8.2. Comparability - over time

**Methodological changes between the present reference year and previous year(s). Justification of the important changes in figures reported for the present reference year and previous year(s)**

*No changes in methodological process have occurred, so comparability between years is not affected*

Other quality issues

No

12. Comment

The following classification is used for data availability at Eurostat level:

- The term "not applicable" related to the categories of permits which do not exist in national legislation/administrative procedures and therefore such statistics cannot be issued.
- The term "not available" relates to categories of data that exist in the national legal/administrative system but cannot be delivered under Residence permits statistics data collection for various reasons (e.g. data cannot exist, data exist but are not collected, data are unreliable, etc.).
