## ZEM28 GENERAL INFORMATION ON THE HOLDING

Has the holding a safety plan (a workplace risk assessment with the aim of reducing the work-related hazards)? [1]

YES  NO  1

Was or became the holding part of an enterprise group in the period October 2019 to September 2020? [2]

YES  NO  2

[1] Occurrence of a usual set of documents in which measures and procedures concerning occupational safety and health at work in order to minimize risks arising from the performance of work in the agricultural holding are defined .

The safety documentation usually includes information on methods and periodicity of training of employees regarding their responsibilities related to safe use of machinery and fertilizer handling in crop production, safety measures for livestock feeding, care and handling, evaluation of safety measures in the company, plans to update safety documents for particular types of production, etc.

[2] An enterprise group is an economic unit consisting of a parent company (controlling entity) and one or more subsidiaries (controlled entities). A parent is an entity that directly or indirectly controls one or more subsidiaries. Entities under common or significant influence (associates) are not controlled by the parent (there is no controlling influence) and therefore are not a part of the group.
