6. Accuracy and reliability														
6.1. Accuracy - overall	<p>6.1.1. Accuracy of the total provided for each dataset</p>													

Categories	The interval in which the real population could be comparing with the total provided 100% = high accuracy (total provided reflects the real measured population)	Details
Seasonal Workers	-	Data not available (no data transmitted)
Intra-Corporate Transfers	100%	No case reported (see above).
Students, Researchers, Trainees, Volunteers, Pupils and Au Pairs	-	Not applicable (no data transmitted)

6.5. Data revision - policy

Data revision policy at national level
Not applicable (no data transmitted until now / no case reported)

8. Coherence and comparability

8.1. Comparability - geographical
 Definitions applied according to the Residence permits technical guidelines

8.2. Comparability - over time

Methodological changes between the present reference year and previous year(s). Justification of the important changes in figures reported for the present reference year and previous year(s)

Not applicable (no data transmitted until now / no case reported)

Other quality issues

Not applicable (no data transmitted until now / no case reported)

12. Comment

The following classification is used for data availability at Eurostat level:

- The term "not applicable" related to the categories of permits which do not exist in national legislation/administrative procedures and therefore such statistics cannot be issued.
- The term "not available" relates to categories of data that exist in the national legal/administrative system but cannot be delivered under Residence permits statistics data collection for various reasons (e.g. data cannot exist, data exist but are not collected, data are unreliable, etc.).
