweltzeichen.at/	Sub-National level Vienna (City and province): www.oekokauf.wien.at ; Vorarlberg: ÖkoBeschaffungService www.umweltverband.at Lower Austria: https://www.ncheck.at/start/ www.enu.at Tyrol: gemnova.at
	CENTRAL PURCHASING BODIES	The Federal Procurement Agency has to include the environmental criteria described in the NAP in its tenders. www.bbg.gv.at	
	GPP CRITERIA	Are GPP criteria developed at the national level (Y/N)? Yes	
		Are national GPP criteria based on EU GPP criteria? (please specify if to a great, some, small or no extent): some extent	
		For which product groups have national GPP criteria been developed: Buildings, civil engineering, Textiles products and leasing, Transport, IT equipment, cleaning products and services, furniture, food and catering services, lighting (indoor and street lighting), household appliances, electricity, gardening products and services, office supplies, paper, event management (www.nachhaltigebeschaffung.at)	For which product groups are GPP criteria currently under development:
		For which product groups are EU GPP criteria recommended:	
TCO/LCC TOOLS DEVELOPED AND/OR USED	TCO Tool for IT equipment; TCO tool for buildings: EconCalc (www.klimaaktiv.at/bauen-sanieren/gebaeuedeklaration/econcalc2.html); Other TCO-tools: gpp-proca.eu/downloads/calculation-tool/		
OTHER INITIATIVES (e.g. Labels, PPI)	Cooperation with PPI service for pilots on Circular Public Procurement, Initiative of MoC to foster SPP by establishing a service platform within the Federal procurement agency and beyond in addition to scientific support which has been already in existence.		
CAPACITY BUILDING	TRAINING (workshops, conferences, helpdesks, publications, etc.)	Training / information together with FPA and other organisations for procurers, decision-makers, representatives of business, suppliers National conference for public procurers each year	
	COOPERATION at national and sub-national level (Platforms, forums, networks, etc.)	Platform on SPP: www.nachhaltigebeschaffung.at with helpdesk, info via e-mail, phone and discussion fora Network of procurement officers to exchange experience with GPP/SPP (federal, regional and local level) Cooperation with innovation supporting procurement www.ioeb.at , www.innovationspartnerschaft.at	
	INTERNATIONAL COOPERATION	Cooperation in the GPP AG, in SPP Next and in European projects	

MONITORING

How is monitoring performed? (Automatically, On-line forms, surveys...)

What is monitored (Tenders, contracts, purchases, practices...)?

Who is monitored (central, regional, local authorities)?

Which product groups? Which criteria (EU GPP criteria/National criteria)?

Results from the latest monitoring exercise

A Monitoring is performed by a survey on a regular bases including federal, regional and local level. Automatically monitoring is planned on federal level based on purchases and related to the criteria of all product groups determined in the naBe-Actionplan.

LAST UPDATE: March 2020

	<p>GPP TARGETS</p>	<p>National level:</p>	<p>Flanders:</p> <ul style="list-style-type: none"> - 100% SPP at level of Flemish Region by 2020 <p>Brussels Capital Region: Target are defined every 3 years. Targets by 2017 are:</p> <ul style="list-style-type: none"> - 20% of financial volume of public procurements - 20% of the (number of) public procurement with environmental clauses <p>Wallonia: 100% SPP for 3 targets (banning social dumping, SME participation and effective maintenance of resources)</p>		
<p>LINKS WITH OTHER POLICIES (Sustainability, Innovation...)</p>	<p>Federal level: Central procurement, public procurement regulation, increasing SME participation, ethical and social procurement Flanders: Professionalisation of public procurement, focusing on SPP and innovation procurement (Commitment to spend 3% of tender budget on innovation), increasing SME participation in public procurement, achieving end-to-end e-procurement, enhancing integrity in public procurement, using procurement as a tool for strategic projects Brussels Capital Region: SPP are included in circular economy strategy, waste prevention policy and food strategy. Wallonia: GPP intrinsically linked with the social criteria, and the access of PMEs to public procurement, as part of the SPP Action Plan</p>				

MANDATORY RULES ON GPP USE		Some mandatory rules on products/services and on procurement processes are worked out in the federal and regional regulations and are mentioned in detail in the strategic documents (see above, topic national strategy and action plan)		
IMPLEMENTATION	WEBSITES	<p>National level: used by the federal and regional procurers: http://www.guidedesachatsdurables.be/ Government of Flanders: https://overheid.vlaanderen.be/duurzame-innovatieve-overheidsopdrachten Brussels Capital city level: https://environnement.brussels/thematiques/consommation-durable/marches-publics-durables https://greenpublicprocurement.environnement.brussels/ (registration & password needed) Wallonia: http://marchespublics.wallonie.be/fr/informations-generales/pratiques-de-marche/achats-publics-durables/index.html</p>		Sub-National level (see on the left)
	CENTRAL PURCHASING BODIES	<p>Federal level: The Federal Institute for Sustainable Development works closely together with the Ministry of Personal and Organisation, responsible for (coordination of) central procurement for several product groups and services. Government of Flanders: From 2020 on, the Agency of Facility Management was appointed as only central purchasing body for facility products and services for the Government of Flanders. Brussels Capital city level: The administration of Environment of the Brussels Capital Region developed since 2012 a green office supplies group purchasing. It is foreseen to developed other thematic central purchasing according to the need of the public purchasers</p>		
	GPP CRITERIA	Are GPP criteria developed at the national level (Y/N)? Yes, initiatives were taken by several departments		
		Are national GPP criteria based on EU GPP criteria? (please specify if to a great, some, small or no extent): In most of the cases the EU GPP criteria are the start of the discussion at national level with the stakeholders.		
		For which product groups have national GPP criteria been developed: Sustainability information (best available SPP products, criteria, labels, standards etc.) for about 150 product- and service groups. Detailed information is available at http://www.guidedesachatsdurables.be/		
		For which product groups are EU GPP criteria recommended: If national criteria exist, often based on the EU GPP criteria and discussed with the national stakeholders, the national criteria are recommended. If no national criteria exist, the EU GPP criteria are recommended. If no criteria at national or EU level exist, sometimes reference is made to criteria documents in the neighbour countries.		
TCO/LCC TOOLS DEVELOPED/USED	<p>Tools at federal level, available for all services: / Government of Flanders: LCC-tool for indoor lighting in development (publication expected by november 2020) – alignment is sought with the European LCC-tool for indoor lighting so both tools can be seen as complementary and can be used by procurers throughout Europe</p>			
OTHER INITIATIVES (e.g. Labels, PPI)	<p>Federal level</p> <ul style="list-style-type: none"> • Sustainable international standards (2019) • Ecological and social/ethical label database (2019) • Social responsible procurement (2017) • Monitoring sustainable procurement (2017) • Best practices comparison (2015) • Ethical and sustainable procurement pilot projects (2015) <p>More information on all tools and instruments on: http://www.guidedesachatsdurables.be/</p>		<p>Flanders Region TruSton: project on human / labour rights in natural stone chain</p> <p>Flanders / Brussels / Walloon region CO2 performance ladder</p>	
CAPACITY BUILDING	TRAINING (workshops, conferences, helpdesks,	Federal Ministry of Personal and Organisation and the Federal Institute for Sustainable Development Training by central focal point on SPP (government of Flanders and local government)		

	publications etc.)	Wallonia: training of 2 days on SPP (including for local authorities), helpdesk. Brussels Capital Region : training sessions about green public procurement, free helpdesk to help procurer in answering their specific needs
	COOPERATION at national and sub-national level (Platforms, forums, networks, etc.)	Cooperation at the national level via the Interdepartmental Commission on Sustainable Development (coordinated by the federal level) Networks of procurement officers to exchange experience at the federal or regional level Brussels Capital City: a Network of buyers and a GPP platform Wallonia: Network of buyers
	INTERNATIONAL COOPERATION	SPP Next, GPP AG, UNEP 10 YFP, EWGEPP
MONITORING How is monitoring performed? (Automatically, On-line forms, surveys...) What is monitored (Tenders, contracts, purchases, practices...)? Who is monitored (central, regional, local authorities)? Which product groups? Which criteria (EU GPP criteria/National criteria)? Results from the latest monitoring exercise	National: A first set of test-questionnaires to the federal services was sent out in March 2010. Since the Circular of 2014, several paths for structural monitoring are discussed and some are implemented: (1) reporting of strategies on SPP in the federal departments by reports of the Commission of Sustainable Development (destined to the government and the federal parliament), (2) monitoring by the federal accounting system FEDCOM, (3) monitoring of the products bought via central procurement, (4) monitoring by the database on the publication of the national tender documents etc.	Flanders Region Since 2018, monitoring through mandatory contract management system (e-delta) to monitor and manage tenders Walloon Region A new public procurement observatory has been set for Wallonia. SSP criteria will be monitored.
LAST UPDATE: March 2020

