1: According to the current reporting form the full time / part time nature of the job cannot be determined, codes 311, 312, 321, 322 are not used.

2: The rate of missing values was 18 percent in 2007. In lack of information on severity of accident in employer's report or additional report, National Labour Inspectorate and National Health Insurance Fund harmonize as much as possible their databases to complete data on days lost once a year.

* The report of accidents at work doesn't include information on the material agent of deviation neither the information on the material agent of contact - mode of injury.

For both of variables the Material Agent of Specific Physical Activity is represented.

3: The methodological department of the statistical office examined the results of the LFS 2007 ad hoc modul on labour accidents and work related health problems and assessed that the data of the LFS module are not eligible for weighting.

be

- 1: Only for employees in the private sector.
- 2: partly (working students and stagiaires without remunerations.)
- 3: Others = domestic workers.

bg

- 1: Bulgarian ESAW data completely exclude the accidents among self-employed, because the self-employed persons are not compulsorily insured for work accidents and occupational disease risks.
- 2: Members of a co-operative, working without any labor contract and receiving remunerations.

cz

- 1: Around one third of self employed persons are insured (only voluntary basis)

de

- 1: Self-employed persons are partly represented because in most branches of industry it is up to the decision of the self employed to be covered (insured) by the system or not.

hu

- 1: Employees of self employed are covered.

pl

- 1: Only for apprenticeship training.
- 2: Only on the basis of the labour contract.

si

*All employers are paying sick-leave benefit to 30 days of absence of employee or self employed. After 30 days compulsory health insurance compensate the payment

Sick-leave benefit is 100% of a salary for accidents at work.

- 1: It is covered only if the employment is on the base of the written contract.

sk

Self-employed, family workers, Students and others are not obligatory covered by accident insurance.

fi

- 1: For self-employed workers the insurance is not obligatory.

For that reason, it is estimated that only some 41-42 % of own-account workers take the insurance.

Thus, only some 40 % of occupational accidents that occur among other own-account workers are reported in Accidents at Work in Finland yearly or in ESAW.

no

- 1: For NACE A family workers are included.

es

- 1: For Agriculture and Fishing sector the coverage is 100 percent. For the rest of economic activities only partly are included, those who have opted for the coverage of accidents at work, paying the appropriate fee.

ee

1: In Estonia accidents at work with self-employed persons are not registered in general. When a self-employed person works at some other employer's by way of subcontract and the other company is responsible for the conditions of work, only then we can consider accidents with self-employed persons as accidents at work.

- 2: In Estonia only these accidents at work are registered by the Labour Inspectorate that have happened to employees with employment contract. If an accident happens to family members with whom official employment contracts have not been concluded, they are not covered by inspection activities by the Labour Inspectorate and the accident is not considered as an accident at work.

* Only employees with employment contracts. Employees with contracts of services and other contracts do not belong here.
