SMP heading	Activities: [code] title, description, statistical products and/or other outputs	Project/ Process
1	**[436] Coordination of national accounts methodology** Description: Operation of the Directors of Macroeconomic Statistics and National Accounts Working Group. Output(s): • Improved strategic guidelines and national accounts coordination. • Coordination of ESA (European System of Accounts) methodology and other accounting standards between Eurostat NA (National Accounts), GFS (Government Finance Statistics) and other statistical domains.	Process
1	**[EPSAS] European Public Sector Accounting Standards** Description: Harmonisation of public sector accounting standards under the accruals basis of accounting. Output(s): • European Public Sector Accounting Standards (EPSAS).	Process
1	**[MIP] Scoreboard of indicators of the Macroeconomic Imbalance Procedure** Description: Development, improvements, and regular publication of data and news releases concerning the scoreboard of indicators in the context of the Macroeconomic Imbalance Procedure (MIP). Follow up of quality management of MIP indicators (Level 1 report). Product(s): • [MIP] MIP scoreboard.	Process
1	**[MNY] Monetary and other finance statistics** Description: Publication of monetary and financial statistics on the Eurostat web site. Product(s): • [MNY] Monetary and other finance statistics. Other output(s): • Monetary and other financial indicators (including Euro yield curves, interest rates, exchange rates).	Process
1	**[MUFA] Quarterly financial accounts** Description: Processing and dissemination of quarterly financial accounts data from the ECB. Product(s): • [MUFA] Quarterly Financial Accounts. Other output(s): • Quarterly financial accounts indicators.	Process
1	**[NA-Pen] Pension entitlements in social insurance** Description: Processing, validation and dissemination of data on pensions as defined by the European System of Accounts (ESA) 2010. Product(s): • [NA-Pen] Pension entitlements in social insurance. Other output(s): • Three-yearly dissemination of pension entitlements indicators and articles.	Process
1	**[NA-Q] ESA 2010 framework for quality reporting and metadata development** Description: Implementation of horizontal measures and developing statistical infrastructure related to quality reporting and metadata developments under the ESA 2010 Transmission programme. Output(s): • Quality reports on national and regional accounts. • ESA 2010 metadata in line with SIMS 2.0. (SIMS = Single Integrated Metadata Structure).	Process
1	**[NA-Reg] Regional Accounts** Description: Processing, validation and dissemination of European System of Accounts (ESA) 2010 regional accounts data, contribution to publications. Product(s): • [NA-Reg] Regional accounts. Other output(s): • Post COVID-19 crisis measures as appropriate.	Process
1	**[NASA-F] Financial Accounts (financial flows and stocks)** Description: Processing, validation and dissemination of European System of Accounts (ESA) 2010 annual financial accounts data, contribution to publications. Product(s): • [NASA-F] Annual Sector Accounts - financial flows and stocks. Other output(s): • MIP (Macroeconomic Imbalance Procedure) indicators of financial accounts. • Feasibility study for improving the estimation of the European aggregates of Annual Financial Accounts.	Process
1	**[PEEIs] Principal European Economic Indicators** Description: Supply of Principal European Economic Indicators (PEEIs) including publication, quality assessment statistical improvements and analysis of PEEIs with expected monthly or quarterly output. Methodological work to enhance harmonization of PEEIs. Product(s): • [PEEIs] Principal European Economic Indicators. Other output(s): • Economic and Financial Committee status report on information requirements in the Economic and Monetary Union. • Horizontal methodological activities related to PEEIs, revision analysis, methodological papers. • Innovative dissemination tools for PEEIs.	Process
1	**[DNA] Development of a statistical process for Distributional National Accounts** Description: The aim of the project is to establish a statistical process for the production and dissemination of distributional accounts for the household sector (in line with the System of National Accounts update), using micro data from household surveys and from administrative sources. It includes the setting up of automatised validation and dissemination procedures and the relevant IT infrastructure. The project will be accompanied by the establishment of a dedicated Eurostat task force (TF HDA - Task Force Household Distributional Accounts). Further, the project will fulfil international obligations such as contributions to the Data Gap Initiative (DGI), following and contributing to the work on wealth distributions and to the revision of the System of National Accounts, where distributional aspects are on the agenda of the Advisory expert group and its National Accounts´ task team on wellbeing and sustainability. While this project is considered as very innovative and important, establishing a statistical process for this new statistical domain is highly dependent on the availability of appropriate human and IT resources. Product(s): • [NASA] Annual Sector Accounts - non-financial flows and stocks.	Project (2023-2026)

SMP heading	Activities: [code] title, description, statistical products and/or other outputs	Project/ Process
1	**[GPAProd] Labour and capital productivity indicators** Description: Compilation and publication of labour and capital productivity indicators. Possible additional regular indicators based on review and further improvements of experimental statistics (quality adjusted labour indicators QALI and capital services/multifactor productivity). Product(s): • [GPA] Growth and Productivity Accounts.	Process
1	**[NA-MA] National Accounts - quarterly and annual** Description: Processing, validation and dissemination of European System of Accounts (ESA) 2010 quarterly and annual accounts data, regular estimation of European aggregates and contribution to publications. Product(s): • [NAMA] Annual national accounts. • [NAMQ] Quarterly national accounts. Other output(s): • Implementation of revised SDMX templates as part of the revised ESA 2010 TP. • Exploration of feasibility of flash estimate of detailed GVA breakdown at T+45.	Process