	NATIONAL STRATEGY or ACTION PLAN	NAP or National Strategy on GPP in force (Y/N): YES Period of validity:		
		National Strategy for Development of the Public Procurement Sector in Bulgaria 2014-2020 and Action Plan 2014-2020 (the latter includes as a measure the elaboration of Guidelines on GPP - in progress)"		
	GPP TARGETS	National level Objectives and targets for GPP have been identified	Sub-National level: Objectives and targets for GPP have been identified	
LINKS WITH OTHER POLICIES (Sustainability, Innovation...)				
MANDATORY RULES ON GPP USE	Energy efficiency requirements for awarding a public procurement for supply of products, related to consumption of energy, according to the EU legislation for energy labelling, incl. office equipment and tyres, and for ecodesign - the rules are set in the Energy Efficiency Act. Guidelines on the application of energy efficiency and energy savings requirements for the procurement of equipment and vehicles, the purchase and/or rental of buildings with high energy efficiency rates - elaborated and adopted jointly by the Sustainable Energy Development Agency and the Public Procurement Agency. Environmental performance requirements for supply of vehicles, according to Directive 2009/33/EC on the promotion of clean and energy-efficient road transport vehicles - the rules are set in the Public Procurement Act and the Ordinance defining the methodology for calculating certain costs for the whole life cycle of road.			
IMPLEMENTATION	WEBSITES	http://www.moew.government.bg http://www.aop.bg		
	GPP CRITERIA	Are GPP criteria developed at the national level (Y/N)? Yes		
		Are national GPP criteria based on EU GPP criteria? (please specify if to a great, some, small or no extent):		
		For which product groups have national GPP criteria been <u>developed</u> : Energy efficiency criteria for 5 priority product groups: office IT equipment, air conditioning and ventilation, white goods, office lightening and public street lightening, motor vehicles.	For which product groups are GPP criteria currently <u>under development</u> :	
		For which product groups are EU GPP criteria recommended:		
	TCO/LCC TOOLS DEVELOPED/USED			
OTHER INITIATIVES (e.g. Labels, PPI)				
CAPACITY BUILDING	TRAINING (workshops, conferences, helpdesks, publications, etc.)	Practical guidance on Public procurement with examples on how to use GPP criteria, relevant case law, etc. is distributed among contracting authorities and other stakeholders. PP Agency is in charge of Public procurement training; and if any environmental issues are involved the MoE will participate		
	COOPERATION at national and sub-national level (Platforms, forums, networks, etc.)			
	INTERNATIONAL COOPERATION			

MONITORING

How is monitoring performed? (Automatically, On-line forms, surveys...)

What is monitored (Tenders, contracts, purchases, practices...)?

Who is monitored (central, regional, local authorities)?

Which product groups? Which criteria (EU GPP criteria/National criteria)?

Results from the latest monitoring exercise

Monitoring of the implementation of the NAP shows that targets have not been achieved but there are positive results for GPP criteria implementation on paper

CROATIA			
POLICY FRAMEWORK	AUTHORITIES IN CHARGE OF GPP POLICY	Ministry of Environment and Nature Protection Committee for GPP has very important role in supporting implementation of measures and monitoring of the National action plan	
	NATIONAL STRATEGY or ACTION PLAN	NAP or National Strategy on GPP in force (Y/N): YES Period of validity: 2015-2017	
		First National action plan for green public procurement for period from 2015 – 2017 (NAP GPP) adopted by Croatian government in August 2015.	
	GPP TARGETS	National level target is: by the year of 2020, 50% of all public procurement contracts should include green criteria Sub-National level:	
	PRIORITY PRODUCT GROUPS	Copying and graphic paper, electricity, telecommunication services and mobile telephony services together with devices, cleaning services, office IT equipment, motor vehicles	
	LINKS WITH OTHER POLICIES (Sustainability, Innovation...)	Sustainability (sustainable production and consumption), energy efficiency, circular economy, public procurement, waste management, resource efficiency.....	
MANDATORY RULES ON GPP USE		Obligations set out in article 6 of the Directive 2012/27/EU on energy efficiency are transposed in the national Ordinance which lays down that central government must purchase only products, services and buildings with high energy efficiency performance.	
IMPLEMENTATION	WEBSITES	http://www.zjn.hr/	
	GPP CRITERIA	Are GPP criteria developed at the national level (Y/N)? Yes; GPP criteria for the priority product groups in NAP GPP are based on EU GPP Criteria http://ec.europa.eu/environment/gpp/eu_gpp_criteria_en.htm . Other additional criteria have not been developed.	
		Are national GPP criteria based on EU GPP criteria? (please specify if to a fully, great, some, small or no extent): Yes, fully	
		For which product groups have national GPP criteria been developed: GPP criteria for all priority product groups are based on EU GPP Criteria	For which product groups are GPP criteria currently under development: None
		For which product groups are EU GPP criteria recommended: Copying and graphic paper, electricity, telecommunication services and mobile telephony services together with devices, cleaning services, office IT equipment, motor vehicles	
	TCO/LCC TOOLS DEVELOPED/USED	LCC tools have not been developed on national level. NAP GPP contains an overview of several LCC tools and guides as well as an recommendation for the use of SMART SPP application	
OTHER INITIATIVES (e.g. Labels, PPI)	Croatian national ecolabel "Environmentally Friendly". "Environmentally Friendly" is characterised as Type I ecolabel according to the norm ISO 14024; http://www.mzoip.hr/hr/okolis/eko-oznake.html		
CAPACITY BUILDING	TRAINING (workshops, conferences, helpdesks, etc.)	In 2015 60 specialized training programs were held on the theme of public procurement, which were attended by 1033 participant. One of the topics of the public procurement curriculum was sustainable public procurement (general supply management, green procurement etc.). Target audience were employees of every legal body in Croatia that is obligated to follow the procedures of public procurement according to the Croatian Public Procurement Act. In 2016 the maintenance of the same specialized training programs continued, and there is a plan to conduct several specialized training programs "Training in the field of public procurement on the theme of green public procurement criteria".	
	COOPERATION at national and sub-national level (Platforms, forums, networks, etc.)	GPP web site was established in 2016 to communicate relevant information on the theme of GPP, examples of good practice, examples of successful projects on international, national and sub-national level that promote GPP etc.	

INTERNATIONAL COOPERATION	
MONITORING How is monitoring performed? (Automatically, On-line forms, surveys...) What is monitored (Tenders, contracts, purchases, practices...)? Who is monitored (central, regional, local authorities)? Which product groups? Which criteria (EU GPP criteria/National criteria)? Results from the latest monitoring exercise	<p>Monitoring was conducted by the use of on-line forms survey in 2016 and through official Electronic Public Procurement Advertisement since 2015 on annual basis.</p> <p>Electronic Public Procurement Advertisement gives simple information about the use of environmental criteria in public procurement when the contract is concluded. According to the statistical report for 2015, based on these data there were 29 contracts concluded in which some of the GPP criteria were used http://www.javnabava.hr/userdocsimages/Statisticko_izvjesce_JN-2015.pdf.</p> <p>The on-line form survey was taken to get more detailed information and will be used to monitor progress of the use of GPP criteria. Every legal body in Croatia that is obligated to follow the procedures of public procurements according to the Croatian Public Procurement Act is monitored through these two kinds of monitoring.</p>

