

Annual Earnings 2011 Countries' metadata	
BE	-
BG	<p>Part-time employees are expressed in full-time units.</p> <p>The average gross earnings have grown in 2011 in all sections of NACE Rev. 2. The increase of annual gross earnings in 2011 compared to 2010 in Industry and Services (sections B to S) is 5.7%. The highest increase is in section Information and communication (J) and in section Mining and quarrying (B) – by app. 12% and the lowest is in section Education (P) by 1.4%. The main reasons for these observations are:</p> <p>(1) increase of minimal insurance incomes by economic activities and occupational groups – for many employers these thresholds have the meaning of differentiated minimal wages (http://www.noi.bg/en/content/legislation/SICode.pdf). The average minimal insurance income rose by 5.6% in 2011 compared to 2010;</p> <p>(2) structural changes in employment - decrease of number employees in lower paid occupational groups (ISCO 4, 8, 9) and correspondingly of their relative share in total employment; an increase of employment in higher paid occupational groups (ISCO 1, 2) and an increase of their relative share.</p> <p>Data: http://www.nsi.bg/otrasalen.php?otr=51&a1=2020&a2=2024&a3=2025#cont Metadata: http://www.nsi.bg/otrasal-metodologiaen.php?otr=51&a1=518&a2=520&url=%2Fotrasal-metodologiaen.php%3Fotr%3D51%26a1%3D518%26a2%3D520%23cont Data is not benchmarked on the 4-yearly Structure of Earnings Survey (Council Regulation 530/1999).</p>
CZ	<p>Data are provided for full-time units and for enterprises with 1+ employees.</p> <p>Data is not benchmarked on the 4-yearly Structure of Earnings Survey (Council Regulation 530/1999).</p>
DK	<p>Statistics Denmark does not collect data for enterprises with less than 10 employees. The statistical unit is employees in enterprises with 10+ employees.</p> <p>For the annual updates only employees that have been employed the full year without changes to their job is used. If an employee e.g. changes occupation during the year the employee will not be in the annual update. For this reason the number of employees can differ from year to year.</p> <p>Data: http://www.statbank.dk/17</p>
DE	
EE	<p>Data are provided for enterprises with 1+ employees. Part-time employees are expressed in FTU. Gross annual earnings do not include remuneration in kind. By Estonian legislation the accounting system does not require the calculations remuneration in kind per employee.</p> <p>The data based on national wages and salaries survey.</p> <p>Data is not benchmarked on the 4-yearly Structure of Earnings Survey (Council Regulation 530/1999).</p>

IT	
CY	<p>Average gross annual earnings and Number of employees have been provided for enterprises with 1+ employees only. Data refers to FTU.</p> <p>Until 2010 the Cyprus Results had been extracted from the Wages and Salaries Survey. From 2011 the Wages and Salaries Survey is no longer taking place. Estimation was made based on the Wages and Salaries results, the LCI and the LCS results.</p>
LV	<p>Gross earnings in kind are not included. Compensation for not used annual leave of dismissed employees is included as an irregular payment.</p> <p>In 2011 the labour market figures show economic recovery. The average annual number of employees in FTU in 2011, compared with 2010, increased by 4.1%. Number of employees increased almost in all economical activities. The largest growth was registered in professional, scientific and</p>

	<p>technical activities – by 14.6%, in administrative and support service activities – by 12.4%, in construction – by 11.2%, information and communication - by 10.2% as well as in manufacturing - by 8.1%. The number of employees dropped only in water supply, sewerage, waste management and remediation activities - by 1.6%, in real estate activities - by 0.4% and in financial and insurance activities - by 0.1%.</p> <p>Changes in structure of employees show that number of full-time workers increased by 4%, while part-timers - by 3.2%.</p> <p>Average annual wages and salaries during the year grew by 4,4%, besides almost equally for full-time and part-time workers - accordingly by 4.4% and 4%. The highest increase of average annual wages and salaries among full-timers was registered in real estate activities – by 9.9%, in other service activities – by 9.4% and in water supply, sewerage, waste management and remediation activities – by 7.5%, among part-timers – in professional, scientific and technical activities (by 23.6%), transportation and storage (15%) and financial and insurance activities (12.8%).</p> <p>Data is not benchmarked on the 4-yearly Structure of Earnings Survey (Council Regulation 530/1999).</p> <p>Average monthly gross wages and salaries by two digits of NACE Rev. 2 are published in databases of http://data.csb.gov.lv/Dialog/varval.asp?ma=DS0020a&ti=DS02%2E+AVERAGE+MONTHLY+WAGES+AND+SALARIES+BY+KIND+OF+ACTIVITY+%28in+lats%29&path=../DATABASEEN/ledzsoc/Annual%20statistical%20data/Wages%20and%20salaries/&lang=1</p>
LT	<p>Data is not benchmarked on the 4-yearly Structure of Earnings Survey (Council Regulation 530/1999).</p> <p>Data: http://db1.stat.gov.lt/statbank</p>
LU	-
HU	Data are provided for full-time employees (total, men and women) and part-time employees (only total) for enterprises with 10+ employees.