1	**[NASA] Non-financial sector accounts** Description: Processing, validation and dissemination of European System of Accounts (ESA) 2010 quarterly and annual non-financial sector accounts data, contribution to publications. Product(s): • [NASA] Annual Sector Accounts - non-financial flows and stocks. • [NASQ] Quarterly Sector Accounts. Other output(s): • Quality analysis of NFSA (non-financial sector accounts) aggregates. • Pilot development of a validation related metadata management system. • Development of quality framework for distributional results of income and consumption and extension of the data collection exercise. • Analysis of estimations of remittances for households.	Process
1	**[457] Monitoring Own Resources GNI** Description: Verification of Gross National Income (GNI) data with Member States and GNI Expert Group, replies to European Court of Auditors reports, support to DG BUDG. Output(s): • Opinion of GNI Expert Group on the appropriateness of GNI data for use as input into DG BUDG's Own Resources calculations.	Process
1	**[458] Monitoring Own Resources VAT** Description: Verification of the Member States' annual statements of their Value Added Tax (VAT) own resource bases, in particular the calculation of the correction for the special flat rate scheme for farmers and of the Weighted Average Rate. Output(s): • Technical advice to DG BUDG on the use of VAT statistics for Own Resources purposes.	Process
1	**[459] Support in National Accounts to Enlargement Countries** Description: Advice to Enlargement Countries concerning their future legal obligations regarding National Accounts. Output(s): • Advice to Enlargement Countries concerning their future legal obligations regarding National Accounts.	Process
1	**[460] Remunerations of EU Staff** Description: Calculation of the statistics needed for the annual and intermediate adaptation of EU officials' salaries and pensions, correction coefficients, mission allowances; Article 64/5 Working Group. Output(s): • Annual adjustment of remuneration of EU officials and correction coefficients (intra-EU and extra-EU) - for Commission and other EU institutions, non-EU bodies; mission allowances. • Annual report on remunerations and appendices.	Process
1	**[461] Pension Scheme European Officials - assessment** Description: Assessment of the Pension Scheme European Officials (PSEO) actuarial balance in accordance with Annex XII of the Staff Regulations; Article 83 Working Group. Annual report on pensions and appendices. Output(s): • Contribution rate of members of staff to the PSEO, coefficients for pension transfer upon request of DG HR.	Process
1	**[462] Liabilities related to social benefit schemes of the personnel of the European Institutions** Description: Calculation of liabilities related to social benefits of personnel of the European Institutions (Pension Scheme European Officials (PSEO) + Pension Scheme of Members of the EU Institutions (PSMI) + Pension Scheme of Members of the European Parliament (PSMEP) + Joint Sickness Insurance Scheme (JSIS). Output(s): • Liabilities of PSEO, PSMI, PSMEP, JSIS.	Process
1	**[COICOP2018] Introduction of COICOP 2018 in the HICP** Description: The COICOP (Classification of Individual Consumption by Purpose) 2018 classification, developed by the United Nations Statistical Division, is expected to replace the utilised ECOICOP (European Classification of Individual Consumption by Purpose) by 2026. Product(s): • [Price-HICP] Harmonised Indices of Consumer Prices. Other output(s): • Algorithm for calculation of back series in COICOP 2018. • Report on NSI readiness and needs for implementation of COICOP 2018.	Project (2021-2026)

SMP heading	Activities: [code] title, description, statistical products and/or other outputs	Project/ Process
1	**[CREI] Development of Commercial Real Estate Indicators** Description: Development of commercial real estate indicators. Output(s): • Development of methodology (manual) and legislation, steering of a task force with Member States and international organisations, setting up pilot data transmissions. The project covers price indices, rent indices, yields and vacancy rates.	Project (2019-2026)
1	**[FPMT] Food Price Monitoring Tool** Description: Further development of statistical information on food supply chains and continued updating of the monitoring tool. Product(s): • [Price-FSCM] Food Price Monitoring Tool. Other output(s): • Monitoring tool.	Process
1	**[HICP] Harmonised Indices of Consumer Prices** Description: Production and dissemination of monthly HICPs (Euro area flash estimate, mid-month estimates, HICP sub-indices and special aggregates, HICP at constant tax rates, HICP administered prices); further development of HICP methodology and guidance; compliance monitoring. Product(s): • [Price-HICP] Harmonised Indices of Consumer Prices. Other output(s): • HICP methodological guidance and recommendations; compliance monitoring reports; manuals. • Methodological research according to the actions of the OOH research agenda.	Process
1	**[HPS] Housing Price Statistics** Description: Compilation of the house price index and the owner-occupied housing price index. Product(s): • [Price-HPS] Housing price indices. Other output(s): • Methodological guidance. • Compliance monitoring reports. • Methodology and test estimates for timelier and more frequent data, incl. from innovative sources, according to the actions of the OOH research agenda.	Process
1	**[PPP(IT)] Purchasing Power Parities - IT part** Description: Maintenance and development of Purchasing Power Parities (PPP) database and tools. Product(s): • [PPP] Purchasing Power Parities. Other output(s): • Improved and maintained PPP IT tools.	Process
1	**[PPP] Purchasing Power Parities** Description: Production and dissemination of purchasing power parities; supervision of price surveys; methodological work; compliance monitoring; International Comparison Programme (ICP) activities. Product(s): • [PPP] Purchasing Power Parities. Other output(s): • Methodological developments. • Compliance monitoring reports. • Contribution to the ICP process.	Process
1	**[970] Full International and Global Accounts for Research in Input-Output Analysis (FIGARO)** Description: Compile and publish full International and Global Accounts for Research in Input-Output Analysis (FIGARO). Product(s): • [EU-ICIO] EU inter-country supply, use and input-output tables. Other output(s): • Annual European inter-country supply, use and input-output tables (EU-IC-SUIOT).	Process
1	**[BoP] Balance of Payments** Description: Processing, validation and dissemination of BPM6 BOP/IIP data, contribution to publications. (BPM6=Balance of Payments and International Investment Position Manual, 6th edition, BoP=Balance of Payments, IIP=international investment position). Product(s): • [BoP] Balance of payments and international investment position. • [MIP] MIP scoreboard. Other output(s): • Draft legal acts. • Balance of Payments (BoP) Vademecum. • BoP Working Group. • Quality reports. • Commission working document to the EP and the Council on data quality. • Methodological development.	Process