	GPP TARGETS	National level Denmark has adapted the indicative political target of 50% of GPP as referred to in the GPP communication.	Sub-National level:
LINKS WITH OTHER POLICIES (Sustainability, Innovation...)	Waste prevention plan – Denmark without waste 2015 http://mst.dk/media/131357/danmark_uden_affald_ii_web_29042015.pdf		
MANDATORY RULES ON GPP USE	Timber: A circular on Procurement of Sustainable Timber commits state institutions to require sustainable timber when procuring wood and wood-based products, and also when it comes to the use of wood for state development projects. Energy using products: State institutes have to follow the guidelines for electricity using products set out by the Danish Energy Agency Clean and Energy Efficient Road Transport Vehicles: Public authorities are obliged to make an assessment of the vehicle's environmental impact and energy consumption throughout the life of the vehicle included in the purchasing decision.		
IMPLEMENTATION	WEBSITES	The Responsible Procurer: www.csr-indkob.dk , webpage gathering existing EU GPP criteria and national product specific guidelines within GPP Partnership for Green Public Procurement (POGI) and Forum for Sustainable Procurement www.ansvarligeindkob.dk . Webpage gathering news about GPP as well as POGI's procurement targets. Both the Partnership and Forum are voluntary.	
	GPP CRITERIA	Are GPP criteria developed at the national level (Y/N)? Yes, but for the most part the EU GPP criteria is communicated to the procurers	
		Are national GPP criteria based on EU GPP criteria? (please specify if to a great, some, small or no extent):	
		For which product groups have national GPP criteria been developed: Electricity using products Timber Transport (small and large vehicles)	For which product groups are GPP criteria currently under development:
		For which product groups are EU GPP criteria recommended: For the product groups where there is no national guidance	
	TCO/LCC TOOLS DEVELOPED/USED	TCO tools and guidance are developed for 13 different product groups: computers, displays, multi-function devices, servers, storage, projectors, large network equipment, small network equipment, UPS, add-on bidets, lightning, self-service machines and fridges and freezers. They are currently being updated with a module calculating the end-of-use phase. New TCO-tool for transport is currently developed.	
OTHER INITIATIVES (e.g. Labels, PPI)	Another round of the GPP Task Force was initiated at the end of 2019 and will advise 14 public organisations on implementing GPP. Partnership for Green Public Procurement is developing new GPP targets for transport, construction and toys in 2020. Forum for Sustainable Procurement will be hosting events around transport, FSC-certification, TCO, Asset & Inventory and IT.		
CAPACITY BUILDING	TRAINING (workshops, conferences, helpdesks, publications etc.)		

		<p>COOPERATION at national and sub-national level (Platforms, forums, networks, etc.)</p>	<p>Two main platforms for dissemination and training: -Partnership for Green Public Procurement (involving both municipalities, regions and state institutes) www.ansvarligeindkob.dk is a voluntary initiative which establishes GPP targets for certain product groups -Forum for Sustainable Procurement is a knowledge sharing network involving both public and private sector organisations. www.ansvarligeindkob.dk . On the webpage news, cases and tools within sustainable procurement are available and during the year several workshops and working groups are carried out.</p>
		<p>INTERNATIONAL COOPERATION</p>	<p>Participating in different EU project (SPP Next).</p>
<p>MONITORING How is monitoring performed? (Automatically, On-line forms, surveys...) What is monitored (Tenders, contracts, purchases, practices...)? Who is monitored (central, regional, local authorities)? Which product groups? Which criteria (EU GPP criteria/National criteria)? Results from the latest monitoring exercise</p>		<p>A study published in 2016 aims to provide an overview of the status of green public procurement in Denmark (in 2013). Furthermore, the aim is to examine the possibility of continued monitoring of the government's, regions' and municipalities' awareness of environmental considerations in connection with public procurement. MONITORING

How is monitoring performed? (Automatically, On-line forms, surveys...)

What is monitored (Tenders, contracts, purchases, practices...)?

Who is monitored (central, regional, local authorities)?

Which product groups? Which criteria (EU GPP criteria/National criteria)?

Results from the latest monitoring exercise

Monitoring by examining tender calls and by questionnaire in 2012 and 2017.

Around half of the municipalities considered sustainability goals in their procurement strategy or other procurement instructions. Sustainability goals are often set at a fairly general level and only around one fourth of the municipalities had defined more detailed sustainability criteria in their procurement strategy or instructions.

TCO/LCC TOOLS	Joint task force aiming at establishing precise criteria for LCC (for now focus on CO2 emissions from wood building materials)	

	DEVELOPED/USED		
	OTHER INITIATIVES (e.g. Labels, PPI)	A guidance note on socially responsible public procurement was also published in 2009. In the pipeline: Guide on the Life-cycle costing, Public procurement and climate	
	CAPACITY BUILDING	TRAINING (workshops, conferences, helpdesks, publications, etc.)	Ministries will be asked to increase awareness on SPP and SD through the broadcasting of information on the internal networks. GPP training programmes are in place and done by government institutions: IFORE (Institute for environmental training – Ministry of Ecology), IGPDE (training institute of the Ministry of Economy) and ADEME (National Agency for Environment and Energy) From 2010 on, the Prime Minister circular makes certain number of hours of training on Sustainable development mandatory. Guides to procurers (check GEM-DDEN for sustainable procurement guides)
COOPERATION at national and sub-national level (Platforms, forums, networks, etc.)			
INTERNATIONAL COOPERATION			
MONITORING How is monitoring performed? (Automatically, On-line forms, surveys...) What is monitored (Tenders, contracts, purchases, practices...)? Who is monitored (central, regional, local authorities)? Which product groups? Which criteria (EU GPP criteria/National criteria)? Results from the latest monitoring exercise		Several tools have been developed by the SPP national action plan to evaluate and monitor SPP : « éco-responsibility » indicators, administrative audits, studies etc.... The 2008 PM guidelines on « Etat exemplaire » (public authorities leading by example) contains 12 (out of 20) SPP targets. The other targets relate to environmental management, training etc...These guidelines are equipped with a strong monitoring system. Each sectoral target factsheet contains indicators that ministries have to regularly fill in. Every Ministry must report yearly on the progress towards the targets and the indicators. A budget-neutral financial “bonus-malus” (reward-penalty) system is introduced in 2010 to reward the well-performing ministries and penalise the bad ones.

HUNGARY			
POLICY FRAMEWORK	AUTHORITIES IN CHARGE OF GPP POLICY	The Prime Minister's Office is responsible for forming public procurement policy and in this way also for forming sustainable procurement policy. Therefore it prepares draft legislation in this respect.	
	NATIONAL STRATEGY or ACTION PLAN	NAP or National Strategy on GPP in force (Y/N): Period of validity:	
	GPP TARGETS	National level Sub-National level:	
	LINKS WITH OTHER POLICIES (Sustainability, Innovation...)		
MANDATORY RULES ON GPP USE	The fundamental rules of the Hungarian public procurement law are laid down in the Public Procurement Act (Act CXLIII of 2015 on Public Procurement), which is complemented by many implementing regulations. The PPA has been revised in accordance with the new EU directives, and the new piece of legislation came into force on the 1st of November 2015. The new Act however refers "detailed rules pertaining to the award criteria and method with respect to certain subject-matters of public procurement, the determination of cases where there is an obligation to integrate social, in particular employment-related and environmental, sustainability, energy efficiency considerations in the procurement procedures and the methods thereof, including the mandatory application of reserved public procurement" to be stipulated in a separate Government Decree. This decree is currently being drafted by the Prime Minister's Office. The related decrees and the PP Act are available in English here: http://kozbeszerzes.hu/nyelvi-verziok/hungarian-act-on-public-procurement/		
IMPLEMENTATION	WEBSITES	http://kozbeszerzes.hu/jogi-hatter/zold-kozbeszerzes-3/	
	GPP CRITERIA	Are GPP criteria developed at the national level (Y/N)?	
		Are national GPP criteria based on EU GPP criteria? (please specify if to a great, some, small or no extent):	
		For which product groups have national GPP criteria been <u>developed</u> :	For which product groups are GPP criteria currently <u>under development</u> :
		For which product groups are <u>EU GPP criteria</u> recommended:	
	TCO/LCC TOOLS DEVELOPED/USED		
	OTHER INITIATIVES (e.g. Labels, PPI)	Hungarian National Ecolabel (http://www.kornyezetbarat-termek.hu/en/#.VzMXZdKLSUk)	
CAPACITY BUILDING	TRAINING (workshops, conferences, helpdesks, publications, etc.)	The Public Procurement Authority believes that green and socially responsible public procurements are of great importance, therefore it tries to inform stakeholders about these possibilities, current trends in EU legislation and policy in this respect, it organizes trainings, collects green statistics and is involved in green procurement projects (eg. BuySmart+).	
	COOPERATION at national and sub-national level (Platforms, forums, networks, etc.)		
	INTERNATIONAL COOPERATION		

MONITORING

How is monitoring performed? (Automatically, On-line forms, surveys...)

