

## QUALITY POLICY

### **Vision**

The CSB is a modern statistical institution, leader in the fostering innovation in the production of statistics in Latvia.

### **Mission**

To produce reliable statistics on the socio-economic processes for future decision-making.

To implement quality policy, we base our work culture on the following common **core values**:

#### **Independence.**

We perform our functions independently and objectively.

#### **Professionalism.**

We professionally invest in elaboration and development of international methodological requirements. We introduce new technologies and methodologies into production of statistics. We take advantage of new data sources and advance on experimental statistics. We are committed to reach quality and efficiency in each stage of our work.

#### **Openness.**

We are open in communication with our partners. We are valuable partner in national and international public debate on statistics related issues.

#### **Our priorities are:**

- Delivery of timely and relevant official statistics to meet user expectations and describe society and new economic phenomena.
- Enhancement of cooperation with data providers, data owners and data users for the development of statistics production process.
- Enhancement of professionalism, operational efficiency and quality.
- Advance production of experimental statistics with a view to its sustainability.
- Development of the CSB information systems to ensure full life cycle of statistical data.
- Strengthening the National Statistical System by implementing general quality requirements in statistical institutions of Latvia at a high level.

In our operations **we commit to comply with the requirements** of binding laws and regulations and recommendations of international statistical organizations.

President of the Central Statistical Bureau

Aija Žigūre