1	**[NAIO] Input/Output and supply/use tables** Description: Processing and validation of SUT IOT (supply/use tables and input/output tables) data. Estimation of national data and their aggregation to Euro Area and EU supply/use tables and input/output tables data. Product(s): • [NAIO] Supply, use and Input-Output tables.	Process
1	**[ASA EU prod] Production of the statistical accounts of the institutions and bodies of the EU** Description: Collection of source data, compilation publication of non-financial, financial accounts and Maastricht debt data of EU institutions and bodies. Product(s): • [ASA EU] Annual statistical accounts of EU institutions and bodies.	Process

SMP heading	Activities: [code] title, description, statistical products and/or other outputs	Project/ Process
1	**[EDP(3/3)] Verification of EDP statistics (AT, BG, ES, FR, IE, PL, RO, PT plus RS and UA)** Description: Maintaining on-going direct contacts with selected Member States, candidate countries and potential candidates to ensure a preventive approach for the quality of statistics used for the Excessive Deficit Procedure (EDP), including dialogue visits, and where appropriate, methodological visits. Monitoring of the appropriateness, exhaustiveness and timeliness of the upstream public finance data by reference to European System of Accounts (ESA) requirements, within an Excessive Deficit Procedure, as part of the dialogue visits. Provide timely ex-ante and ex-post methodological advice. Data collection in the context of the requirements of Council Directive 2011/85/EU relating to information on contingent liabilities. Product(s): • [GovD&D] Government deficit and debt. Other output(s): • Excessive Deficit Procedure (e.g., EDP notification tables + "Maastricht debt" + Financial crisis table + RRF (Recovery and Resilience facility) table + table for reporting government interventions to mitigate the impact of high energy prices. • EDP dialogue and methodological visits' reports including final findings and recommendations. • Bi-annual reports to the Economic and Financial Committee on main results of Member States' reporting of government deficit and debt levels. • Annual data release, news release and associated documentation on contingent liabilities and non-performing loans. • Report to the European Parliament and the Council on the quality of fiscal data reported by Member States.	Process
1	**[EDPMeth] Coordination of methodological tasks for EDP** Description: (1) Update of European System of Accounts (ESA) on government sector, of Manual of General Government deficit and debt according to ESA 2010. (2) Preparation of Eurostat decisions, guidance notes and clarifications. (3) Organisation of the Excessive Deficit Procedure (EDP) Statistics Working Group, and relevant task forces. Coordination of the implementation of manuals in all Member States. (4) Organisation of training on Government Finance Statistics (GFS). (5) Coordination of methodology with the National Accounts Directorate in Eurostat and other accounting standards. (6) Coordinating the EDP part of IPA (Instrument for Pre-Accession Assistance) projects and providing guidance to candidate countries and potential candidates (for EDP). Product(s): • [GovD&D] Government deficit and debt. Other output(s): • Methodological work stemming from the updated Manual of Government Deficit and Debt. • Organisation of Task force and Working Group meetings. • Greater knowledge of EDP Statistics in countries, leading to higher and more harmonised EDP/GFS data. In particular, on statistical recording of government interventions to mitigate the economic and social impact due to the increase in energy prices.	Process
1	**[EDPn(3/3)] Validation of EDP notification (AT, BG, ES, FR, IE, PL, RO, PT plus RS and UA)** Description: Verifying the quality of the bi-annual Excessive Deficit Procedure (EDP) notifications sent by selected Member States, preparing the bi-annual EDP data release, Euro indicator release and associated notes and examining notifications of selected candidate countries and potential candidates. Product(s): • [GovD&D] Government deficit and debt. Other output(s): • Bi-annual EDP data release, Euro indicator release and associated notes.	Process
1	**[Gov(IT)] IT for EDP and GFS statistical production** Description: Contribute to continuity of administration, maintenance and technical support for applications and databases used in the EDP (Excessive deficit procedure) and GFS (Government statistics - Financial and non-Financial) related National Accounts statistical production. Continuous support for EDP/GFS related National Accounts Statistical Production Systems and data. Administration and developments related to FAME (Forecasting Analytical Modelling Environment) database domains in the unit in charge and technical support for the related units. Product(s): • [GovA] Annual government finance. • [GovQ] Quarterly government accounts. • [GovD&D] Government deficit and debt. Other output(s): • Technical support for GFS related National Accounts Statistical Production Systems. • Corrective and evolutionary maintenance for GFS related National Accounts Statistical Production Systems.	Process
1	**[Gov] Quarterly and Annual Government statistics - Financial and non-Financial Accounts for general government** Description: Collection, validation and dissemination in Eurobase, in press releases and publications on government finance statistics, for example in Statistical Books and on Statistics Explained. Maintenance of Government Finance Statistics (GFS) web site. Improvement of the quality of GFS data transmitted by Member States. Presentation of regular progress reports to the Excessive Deficit Procedure (EDP) Statistics Working Group meetings, Classification of the Functions of Government (COFOG) and GFS Task Forces. Promotion of the quality and relevance of General Government quarterly accounts. It includes statistics on the annual Structure of Government Debt, European Financial Stability Facility (EFSF) lending and bilateral Intergovernmental lending. Transmission Reports and follow-up. Product(s): • [GovA] Annual government finance. • [GovQ] Quarterly government accounts. • [GovD&D] Government deficit and debt. • [MIP] MIP scoreboard. • [PEEIs] Principal European Economic Indicators. Other output(s): • Progress report on annual and quarterly GFS data transmission and quality issues integrated and regularly presented in EDP Statistics Working Group meetings, in the GFS Task Force and in the COFOG Task Force.	Process