What is monitored (Tenders, contracts, purchases, practices...)?

Who is monitored (central, regional, local authorities)?

Which product groups? Which criteria (EU GPP criteria/National criteria)?

Results from the latest monitoring exercise

The Public Procurement Authority compiles the statistics of Hungarian public procurement procedures based on contract award notices. The national standard form (which is obligatory below the EU thresholds) of the contract award notice includes data fields where contracting authorities can indicate if the procurement has included social and or environmental clauses as contractual clause/ award criteria/ as part of the technical specifications/ as environmental measures within the framework of the selection criteria / as a compliance with environmental management schemes within the framework of the selection criteria. However as EU standard forms do not include such data fields these statistics contain only green procedures launched above national threshold and below EU threshold. In 2015 contracting authorities below the EU threshold used environmental aspects in 9% of their procedures, expressed at valorem 18%.

IRELAND			
POLICY FRAMEWORK	AUTHORITIES IN CHARGE OF GPP POLICY	Department of Public Expenditure and Reform (Office of Government Procurement) Department of the Environment, Community and Local Government (DECLG);	
	NATIONAL STRATEGY or ACTION PLAN	NAP or National Strategy on GPP in force (Y/N): YES Period of validity:	
		A National Action Plan – ‘Green Tenders’ (Jan 2012) has been published by the Department of the Environment, who has the lead role in “greening” procurement across the Irish public sector.	
	GPP TARGETS	National level 50% of procurement by value or 50% by volume Sub-National level:	
LINKS WITH OTHER POLICIES (Sustainability, Innovation...)	‘Our Sustainable Future’ - a government framework for sustainable development proposes full implementation of Ireland's green public procurement national action plan 'Green Tenders' The National Energy Efficiency Action Plan 2009 – 2020 also emphasises the importance of GPP The Draft National Mitigation Plan also makes reference to GPP The regional waste management plans all emphasise GPP and have a specific policy “contribute to the greening of public procurement in local authorities through the inclusion of resource efficient criteria in all tender processes related to waste plan activities”.

ITALY			
POLICY FRAMEWORK	AUTHORITIES IN CHARGE OF GPP POLICY	Ministry of Environment	
	NATIONAL STRATEGY or ACTION PLAN	NAP or National Strategy on GPP in force (Y/N): YES Period of validity: there are no terms of validity.	
		A national action plan on GPP has been adopted by Ministerial Decree of 11th April 2008. The first revision of the NAP has been approved by Ministerial Decree of 10th April 2013: http://www.minambiente.it/pagina/il-piano-dazione-nazionale-il-gpp-pan-gpp The second revision is under consultation	
	GPP TARGETS	National level Under art. 34 of the Legislative Decree 50/2016 on public procurement and concessions, as amended by art. 23 of the Legislative Decree 56/2017, the application of the Minimum Environmental Criteria set within the GPP NAP is mandatory for all kind of contracting authorities, for the whole value of the tender, and also for procurement below the threshold amounts fixed by the Directives on public procurement and concessions.	Sub-National level: The mentioned obligation applies to all kinds of contracting authorities.
LINKS WITH OTHER POLICIES (Sustainability, Innovation...)	Guidelines on social criteria in PP have been adopted by Ministerial Decree of 6 June 2012 and defined within the GPP NAP, referring to a monitoring system on the respect of ILO Conventions along the supply chain. In some MEC PGs under development, social criteria are included.		
MANDATORY RULES ON GPP USE	Under art. 34 of the Legislative Decree 50/2016 on public procurement and concessions, as amended by art. 23 of the Legislative Decree 56/2017, the introduction of at least the technical specifications and the contract clauses of the Minimum Environmental Criteria is obligatory in tender documents, regardless of their value, so also for procurements below the threshold amounts. Also the award criteria must be taken into account when a contracting authority awards the contract with the best quality price ratio. A specific exception is foreseen for renovation, demolitions and rebuilt, contracts.		
IMPLEMENTATION	WEBSITES	National level http://www.minambiente.it/pagina/gpp-acquisti-verdi	Sub-National level: Several local authorities websites have a section dedicated to GPP
	GPP CRITERIA	Are GPP criteria developed at the national level (Y/N)? YES	
		Are national GPP criteria based on EU GPP criteria? (please specify if to a great, some, small or no extent): Yes, EU GPP criteria and Ecolabel criteria are the main reference documents.	
		For which product groups have national GPP criteria been developed: Street lighting (lamps, system, design of street lighting systems), sanitization services for hospitals, office furniture, textiles, construction, renovation and maintenance of buildings, incontinence aids, urban furniture, paper, food and catering, IT (printer and multifunctional device, personal, notebook and tablet computers), energy services for buildings, vehicles, cleaning service and cleaning products, ink jet and toner cartridges, urban waste management, gardening products and service. http://www.minambiente.it/pagina/criteri-vigore	For which product groups are GPP criteria currently under development: Street lighting service; road construction and maintenance; footwear; linen rental and laundry service, public transport service (in the vehicles revision), Managed Print Service (in the printer and multifunctional device revision), events management. Revision of: detergent, cleaning service, ink jet and toner cartridges, IT (personal, notebook and tablet computers), urban waste management, food and catering, energy services for buildings, vehicles, printer and multifunctional device.
	For which product groups are EU GPP criteria recommended:		
TCO/LCC TOOLS DEVELOPED/USED	The LCC methodology set by directive 33/2009/EC for buying, leasing and renting of buses and certain CO2 limits for other vehicle categories, is mandatory.		
OTHER INITIATIVES (e.g. Labels, PPI)	Law 211/2015 provides the development of an environmental label based also on MEC		

	CAPACITY BUILDING	TRAINING (workshops, conferences, helpdesks, publications etc.)	The Ministry of the Environment and Protection of Land and Sea will launch an information and training plan with the support of National Operational Programme on Governance and Institutional Capacity funds, which was recently approved. Events, seminars and workshops on GPP are organised at national and local level. Available also at central level: a website on GPP hosted on the Ministry of Environment's website, a helpdesk service provided by the Ministry of Environment, since December 2015 a monthly newsletter on GPP, a handbook on Minimum Environmental Criteria (Ministry of environment)
		COOPERATION at national and sub-national level (Platforms, forums, networks, etc.)	The Ministry of Environment signed an agreement with Regions to improve training programs and action to facilitate GPP application. Furthermore, another agreement has been signed between metropolitan cities with same scope.
		INTERNATIONAL COOPERATION	Italy is member of several projects on GPP co-financed by EU funds
MONITORING How is monitoring performed? (Automatically, On-line forms, surveys...) What is monitored (Tenders, contracts, purchases, practices...)? Who is monitored (central, regional, local authorities)? Which product groups? Which criteria (EU GPP criteria/National criteria)? Results from the latest monitoring exercise		An electronic monitoring system is in place since 2010 but no useful data were collected by it. Legislative Decree 56/2017 states that the National Anticorruption Authority (ANAC) must monitor the application of Minimum Environmental Criteria. A specific cooperation with National Anticorruption Authority has been proposed by Ministry of environment on this topic.	

LATVIA			
POLICY FRAMEWORK	AUTHORITIES IN CHARGE OF GPP POLICY	Policy: Ministry of Environment protection and regional development, Monitoring: Procurement Monitoring Bureau; Electronic procurement promoter: State Regional Development Agency.	
	NATIONAL STRATEGY or ACTION PLAN	NAP or National Strategy on GPP in force (Y/N): YES Period of validity: indefinite	
		Further Information: Considering that in 2017 the Cabinet of Ministers Regulations No 353 were approved, further implementation of green public procurement (GPP) shall be in accordance with these Cabinet of Ministers Regulation. Ministry of Environmental Protection and Regional Development (MEPRD) of Latvia has developed a Circular Economy Strategy for Latvia, what is currently being agreed between ministries. In this plan is mentioned several activities what affects GPP development. MEPRD has produced a Climate Neutrality Report where one of the tasks is to develop GPP criteria for the production of electricity	
	GPP TARGETS	National level The current regulatory instrument prepared by the Ministry of Environmental Protection and Regional Development – Cabinet of Ministers Regulation on Requirements for Green Public Procurement and Procedures for Application - came into force from 1 st July 2017 and determines the requirements and criteria for GPP and procedures for application. The purpose is to regulate GPP implementation, monitoring and assessment, by determining the products groups and services where application of GPP is mandatory (Annex 1 of the regulation - copying and graphic paper, office IT equipment, office furniture, food and catering services, cleaning products and services, indoor lighting, street lighting and traffic signals). At the same time regulation defines the GPP requirements and criteria for the groups of products, services and works, where GPP application is voluntary (Annex 2 of the regulation). In addition Annex 3 of the regulation defines the Methodology of Life Cycle Costs for Energy Consuming Products. To facilitate the application of regulatory framework implementing guidelines for every products groups and services has been elaborated. On the yearly bases MEPRD submits to the Cabinet of Ministers the report on the implementation of the green public procurement (http://www.varam.gov.lv/lat/darbibas_veidi/zalais_publiskais_iepirkums/?doc=24438)	Sub-National level: Same
	LINKS WITH OTHER POLICIES (Sustainability, Innovation...)	<ul style="list-style-type: none"> • Sustainable Development Strategy of Latvia until 2030 (Latvia 2030), 2010 "Energy efficiency and considerations of the life cycle analysis of products should be included in the criteria of state and local government procurement procedures" • Latvian National Development Plan (Latvia 2020), 2012 "Wider supply of energy-efficient and ecological goods and services in public procurement ("green public procurement")" • Latvian Environmental Policy Strategy for 2014–2020, 2014 "GPP criteria and guidelines have been developed. Contracting authorities and decision makers are aware of GPP approach and availability of green products in the market". 	
MANDATORY RULES ON GPP USE	The Cabinet of Ministers Regulations „Requirements for Green Public Procurement and its application procedure” were approved in 1 st July 2017. Cabinet of Ministers Regulations consists of: 1. Requirements for Green public procurement and its application procedure 2. Responsible authority and its functions 3. Goods and services which apply GPP requirements 4. GPP criteria which apply certain groups of goods and services 5. Methodology of life cycle costs energy consuming goods.		
IMPLEMENTATION	WEBSITES	http://www.varam.gov.lv/eng/darbibas_veidi/green_public_procurement/ , http://www.iub.gov.lv/lv/node/63

MALTA			
POLICY FRAMEWORK	AUTHORITIES IN CHARGE OF GPP POLICY	Ministry for the Environment, Sustainable Development and Climate Change	
	NATIONAL STRATEGY or ACTION PLAN	NAP or National Strategy on GPP in force (Y/N): YES Period of validity: 2018-2020	
		Malta's first NAP was adopted in 2011. In 2015, a review of the NAP was undertaken to assess its implementation to date, which led to the drafting of the 2 nd National Action Plan. The 2 nd NAP is set to come into force.	
	GPP TARGETS	The second NAP is set to be more ambitious in terms of targets but still adopts a realistic and incremental approach. The second NAP puts forward targets for 14 product and service groups, 6 of which are new criteria. However, the NAP aims to go beyond setting higher targets for the forthcoming 3 years, giving a mandatory status to additional product and service groups and introducing GPP criteria for additional sectors within the NAP. The second NAP's prioritisation is to adopt a more comprehensive approach for public procurement procedures. In fact, the plan includes nine new initiatives in order to effectively address this vision; greening other procurement instruments, greening award criteria, pooling of advisory experts, training and constant refresher courses, incentivising local councils through award schemes, greening EU funding, introducing green finance, post procurement auditing and enhancing the role of the GPP coordinator.	Sub-National level:
LINKS WITH OTHER POLICIES (Sustainability, Innovation...)			
MANDATORY RULES ON GPP USE		<ul style="list-style-type: none"> - There is no specific national legislation concerning GPP, however an administrative procedure is in place whereby all contracting authorities are required to complete a GPP checklist prior to tender publication (contract circular N. 5021/2011) - Circular (22/2014) issued in December 2014 outlining the decentralization of administrative responsibilities to all line ministries with respect to GPP. Each ministry has nominated a GPP Coordinator with a remit to ensure that all tenders issued by that ministry are in accord with the national GPP criteria. - Government memorandum was published in September to facilitate the adoption of the GPP administrative function in Local Authorities 	
IMPLEMENTATION	WEBSITES		
	GPP CRITERIA	Are GPP criteria developed at the national level (Y/N)? NO	
		Are national GPP criteria based on EU GPP criteria? (please specify if to a great, some, small or no extent): Yes, Malta's guidelines are based on the EU GPP criteria.	
		For which product groups have national GPP criteria been <u>developed</u> :	For which product groups are GPP criteria currently <u>under development</u> :
		For which product groups are EU GPP criteria recommended: Malta's second NAP sets out targets for 14 product and service groups. These include copying and graphic paper, gardening products and services, computers and monitors, imaging equipment, thermal insulation and wall panels, transport, street lighting and traffic signals, indoor lighting, electric and electronic equipment used in health care, sanitary tapware, toilets and urinals, office building design, construction and management, road design, construction and maintenance. The revised criteria for cleaning products and services, furniture, food and catering services and textiles may also feature in the implementation of the second NAP, depending on the results of the public consultation.	
TCO/LCC TOOLS DEVELOPED/USED			
OTHER INITIATIVES (e.g. Labels, PPI)			

	CAPACITY BUILDING	TRAINING (workshops, conferences, helpdesks, publications etc.)	<p>Training for both procurers and business entities were provided to supplement the first NAP and will again be a significant feature of the 2nd NAP. The 2nd NAP will in fact establish a permanent training programme. A comprehensive training programme was also devised in collaboration with the Institute for Public Services in lieu of the 2nd NAP coming into force. To date, an audience of around 510 representatives of public procurers have been trained.</p> <p>Following the publication of the first NAP, Green Public Procurement was mainstreamed across all ministries through the enactment of a GPP coordinator within each. This resulted in a total of 15 coordinators who screen tenders prior to publication to ensure adequate inclusion of GPP criteria according to the national guidelines. This capacity building exercise in setting up a framework enabled the facilitation of the system to produce more timely and accurate results. This is complimented by other services offered to the contracting authorities and economic operators which include an updated website through which requests can be handled and a GPP helpdesk</p>
		COOPERATION at national and sub-national level (Platforms, forums, networks, etc.)	<p>Inter-Ministerial Task Force (IMTF)</p> <p>The web portal dedicated to GPP will give guidance to procurers and business entities.</p>
		INTERNATIONAL COOPERATION	
MONITORING How is monitoring performed? (Automatically, On-line forms, surveys...) What is monitored (Tenders, contracts, purchases, practices...)? Who is monitored (central, regional, local authorities)? Which product groups? Which criteria (EU GPP criteria/National criteria)? Results from the latest monitoring exercise		<p>Data is collected by means of a GPP report that CAs are obliged to submit on a weekly basis. In addition to this report, MESDC also undertakes a quality assurance exercise that compares the data collected in each ministry GPP weekly report with the tenders published on the EPPS system. This monitoring system collates information on a pre-publication basis and therefore only monitors tenders. In terms of monitoring all entities which fall within the remit of the National Procurement Regulations are monitored</p>

		Are national GPP criteria based on EU GPP criteria? (please specify if to a great, some, small or no extent): ---	
		For which product groups have national GPP criteria been developed:	For which product groups are GPP criteria currently under development:
		-	-
		For which product groups are EU GPP criteria recommended: The Public Procurement Office promotes the overall application on the voluntary basis of EU GPP criteria.	
	TCO/LCC TOOLS DEVELOPED/USED		
OTHER INITIATIVES (e.g. Labels, PPI)	Development of a guidebook on environmental and social aspects in public procurement law as amended in 2016 (2017) Best practices on green and social public procurement (2017)		
CAPACITY BUILDING	TRAINING (workshops, conferences, helpdesks, publications etc.)	A PP training activities, conferences and guidebooks are available to contracting authorities and representatives of audit (control) institutions. The PPO currently carries out 2-year EU funded project called: Effective public procurement - strengthening the capacity of public administration , which encompasses activities on GPP and SPP.	
	COOPERATION at national and sub-national level (Platforms, forums, networks, etc.)		
	INTERNATIONAL COOPERATION		