SMP heading	Activities: [code] title, description, statistical products and/or other outputs	Project/ Process
1	**[GovMeth] Coordination of methodological tasks for GFS** Description: (1) Update of remaining relevant Government Finance Statistics (GFS) manuals according to European System of Accounts (ESA) 2010 and publication of GFS interpretations (2) Coordination of GFS methodological issues with Member States where appropriate, in coordination with Excessive Deficit Procedure (EDP) methodological developments (3) Timely organisation of Classification of the Functions of Government (COFOG) Task Force and GFS Task Force, dealing with transmission and methodological issues related to GFS. (4) Provision of advice to Member States. (5) Contribution to GFS training courses. (6) Coordinating the GFS part of IPA (Instrument for Pre-Accession Assistance) projects and providing guidance to candidate countries and potential candidates (for GFS). Product(s): • [GovQ] Quarterly government accounts. • [GovA] Annual government finance. Other output(s): • Methodological issues addressed in GFS Task Force and EDPS Working Group meetings and raised in transmission reports, correspondence with Member States. • Organisation of COFOG and GFS Task Forces. • Contribution to the methodology regarding GFS. • Guidance related to GFS produced, discussed and published where appropriate. • Update and production of methodological manuals and GFS interpretations. • Contribution to GFS training.	Process
1	**[CL&NPL] Data collection in the context of Council Directive 2011/85/EU relating to information on contingent liabilities.** Description: Annual data release, News Item, Statistics Explained and associated documentation on contingent liabilities and non-performing loans. Product(s): • [CL&NPL] Contingent liabilities and non-performing loans.	Process
1	**[EDP(1/3)] Verification of EDP statistics (BE, CZ, CY, DK, HR, IT, LV, PT, SK, SE plus NO, TR, BA, XK and GE)** Description: Maintaining on-going direct contacts with selected Member States, candidate countries and potential candidates to ensure a preventive approach for the quality of statistics used for the Excessive Deficit Procedure (EDP), including dialogue visits, and where appropriate, methodological visits. Monitoring of the appropriateness, exhaustiveness and timeliness of the upstream public finance data by reference to European System of Accounts (ESA) requirements, within an Excessive Deficit Procedure, as part of the dialogue visits. Provide timely ex-ante and ex-post methodological advice. Data collection in the context of the requirements of Council Directive 2011/85/EU relating to information on contingent liabilities. Product(s): • [GovD&D] Government deficit and debt. Other output(s): • Excessive Deficit Procedure (e.g., EDP notification tables + "Maastricht debt" + Financial crisis table + RRF (Recovery and Resilience facility) table + table for reporting government interventions to mitigate the impact of high energy prices. • EDP dialogue and methodological visits' reports including final findings and recommendations. • Bi-annual reports to the Economic and Financial Committee on main results of Member States' reporting of government deficit and debt levels. • Annual data release, news release and associated documentation on contingent liabilities and non-performing loans. • Report to the European Parliament and the Council on the quality of fiscal data reported by Member States.	Process
1	**[EDPn(1/3)] Validation of EDP notification (BE, CZ, CY, DK, HR, IT, LV, PT, SK, SE plus NO, TR, BA, XK and GE)** Description: Verifying the quality of the bi-annual Excessive Deficit Procedure (EDP) notifications sent by selected Member States, preparing the bi-annual EDP data release, Euro indicator release, associated notes and examining notifications of selected candidate countries and potential candidates. Product(s): • [GovD&D] Government deficit and debt. Other output(s): • Bi-annual EDP data release, Euro indicator release and associated notes.	Process
1	**[487] Identifying, assessing and monitoring risks** Description: Organisation of the annual country risk assessment in the framework of Excessive Deficit Procedure. Identifying, assessing and monitoring risks or problems from upstream data sources with a view to initiating corrective action at the earliest possible point (Early Warning System (EWS)). Output(s): • Annual country risk assessment (confidential).	Process
1	**[569] Accounting and statistics** Description: Follow-up of developments in accounting, International Financial Reporting Standard (IFRS) desk, accounting and statistics. Output(s): • Co-ordination of Accounting and Statistics, International Financial Reporting Standard (IFRS) desk.	Process

SMP heading	Activities: [code] title, description, statistical products and/or other outputs	Project/ Process
1	**[EDP(2/3)] Verification of EDP statistics (DE, EE, EL, FI, HU, LT, LU, MT, NL, SI plus IS, CH, UK, ME, AL, MK and MD)** Description: Maintaining on-going direct contacts with selected Member States, candidate countries and potential candidates to ensure a preventive approach for the quality of statistics used for the Excessive Deficit Procedure (EDP), including dialogue visits, and where appropriate, methodological visits. Monitoring of the appropriateness, exhaustiveness and timeliness of the upstream public finance data by reference to European System of Accounts (ESA) requirements, within an Excessive Deficit Procedure, as part of the dialogue visits. Provide timely ex-ante and ex-post methodological advice. Data collection in the context of the requirements of Council Directive 2011/85/EU relating to information on contingent liabilities. Output(s): • Excessive Deficit Procedure (e.g., EDP notification tables + "Maastricht debt" + Financial crisis table + RRF (Recovery and Resilience facility) table + table for reporting government interventions to mitigate the impact of high energy prices. • EDP dialogue and methodological visits' reports including final findings and recommendations. • Bi-annual reports to the Economic and Financial Committee on main results of Member States' reporting of government deficit and debt levels. • Annual data release, news release and associated documentation on contingent liabilities and non-performing loans. • Report to the European Parliament and the Council on the quality of fiscal data reported by Member States.	Process