<p>MONITORING</p> <p>How is monitoring performed? (Automatically, On-line forms, surveys...)</p> <p>What is monitored (Tenders, contracts, purchases, practices...)?</p> <p>Who is monitored (central, regional, local authorities)?</p> <p>Which product groups? Which criteria (EU GPP criteria/National criteria)?</p> <p>Results from the latest monitoring exercise</p>	<p>As regards the GPP monitoring, the Public procurement Office developed in 2016, a new monitoring method which is based on analysis of information delivered by contracting authorities in annual report on awarded contracts. The annual reports on awarded contracts are submitted by all the contracting authorities by means of an online form placed at the Public Procurement Office portal. A new standard form of annual report on awarded contracts, which each and individual contracting authority is obliged to submit to the Public Procurement Office, was adopted in Dec., 2016 by means of a regulation (a secondary legislation to the Public Procurement Law). A special table was added in order to identify all the possibilities of inclusion of environmental aspects as provided for in the 2016 amended Public Procurement Law <u>(all these aspects are stipulated in the 2014 EU PP Directives)</u>. The Public Procurement Office of Poland shall then possess detailed information on all awarded contracts where some environmental considerations were found (in case of contracts awarded in 2016 – the information is narrowed to contracts awarded under 2016 amended Public Procurement Law).</p>

(SPMS, E.P.E.) – Ministry of Health	
	NATIONAL STRATEGY or ACTION PLAN	NAP or National Strategy on GPP in force (Y/N): YES Period of validity: 31.12.2020	
		The national strategy for GPP (ENCPE 2020) was approved by Resolution of the Council of Ministers No. 38/2016 of 29 July. The legal determination to define the forms of implementation and coordination to the achievement of the objectives of ENCPE 2020 was published by Despacho n. 2568/2017 of 28 March 2017.	
	GPP TARGETS	<p>National level For direct and indirect administration: 60% of tendering procedures for procurement of goods and services have to include environmental criteria; 60% of the value of tendering procedures for procurement of goods and services have to include environmental criteria.</p> <p>For business sector of the State: 40% of tendering procedures for procurement of goods and services have to include environmental criteria; 40% of the value of tendering procedures for procurement of goods and services have to include environmental criteria.</p>	Sub-National level:
LINKS WITH OTHER POLICIES (Sustainability, Innovation...)	Commitment for Green Growth (CCV) approved by RCM n. 28/2015		
MANDATORY RULES ON GPP USE		General support from the government as the ENCPE 2020 was adopted by Council of Ministers	
IMPLEMENTATION	WEBSITES	http://www.apambiente.pt/index.php?ref=17&subref=154&sub2ref=242	
	GPP CRITERIA	Are GPP criteria developed at the national level (Y/N)? YES - ENCPE 2020 foresees the definition of environmental criteria for twenty-one priority categories of goods and services.	
		Are national GPP criteria based on EU GPP criteria? (please specify if to a great, some, small or no extent): ENCPE 2020 foresees, to a great extent, the definition of environmental criteria based on the EU guidelines on GPP, and their adaptation to the national reality	
		<p>For which product groups have national GPP criteria been developed:</p>	<p>For which product groups are GPP criteria currently under development: The environmental criteria for twenty-one product groups constitute the main tools for the purposes of meeting the objectives of the ENCPE 2020, and include the following product groups: Cleaning products and services, Copying and graphic paper, Combined heat and power (CHP), Office Buildings, Electrical and electronic equipment in the health care sector, Electricity, Food and catering services, Furniture, Gardening products and services, Imaging equipment, Indoor lighting, Office IT equipment, Road Design, Construction and Maintenance, Sanitary tapware, Street lighting and traffic signals, Textiles, Toilets and urinals, Transport, Wall panels, Waste water infrastructure and Water-based heaters</p>
For which product groups are EU GPP criteria recommended: Cleaning products and services, Copying and graphic paper, Combined heat and power (CHP), Office Buildings, Electrical and electronic equipment in the health care sector, Electricity, Food and catering services, Furniture, Gardening products and services, Imaging equipment, Indoor lighting, Office IT equipment, Road Design, Construction and Maintenance, Sanitary tapware, Street lighting and traffic signals, Textiles, Toilets and urinals, Transport, Wall panels, Waste water infrastructure and Water-based heaters			
TCO/LCC TOOLS DEVELOPED/USED			

	OTHER INITIATIVES (e.g. Labels, PPI)		
	CAPACITY BUILDING	TRAINING (workshops, conferences, helpdesks, publications, etc.)	Usually, there is training / information together with Federal Procurement Agency and other organisations for procurers, decision-makers, representatives of business, suppliers and a national conference for public procurers each year. The ENCPE 2020 foresees: conferences, training actions with the various stakeholders and the creation of computer tools to help improve methods and practices within the GPP.
		COOPERATION at national and sub-national level (Platforms, forums, networks, etc.)	
		INTERNATIONAL COOPERATION	
MONITORING How is monitoring performed? (Automatically, On-line forms, surveys...) What is monitored (Tenders, contracts, purchases, practices...)? Who is monitored (central, regional, local authorities)? Which product groups? Which criteria (EU GPP criteria/National criteria)? Results from the latest monitoring exercise	Monitoring is automatically obtained in Electronic Platforms for Public Procurement. The ENCPE 2020 foresees some indicators to evaluate its implementation: ICPE1 = number of tendering procedures considering environmental criteria × 100 / number of total tendering procedures ICPE2 = value associated with tendering procedures considering environmental criteria established × 100 / value ICPE3 = number of contracts awarded including environmental criteria × 100 / total number of contracts ICPE4 = contract price of contracts including environmental criteria × 100 / contract price of all contracts.

MONITORING

How is monitoring performed? (Automatically, On-line forms, surveys...)

What is monitored (Tenders, contracts, purchases, practices...)?

Who is monitored (central, regional, local authorities)?

Which product groups? Which criteria (EU GPP criteria/National criteria)?

Results from the latest monitoring exercise

Monitoring of all public procurement is performed through the public open portal: <http://www.enarocanje.si/>

Tenders and contracts are being monitored.

All public procurers are being monitored, including national and local governmental institutions for all product groups (CPV codes).

Green criteria can be followed.

The 2018 Decree on GPP states that monitoring of green public procurement should be performed:

(1) On the basis of information on public procurement awarded in the previous year, the Ministry responsible for public procurement shall, by 30 September of the current year at the latest, prepare a statistical report on the award of green public procurement and include it in the statistical report referred to in the third paragraph of Article 107 of the ZJN- 3.

(2) The statistical report on the awarded green public procurement referred to in the preceding paragraph shall contain at least the following information:

- the number and value of green procurement awarded and the proportion of green procurement awarded in relation to the number and value of all public contracts awarded;

- the number and value of the awarded green public procurement and the proportion of green procurement awarded in relation to the number and value of all awarded public contracts, separately broken down into the field of public procurement, the type of public procurement object, the code of the single public procurement vocabulary (CPV), the items referred to in paragraph Article 4 of this Regulation and public procurement procedures;

- the frequency of the methods used to integrate the environmental aspects referred to in the second paragraph of Article 7 of this Decree in the award of green public procurement;

- the number and proportion of subscribers who have awarded at least one green public contract broken down to the subscriber category and the number of subscribers who have awarded at least one public contract but did not award any green public procurement broken down by the subscriber category and the proportion of these subscribers the number of subscribers of the same category who, at that time, awarded at least one public contract;

- the number and value of the awarded green public procurement and the proportion of green public contracts awarded, according to the number and value of all awarded public contracts, broken down by type of procurement subject and providers established in the Republic of Slovenia, another Member State of the European Union and a third country;

- the number of providers established in the Republic of Slovenia, the other EU Member State and the third country to which at least one green public procurement has been awarded, broken down by type of public procurement subject, and the proportion of those tenderers by number of successful tenderers with the same type of object public procurement;

- the number of bidders to whom at least one green public contract has been awarded, broken down by the type of object of the contract and the size of the tenderer, and the proportion of those tenderers according to the number of selected tenderers for the public contract with the same type of object of the contract.