1	**[EDPn(2/3)] Validation of EDP notification (DE, EE, EL, FI, HU, LT, LU, MT, NL, SI plus IS, CH, UK, ME, AL, MK and MD)** Description: Verifying the quality of the bi-annual Excessive Deficit Procedure (EDP) notifications sent by selected Member States, preparing the bi-annual EDP data release, Euro indicator release, associated notes and examining notifications of selected candidate countries and potential candidates. Output(s): • Bi-annual EDP data release, Euro indicator release and associated notes.	Process
1	**[PlasticOR] Monitoring Own Resource on plastic packaging waste not recycled** Description: Verification of plastic packaging waste data with Member States and Statistics on Plastic Packaging Waste (SPPW) formal expert group, replies to European Court of Auditors reports, support to DG BUDG. Output(s): •Opinion of SPPW formal expert group on the appropriateness of plastic packaging waste data for use as input into DG BUDG´s Own Resource calculations.	Process
1	**[BRs] National Statistical Business Registers** Description: Coordination (methodology), production (collection, processing, validation, analysis, quality and compliance control) of National Statistical Business Registers (NSBRs) data; dissemination of quality and metadata reports; monitoring quality improvements of NSBRs (NACE Rev 2.1 classification, use of new data sources and innovation in NSBRs, etc.). International cooperation in the area of Business Registers. Compliance monitoring and reporting to the European Business Statistics Regulation (EU) 2019/2152. Output(s): • Quality of national statistical business registers assessed. • Compliance to European Business Statistics Regulation (EU) 2019/2152 for national statistical business registers and their data exchanges with EuroGroups Registers monitored. • Dissemination of quality and metadata reports. • Data quality and compliance reported to the Statistical Business Registers Working Group and Business Statistics Directors Group.	Process
1	**[EGRdev] Development of the EuroGroups Register** Description: Business analysis and specification of additional EGR functionalities to implement the EGR two-tier quality management (top tier for large MNEs and bulk tier for the rest); profiling on the structure of the top tier MNEs; automation for the bulk tier MNEs; improved technologies, opensource data; new (Business Intelligence) data platform for data visualisation and dissemination. Product(s): • [EGR] EGR statistical frame of microdata and statistics. Other output(s): • New and additional functionalities of the EGR, for higher quality and timeliness of top MNEs and more frequent updates; • EGR able to process and integrate new data sources; • Improved accessibility of EGR and data visualization; • Increased number of EGR users and dissemination products.	Project (2020-2025)
1	**[EGRops] Supporting the EGR and IPT operations** Description: EGR (EuroGroups Register) and IPT (Interactive Profiling Tool) operations being performed in the integration versions. Product(s): • [EGR] EGR statistical frame of microdata and statistics. Other output(s): • European profiling and EGRintegrated operations supported. • EGR product management and evolutive maintenance of the systems ensured.	Process
1	**[EGRprod] EuroGroups Register - production and dissemination** Description: EGR data exchanges, production, validation and dissemination of microdata file, and experimental statistics (Eurobase tables and Statistics Explained articles). Product(s): • [EGR] EGR statistical frame of microdata and statistics. Other output(s): • EGR data exchanged and validated to ensure quality. • EGR annual frame released timely and made available to the EGR users. • Experimental statistics calculated and published on Eurobase and Statistics explained articles.	Process

SMP heading	Activities: [code] title, description, statistical products and/or other outputs	Project/ Process
1	**[GLOBE] Globalisation: MNEs in business statistics -Profiling, Statistical Units, Early Warning System and Large Cases Units** Description: Coordinating the quality and consistency work of national Large Case Units on MNEs data in business statistics; steer the cooperation across countries on MNEs related issues, via the European Network of MNE coordinators. Manage the European Profiling Programme and the Early Warning System to keep high quality data on MNEs in EGR and in business statistics. Product(s): • [EGR] EGR statistical frame of microdata and statistics. Other output(s): • Assistance for the implementation of the definition of Statistical Units. • Coordinating the European Profiling Programme. • Leading the European Network of MNE coordinators to ensure a systematic approach to MNE related activities and cooperation on data consistency related work. • Profiling methodology for delineating enterprises, to better understanding the MNE activities and their impact on business statistics and improving business statistics. • Organisation of workshops, European Statistical Training System (ESTP) courses. • Coordination of the Early Warning System. • Assistance in the creation of LCUs.	Process
1	**[CLASS] Classifications for international trade statistics and management tools for classifications regarding goods** Description: Updating and maintenance of the Combined Nomenclature and the Geonomenclature for trade in goods statistics. Management tool for classifications related to goods. Output(s): • Classifications for international trade in goods statistics up to date. • Evolutive maintenance / preparation of platform migration of the NOmenclature MANagement app (NOMAN). • Management tool for PRODCOM list.	Process
1	**[MDE/CDE] International trade in goods statistics micro-data exchange (MDE) and customs data exchange (CDE)** Description: Micro-data exchange (MDE) related to intra-EU trade in goods statistics and customs data exchange (CDE) related to extra-EU trade in goods statistics, according to the European Business Statistics Regulation 2019/2152. Output(s): Micro-data collected by Member States provided to the other Member States through a hub provided by Eurostat.	Process
1	**[EBS] STEC, GVC and MoS** Description: Development (methodology) production (collection, processing, validation, analysis, quality and compliance control) and timely dissemination of Services Trade by Enterprise Characteristics, Modes of Supply and Global Value Chains. Product(s): • [STEC] Services trade by enterprise characteristics. • [GVC-IS] International sourcing. • [MoS] International supply of services by Modes of Supply.	Process
1	**[FATS] Foreign affiliates statistics** Description: Development (methodology) production (collection, processing, validation, analysis, quality and compliance control) and timely dissemination of Foreign Affiliates statistics. Product(s): • [FATS] Foreign affiliates of EU enterprises.	Process