Results of last monitoring (for 2018):

In 2018, public procurer placed 16,865 tenders worth EUR 2,918,594,609. At least one environmental aspect was included in 5771 contracts, representing 34.22% of all contracts awarded this year. The value of these orders is 559,393,716 euros, which represents a 19.17% share.

LAST UPDATE: March 2020

SPAIN				
POLICY FRAMEWORK	AUTHORITIES IN CHARGE OF GPP POLICY	1. General Administration At State level, policy is designed by Inter-ministerial Commission, headed by the Ministry of Agriculture, Food & Environment and the Ministry of Finance and is implemented by all the ministries.	2. Autonomous Communities At regional level, each Autonomous Community (regional government) has capacity to implement and promote GPP by its own	3. Local Entities (Municipalities, Local City and Island Councils, other Local Entities) have the competence to promote GPP
	NATIONAL STRATEGY or ACTION PLAN	NAP or National Strategy on GPP in force (Y/N): YES		Period of validity:
		National level: The Green Public Procurement Plan of the State General Administration and its Public Entities and the Managing Bodies of the Social Security was approved the 21st January 2008 and published in the B.O.E the 31st January 2008. http://www.boe.es/boe/dias/2008/01/31/pdfs/A05706-05710.pdf	Sub-National level: Autonomous Communities Government agreements of some Autonomous Communities to promote GPP (Basque Country, Catalonia,...) Local Entities In Barcelona, for the period 2016-2020, a set of actions have been defined for the consolidation and extension of the "+SCC Programme".	
	GPP TARGETS	National level Levels of green purchase between 25% and 100% depending on the product group and implementation phase. 8 product groups have been included, according to the priority groups of the EU Commission, along with a timescale for achieving specific targets. Targets for consumption reduction and energy mix have also been set	Sub-National level:	
	LINKS WITH OTHER POLICIES (Sustainability, Innovation...)			
MANDATORY RULES ON GPP USE	Barcelona: - 2013 Government Measure and Decree for Responsible Public Procurement with Social and Environmental Criteria - 2015 Decree approving the procedure for implementation of environmental criteria according to the provisions of the 2-13 Decree (Mandatory use of the environmental criteria developed by the Government + sustainable programme).

	GPP CRITERIA	Are GPP criteria developed at the national level (Y/N)? YES		
		Are national GPP criteria based on EU GPP criteria? (please specify if to a great, some, small or no extent):		
		For which product groups have national GPP criteria been developed: Construction and maintenance, energy, transport, office equipment, paper and publications, furniture, cleaning products and services, events.	Sub-National level: In Catalonia, the Government Agreement on Public Procurement is based on the EU GPP criteria GPP criteria development in the Basque Country is based on market consultation of mainly the EU GPP criteria	
For which product groups are EU GPP criteria recommended:				

	TCO/LCC TOOLS DEVELOPED/USED	
	OTHER INITIATIVES (e.g. Labels, PPI)	
	CAPACITY BUILDING	<p>TRAINING (workshops, conferences, helpdesks, publications, etc.)</p> <p>1. General Administration GPP Training is performed by the MoE (with the support of private institutes like Ecoinstitut) for contracting authorities of the different departments from the national government and its public entities. Awareness raising seminars on GPP have been organised by the MoE during 2010 for entities at central, regional and local level A helpdesk has been established by the MoE</p> <p>2. Autonomous Communities Some Autonomous Communities have included specific training courses on GPP in the official training programme of the autonomous schools for public administrations (Basque Country, Catalonia, Canary Islands...). In the Basque Country, Ihobe runs a helpdesk which offers greening of tenders for all basque public administrations. Training of trainers has been carried out in Catalonia and the Basque Country with the support of Ecoinstitut Basque country GPP manual - in Spanish & Euskara (IHOBE Basque Agency for Environmental Management- Basque Government). The guide not only includes green criteria for tenders in line with the EC (for more than 24 products) but also recommends rationalising procurement needs, information for bidders and many Basque good practices. Other guidelines on GPP, have been published in Aragon, Andalucia and other Spanish regions Navarra – Guía contratación pública sostenible; Guía para la Incorporación de criterios sociales</p> <p>3. Local Entities The whole staff of the Environmental Department of the Barcelona City Council has been trained in good environmental practices at work as part of the "+SCC Programme". The City of Madrid published internal GPP Guidelines</p> <p>COOPERATION at national and sub-national level (Platforms, forums, networks, etc.) Networks of local authorities in Catalonia, the Basque Country, Navarra and Andalucia are carrying out awareness raising activities and training on GPP.</p> <p>INTERNATIONAL COOPERATION</p>
MONITORING	<p>How is monitoring performed (Automatically, On-line forms, surveys...)?</p> <p>What is monitored (Tenders, contracts, purchases, practices...)?</p> <p>Who is monitored (central, regional, local authorities)?</p> <p>Which product groups? Which criteria (EU GPP criteria/National criteria)</p> <p>Results from the latest monitoring exercise</p>	<p>1. General Administration A monitoring of the NAP, through a questionnaire, has been conducted during 2010 and 2011. The results of these monitoring are available at: http://www.marm.es/es/ministerio/planes-y-estrategias/plan-de-contratacion-publica-verde/default.aspx. Second report on the State of Green Public Procurement in the General Administration of the State: broad levels of compliance with targets and objectives set in the GPP NAP (2008-2015)</p> <p>2. Autonomous Communities In the Basque Country, an annual monitoring on the state of implementation of the Government agreement is carried out. A specific pilot project based on the EU monitoring study with 7 public administrations was conducted in 2009.</p> <p>3. Local Entities Barcelona is a pioneer city in monitoring its GPP achievements following the main indicators proposed by the CE on its "Collection of statistical information on GPP in the EU". 96% of the expenses and 71% of the tenders of the priority product groups include green criteria (paper, cleaning services, IT equipment, transport, furniture, electricity, food and catering services, textiles and gardening products and services). In addition, some of the economically most important contracts also include environmental clauses, such as the waste collection and urban cleaning services, traffic lights, outdoor lighting or fountain maintenance</p>

POLICY FRAMEWORK	AUTHORITIES IN CHARGE OF GPP POLICY	Ministry of Finance The National Agency for Public Procurement (NAP)
	NATIONAL STRATEGY or ACTION PLAN	NAP or National Strategy on GPP in force (Y/N): YES Period of validity:
		National Public Procurement Strategy (2017), objective 6: Public procurement that is environmentally responsible. The procurement strategy is aimed, above all, at representatives of the central government authorities. The Government also intends to work to ensure that representatives of municipalities and county councils as well as other contracting authorities and entities, adopt governing documents to put the policy objectives and the Government's aims for public procurement into practice within their activities. http://www.government.se/information-material/2017/11/national-public-procurement-strategy/
	GPP TARGETS	National level Sub-National level:
LINKS WITH OTHER POLICIES (Sustainability, Innovation...)	The objective for the National Public Procurement Policy is that all public procurement shall be efficient, legally certain and take advantage of the competition in the market. It shall also promote innovative solutions and take environmental and social concerns into account. Based on its overarching objective, the Government has formulated seven policy objectives for its procurement strategy: 1. Public procurement as a strategic tool for doing good business. 2. Effective public purchasing. 3. A multiplicity of suppliers and well-functioning competition. 4. Legally certain public procurement. 5. Public procurement that drives innovation and promotes alternative solutions. 6. Environmentally responsible, 7. Public procurement that contributes to a socially sustainable society.	
MANDATORY RULES ON GPP USE		
IMPLEMENTATION	WEBSITES	
	GPP CRITERIA	Are GPP criteria developed at the national level (Y/N)? YES
		Are national GPP criteria based on EU GPP criteria? (please specify if to a great, some, small or no extent):
	<p>For which product groups have national GPP criteria been <u>developed</u>:</p> <p>The National Agency for Public Procurement offers recommendations in the form of a criteria library containing recommendations on environmental and social requirements to be used when purchasing goods, services and works. There are three levels of environmental criteria; basic, advanced and spearhead. The criteria are available within the following product groups:</p> <ul style="list-style-type: none"> ▪ IT and Telecom ▪ Building and property ▪ Cleaning and chemicals ▪ Vehicles and transport ▪ Office and textiles 	<p>For which product groups are GPP criteria currently <u>under development</u>:</p> <p>Development:</p> <ul style="list-style-type: none"> • Disposable textiles for health care <p>Revision:</p> <ul style="list-style-type: none"> • Computers and screens, • Pharmaceutical products, • Consumables för health care (medical gloves, infusion sets, tracheal tubes and catheters), • Indoor lightning • Outdoor lightning