1	**[FDI] Foreign direct investment statistics** Description: Development (methodology) production (collection, processing, validation, analysis, quality and compliance control) and timely dissemination of Foreign Direct Investment statistics. Maintenance and development of the Foreign Direct Investment Network, including the work to reduce asymmetries. Product(s): • [FDI] Foreign direct investments. Other output(s): • Structured approach to reduce asymmetries.	Process
1	**[GVC2] Globalisation - Trade statistics - ITSS and GVC** Description: Developing activities related to globalisation and international trade statistics. In particular, actions related to developing a statistical framework model for global value chains (GVC) and the further development of existing statistics on international trade in goods (ITGS) and services (ITSS). Product(s): • [GVC-Ind] Globalisation indicators. • [GVC-IS] International sourcing. • [IntServ] International trade in services. • [STEC] Services trade by enterprise characteristics. Other output(s): • Experimental statistics on international trade in services by modes of supply. • Experimental statistics on GVC and international trade (STEC and BEC). • Methodological development in the classification of services. • Manual on global value chains.	Project (2020-2025)
1	**[MDL] IT system to process and publish MDL statistics** Description: IT tool to process and publish new microdata linking indicators that will be developed together with Member States. Product(s): • [GVC-Ind] Globalisation indicators.	Project (2024-2029)
1, 2	**[434] Improvement of national accounts methodology** Description: Development of methodology and methodological advice at Eurostat, EU and international level, with respect to System of National Accounts (SNA) 2008 and European System of Accounts (ESA) 2010. Output(s): • Methodological guidance and manuals.	Process

SMP heading	Activities: [code] title, description, statistical products and/or other outputs	Project/ Process
1, 2	**[CREI-STS] Short-term commercial real estate indicators** Description: Methodological development (including pilots) in order to set up new short-term indicators for commercial real estate (CREI) (building starts, work completions and vacancy rates). Product(s): • [STS-Co] Short-term business statistics - construction. Other output(s): • New CREIs as experimental statistics based on voluntary data collection. • Progress on legal basis for the mandatory transmission of certain STS CREIs.	Project (2019-2026)
1, 2	**[ITGS] International Trade in Goods Statistics** Description: Development (methodology), production (collection, processing, validation, analysis, quality and compliance control) and timely dissemination of international trade in goods statistics. Product(s): • [IntGood] International trade in goods. • [TEC] Trade in goods by enterprise characteristics. • [TIC] Trade in goods by invoicing currency. Other output(s): • Production of PEEI 'International trade in goods balance'. • Production processes further improved. • Up to date methodological framework available.	Process
1, 2	**[ITSS] International trade in services statistics** Description: Development (methodology) production (collection, processing, validation, analysis, quality and compliance control) and timely dissemination of International Trade in Services statistics, including the work to reduce asymmetries. Product(s): • [IntServ] International trade in services. Other output(s): • Structured approach to reduce asymmetries.	Process
2	**[BD] Business Demography Statistics** Description: Development (methodology), production (collection, processing, validation, quality and compliance control) and timely dissemination of annual business demography (BD) statistics. Product(s): • [BD] Business demography.	Process
2	**[CIS] Innovation statistics** Description: Development (methodology), production (collection, processing, validation, analysis, quality and compliance control) and timely dissemination of biennial Community Innovation Survey; Implementation of the Oslo (Innovation) manual. Product(s): • [CIS] Innovation. Other output(s): • Exploring possibilities for deriving new SBS indicators, e.g., through micro data linking.	Process
2	**[CollEcon] Collaborative Economy** Description: Collecting data from platforms with a view to compile and disseminate data on collaborative economy as experimental statistics and, subsequently, integration into regular statistics. Product(s): • [TourAcc] Tourism industry - accommodations. Other output(s): • Methodological guidelines on Measurement of the Collaborative Economy. • Experimental statistics on short-term accommodation. • Integration with other sources.	Project (2019-2025)
2	**[SBS] Structural Business Statistics** Description: Development (methodology), production (collection, processing, validation, quality and compliance control) and timely dissemination of annual Structural Business Statistics. Product(s): • [SBS] Structural Business Statistics. Other output(s): • Exploring possibilities for deriving new SBS indicators, e.g. through micro data linking or modelling, related to Blue Economy, Defence, Space, etc. Inclusion of new performance indicators calculated by Eurostat.	Process
2	**[TOUR] Tourism statistics** Description: Development (methodology), production (collection, processing, validation, quality and compliance control) and timely dissemination of monthly and annual tourism statistics. Product(s): • [TourAcc] Tourism industry - accommodations. • [TourEco] Tourism industry - economic dimension. • [TourTrip] Trips of EU residents. Other output(s): • Implementation of improved geographical granularity of accommodation statistics.• Continued development of tourism satellite accounts. • Development of indicators on sustainability of tourism.	Process

SMP heading	Activities: [code] title, description, statistical products and/or other outputs	Project/ Process