	<ul style="list-style-type: none"> ▪ Food ▪ Nursing and care ▪ Toxic-free pre-school <p>The library contains approximately 600 criteria. The criteria are recommendations and all criteria can be used freely. For more information see sustainability criteria.</p>	
	<p>For which product groups are <u>EU GPP criteria</u> recommended:</p> <p>Computers and screens</p>	
TCO/LCC TOOLS DEVELOPED/USED	General LCC tool and LCC-tools on indoor- and outdoor lightning, private cars, professional refrigerator's and freezers, vending- and coffee vending machines and white goods.	
OTHER INITIATIVES (e.g. Labels, PPI)		
CAPACITY BUILDING	TRAINING (workshops, conferences, helpdesks, publications, etc.)	The National Agency for Public Procurement provides general support to contracting authorities, entities and suppliers. The Agency provides support and guidance by telephone and through an online question forum . The NAP arranges conferences, participate in other organizations conferences and produce guideline documents on GPP.
	COOPERATION at national and sub-national level (Platforms, forums, networks, etc.)	Cooperation with other relevant authorities, as well as suppliers, municipalities and county councils in different forms of cooperation
	INTERNATIONAL COOPERATION	Cooperation in SPP Next and Nordic Council of Ministers.
<p>MONITORING</p> <p>How is monitoring performed? (Automatically, On-line forms, surveys...)</p> <p>What is monitored (Tenders, contracts, purchases, practices...)?</p> <p>Who is monitored (central, regional, local authorities)?</p> <p>Which product groups? Which criteria (EU GPP criteria/National criteria)?</p> <p>Results from the latest monitoring exercise</p>		<p>There is no general monitoring of the percentage of public procurement procedures incorporating green criteria out of the whole volume of procurement at national level. However, there are examples of studies limited in scope. For example, the National Agency for Public Procurement has carried out a minor study based on approximately 600 tender documents for 30 selected product groups. The result showed that 90 percent of the tender documents analyzed contained some form of environmental criterion, either criteria from the National Agency for Public Procurement or criteria developed by the contracting authority.</p>

UNITED KINGDOM				
POLICY FRAMEWORK	AUTHORITIES IN CHARGE OF GPP POLICY	Sustainable Procurement policy is developed by the Sustainable Products and Consumers section within Defra, the Department for Environment, Food and Rural Affairs. Overall public procurement policy is developed by the Cabinet Office's Efficiency and Reform Group.		
	NATIONAL STRATEGY or ACTION PLAN	NAP or National Strategy on GPP in force (Y/N): YES		
		Period of validity:		
	GPP TARGETS	National level Greening Government Commitments set out overall policy for central Government on Greening operations and procurement for central Government and related agencies: http://sd.defra.gov.uk/gov/green-government/commitments/ Local Government Sustainable Procurement Strategy: http://www.idea.gov.uk/idk/aio/7643299	Sub-National level: Scottish Government Sustainable Procurement Action Plan: http://www.scotland.gov.uk/Publications/2009/10/sspap Welsh Assembly Government's Procurement Policy: http://wales.gov.uk/topics/improvingservices/better/vfm/smartpurchasing/wob/wagpolicy/?lang=en Northern Ireland's plan: http://www.cpdni.gov.uk/sustainable-procurement-action-plan-ni.pdf	
		National level Embed the Government Buying Standards in departmental and centralised procurement contracts, within the context of Government's overarching priorities of value for money and streamlining procurement processes. Improve and publish data on procurement supply chain impacts, setting detailed targets for reducing these impacts.	Sub-National level:	
LINKS WITH OTHER POLICIES (Sustainability, Innovation...)				
MANDATORY RULES ON GPP USE	The Greening Government Commitments apply to all Government Departments and their related agencies. This is a political and administrative commitment, but not a legal requirement. Where centralised contracts are developed (in which the GBS are embedded), it is mandatory for Departments to use them.			
IMPLEMENTATION	WEBSITES	National level http://sd.defra.gov.uk/gov/green-government/	Sub-National level:	
	GPP CRITERIA	Are GPP criteria developed at the national level (Y/N)? YES		
		Are national GPP criteria based on EU GPP criteria? (please specify if to a great, some, small or no extent):		
		For which product groups have national GPP criteria been developed: They currently cover 12 major products groups: construction, building products, cleaning products, electrical goods, food and catering, furniture, horticulture, office ICT, paper, textiles, transport, and water using products. In all, they cover around 60 products, and include criteria set at 2 levels - 'mandatory minimum' and 'voluntary best practice'. http://sd.defra.gov.uk/advice/public/buying/	For which product groups are GPP criteria currently under development: Revision of GBS/decision tool for transport	
	For which product groups are EU GPP criteria recommended:			
TCO/LCC TOOLS DEVELOPED/USED				
OTHER INITIATIVES (e.g. Labels, PPI)	Central Point of Expertise for Timber has recently conducted an independent review of accreditation schemes.			

	CAPACITY BUILDING	TRAINING (workshops, conferences, helpdesks, publications, etc.)	Defra's National Sustainable Public Procurement Programme (NSPPP) was developed in conjunction with the Marrakech Task Force as part of the UNEP SPP pilot programme. The NSPPP includes training courses, such as Sustainable Procurement, Carbon Literacy and Sustainable Food Procurement. It has been adopted by most of the UK public sector and includes a Train the Trainer programme. For more details see: http://sd.defra.gov.uk/advice/public/nsppp/ Procurement training including sustainability is also provided by the National School of Government (NSG), and Chartered Institute of Purchasing and Supply (CIPS).
		COOPERATION at national and sub-national level (Platforms, forums, networks, etc.)	
		INTERNATIONAL COOPERATION	
MONITORING How is monitoring performed? (Automatically, On-line forms, surveys...) What is monitored (Tenders, contracts, purchases, practices...)? Who is monitored (central, regional, local authorities)? Which product groups? Which criteria (EU GPP criteria/National criteria)? Results from the latest monitoring exercise		Monitoring of compliance with Greening Government Commitments is done by the Cabinet Office through regular surveys which all relevant organisations must complete.

		forums, networks, etc.)	
		INTERNATIONAL COOPERATION	Cooperation in GPP AG, SPP Next and Nordic Council of Ministers.
		MONITORING Who is monitoring performed? (Automatically, On-line forms, surveys...) What is monitored (Tenders, contracts, purchases, practices...)? Who is monitored (central, regional, local authorities)? Which product groups? Which criteria (EU GPP criteria/National criteria)? Results from the latest monitoring exercise	<p>Monitoring of GPP will be an important part of the upcoming national action plan and is planned to be done within prioritised sectors such as transport, construction and buildings, food and meal services, and ICT equipment. Monitoring is planned to be done on four pillars: 1) monitoring of the preconditions for green/sustainable procurements, 2) monitoring of practices, 3) monitoring of environmental and cost effects and 4) monitoring of benefits to society.</p> <p>The first pillar (preconditions) will mainly focus on enterprises' competence, leader focus, goals, budgets, tools, barriers, etc., and will be done using surveys. Digdir sent out a large survey in 2018 which revealed lacking competence among public enterprises. We are currently planning a follow-up survey to be released in 2020.</p> <p>The second pillar (practices) will focus on how procurers work in order to achieve GPP. Monitoring will be done using surveys (e.g. on planning of procurements), online forms where procurers respond if they have used environmental criteria, and automated analysis of tenders to see if they include environmental criteria (e.g. Digdirs criteria) and hopefully an estimate on the level of ambition.</p> <p>The third pillar (effects) will focus on environmental effects (such as emissions) and is planned to be measured using pilot procurements which use Digdirs criteria, and theoretical estimated of effects using the literature. We will develop online calculators which will estimate effects based on what we learn which can be used by procurers to estimate their own effect on purchases. We have currently made two calculators showing the effects on emissions and costs using Digdirs criteria for procurements of cars and vans.</p> <p>The fourth pillar (benefits to society) will focus on how GPP is helping support national climate and environmental goals. This may investigate the effects GPP has on emissions and costs, and put this into the context of national goals, policy and ambitions.</p>