2	**[BTS-STRATEGY] Operationalisation of the strategy on European business and trade statistics** Description: Operationalisation of the Directorate's strategy on business and trade statistics by e.g. organising the Business Statistics Directors Group meetings, harmonising metadata, quality reporting and data transmission, coordination of the updating of methodological manuals and ensuring the continuing relevance of business and trade statistics. Facilitation and monitoring of the implementation of the European Business Statistics Regulation including the compliance reporting using as much as possible automated processes. Enhanced dissemination of European business and trade statistics. Coordination of the planning and the reporting for the business and trade statistics activities as well as of the answers to consultations at the Directorate level. Output(s): • BSDG and BSDG-SDG meetings organised. • Coordination of the updating of the Directorate's methodological manuals. • Coordination of the work programme for business and trade statistics ensuring their continuing relevance. • Facilitating the Directorate's use of modern dissemination tools. • Improved promotion of and communication to users of business statistics e.g. by enhanced story telling. • Harmonisation of the metadata and quality reporting and the data transmission standards for business and trade statistics. • Harmonisation of the compliance monitoring and reporting as well as coordination of the automation of this process (such as SDMX compliant data exchange standards and use of corporate IT tools such as Input Hall (CONVAL and STRUVAL). • Promote further improvement of the quality of business and trade statistics and burden reduction by for instance integration and improvement of production processes, IT tools and similar support functions at national level.	Process
2	**[PRODCOM] Statistics on industrial production** Description: Development (methodology) production (collection, processing, validation, analysis, quality and compliance control) and timely dissemination of industrial production statistics (PRODCOM). Product(s): • [PRODCOM] Production of manufactured goods. Other output(s): • Ensuring the continuing relevance of the PRODCOM list. • Investigating possibilities to enhance data availability for monitoring supply chain distress. • Updating PRODCOM methodology if needed. • Disseminating more PRODCOM data, e.g. on circular economy. • Preparing the introduction of reviewed NACE/CPA in the PRODCOM list and also preparing the PRODCOM production system.	Process
2	**[DIGITAL] Digitalisation** Description: Coordination and implementation of the action plan for better measuring digitalisation, aiming to publish relevant statistics to measure the impact of digitalisation in business, society and economy, including at regional level, and aiming to support the implementation of the Digital Decade. Coordination at Eurostat level of the initiative. Product(s): • [ISocICT] ICT sector and ICT skills. Other output(s): • Relevant statistics on digitalisation, including those relevant to measure the Digital Decade, experimental statistics on online job advertisement and a digitalisation dashboard.	Process
2	**[ISoc] ICT Statistics** Description: Development (methodology), production (collection, processing, validation, analysis, quality and compliance control) and timely dissemination of statistics on the information society, including at regional level: • ICT usage in households and by individuals, • ICT usage and e-commerce in enterprises. Production (compilation, processing) and dissemination of secondary statistics related to ICT, i.e. output of ICT producing industries, employment in the ICT sector, demand and employment of ICT skilled personnel, etc. This process supports the policies under the Digital Decade, the ICT statistics being the basis for measuring digitalisation. (ICT = Information and Communication Technologies). Product(s): • [ISocEnt] Information society - enterprises. • [ISocHI] Information society - households and individuals. • [ISocICT] ICT sector and ICT skills. Other output(s): • Adoption of a Commission regulation implementing Regulation (EU) 2019/2152 of the European Parliament and of the Council (EBS) and Commission implementing and delegated regulations for the Regulation (EU) 2019/1700 of the European Parliament and of the Council (IESS). • Development of the model questionnaires for the use of ICT in enterprises and in households and by individuals.	Process
2	**[R&D] Science and technology** Description: Development (methodology), production (collection, processing, validation, analysis, quality and compliance control) and timely dissemination of R&D (Research and Development) statistics, High-Tech statistics, Patent and Human Resources in Science and Technology statistics, European Research Area (input in the ERA scoreboard and dashboards); Implementation of the 2015 Frascati (R&D) manual. Product(s): • [R&D] Research and Development. • [HRST+HTec] High tech industry, KIS, HR in S&T and IPR statistics. Other output(s): • Implementation of new methodology and appropriate quality measures in Member States in the area of R&D statistics. •Update of the methodological manuals and new publications.	Process

SMP heading	Activities: [code] title, description, statistical products and/or other outputs	Project/ Process
2, 1	**[STS] Short-term business statistics** Description: Development (methodology) production (collection, processing, validation, analysis, quality and compliance control) and timely dissemination of short-term business statistics. Product(s): • [STS-Co] Short-term business statistics - construction. • [STS-In] Short-term business statistics - industry. • [STS-TS] Short-term business statistics - trade and services. • [STS-BD] Short-term business demography. Other output(s): • Timely dissemination of five monthly news releases and all data disseminated including voluntary data series. • Update of all relevant Statistics Explained articles. • Development of methodology for early estimates of short-term indicators.	Process
3	**[CROSSCUT] Transversal social statistics and indicators** Description: Production and dissemination of transversal social statistics and indicators under the remit of F1. Support to further development of these data sets. Product(s): • [Culture] Culture. • [Sport] Sport. • [SocRights] European Pillar of Social Rights. • [EU-SILC2022] Health; Quality of life. • [QoL] Quality of life. • [Youth] Youth. Other output(s): • Methodological papers. • Statistical publications.	Process
3	**[EQUALITY] Improvement of European equality statistics** Description: The objective of this activity is to develop and implement in collaboration with national statistical institutes and other stakeholders an action plan to improve equality statistics to support European policies to combat discrimination and enhance equality.. Output(s): Report of the dedicated equality task force at the end of 2026.	Project (2023-2026)
3	**[FEIPI] Flash estimates on income and poverty indicators** Description: Producing and disseminating annual income distribution flash estimates; further developing the methodology. Product(s): • [EU-SILC] Income and living conditions. Other output(s): • Methodological documents. • Statistics Explained articles.	Process
3	**[ICW] Distribution of income, consumption and wealth** Description: Producing and disseminating statistics on the joint distribution of income, consumption and wealth; further developing the methodology. Product(s): • [ICW] Distribution of income, consumption and wealth. Other output(s): • Methodological documents. • Statistics Explained articles.	Process
3	**[PopProj] Population projections** Description: Population Projections 2023 exercise production preparation: in line with the procedures, publication of EU, national and regional population projections. Development of methodology and publication of short-term annual updates. Product(s): • [PopProj] Population projections. Other output(s): • Methodological documents.	Process
3	**[SocStat27] Social statistics strategy 2027** Description: The project aims at building on the recent achievements of modernising social statistics, taking stock of the current situation, the new and evolving needs, in a strategic manner for social statistics. At this stage, several directions have been identified, linked to the evolution of the survey-based data, the improvement of the population and census data, better information on labour market business-based data, long term care information. This project will evolve over time, in order to adapt to the new needs, on the basis of an initial integrated strategy. Output(s): • Strategic guidelines for development of social statistics.	Project (2022-2027)
3	**[AdEvMigr] Asylum, Managed Migration & Migrant Integration** Description: Data collections: (1) Asylum and temporary protection. (2) Enforcement of immigration legislation. (3) Residence permits. (4) Dublin statistics. (5) Indicators on migrants' integration. Product(s): • [MngdMigr] Asylum & Managed Migration. Other output(s): • Methodological advice in support of data collections: definitions and data. • Support to the European Migration Network (EMN) and actions on the Pact on Migration and Asylum, including migrant integration and inclusion. • Improvement of methodology, harmonisation and expanding the use of data sources. • Pilot studies for new statistics. • Improvement of the quality of return statistics and reducing discrepancies between Eurostat and Frontex data; measuring the efficiency of the return system.	Process
3	**[AMM-Pilots] Pilot studies for new asylum and managed migration statistics** Description: Development of new statistics on asylum and managed migration in line with Article 9a, Regulation (EC) 862/2007. This includes study and access to EU level data sources and implementing pilot studies with Member States. Product(s): • [MngdMigr] Asylum & Managed Migration. Other output(s): • Reports concerning Union level data sources and national pilot studies.	Project (2021-2026)
3	**[DemoMigr] Demography & migration** Description: Data collections: (1) URESPOP Usual Residence Population data collection. (2) DEMOBAL Demographic Balance data collection. (3) NOWCAST Demographic data collection. (4) POPSTAT Demographic data collection. (5) Weekly deaths statistics and monthly excess mortality. Product(s): • [DemoMigr] Demography and migration. Other output(s): • Improvement of the methodology, harmonisation and data publication.	Process

SMP heading	Activities: [code] title, description, statistical products and/or other outputs	Project/ Process
3	**[ESOP] Redevelopment of European population statistics beyond 2021** Description: Modernising and integrating demographic, migration and census statistics which are currently organised in several separate data collections of different periodicities and under different legal bases. This includes conducting evaluation, impact assessment, consultations, developing a legislative proposal and implementing the adopted new legislation. Product(s): • [DemoMigr] Demography and migration. • [PopCens] Population and Housing Census. Other output(s): • Framework regulation and related delegated and implementing acts. • Methodological guidance.	Project (2021-2026)
3	**[ESOP-IT] IT environment for European statistics on population and housing** Description: The project will ensure the IT implementation of the new framework for European statistics on population and housing. Product(s): • [DemoMigr] Demography and migration. • [PopCens] Population and Housing Census. Other output(s): • Redesign or update of Eurostat's production and dissemination environment for European statistics on population and housing.	Project (2023-2026)
3	**[PopCens] Population and housing censuses 2021 & 2031** Description: (1) Support to the national implementations of the 2021 census on the basis of the implementing acts based on the European Parliament and Council regulation 763/2008 on population and housing censuses and Temporary Statistical Action implementing regulation for 1 sq. km grid data for the 2021 round of censuses. (2) Early activities for the preparation for Population and housing census 2031. Product(s): • [PopCens] Population and Housing Census. Other output(s): • Methodological advice and harmonisation. • Support actions to Member States. • High quality data and information available to users. • Final report on the implementation of the 2021 census. • Contributions to the international work on the 2031 population and housing census.	Process
3	**[AL] Adult Learning** Description: Methodological work, collection, validation and dissemination of data from surveys on education and training (adult and continuing learning - AES every 6 years and CVTS every 5 years); Use of data on education and training from the EU-LFS for annual dissemination - including policy indicators; new adult learning (AL) over the past 12 months, 2030 target indicator of the EPSR; Further methodological support to countries for the implementation of the new adult learning variables in the EU-LFS. Product(s): • [Educ-CVTS] Continuing Vocational Training Survey. • [Educ-LFS] Education and training policy indicators. • [Educ-AES] Adult learning*. Other output(s): • Implementation of 2020 Continuing Vocational Training Survey (CVTS) & 2022 Adult Education Survey (AES); • Further dissemination of results of the 2020 CVTS and 2022 AES.	Process
3	**[Gender] Gender statistics** Description: Provision and dissemination of statistics broken down by sex as well as analysis on gender related aspects. Gender and discrimination statistics do not necessarily entail the collection of additional statistics from existing surveys but rather make full use of existing data to illustrate possible gaps e.g. between men and women. The sets of indicators by sex and age which are published by Eurostat use data from the following surveys: EU-SILC (EU statistics on income and living conditions), EU-LFS (Labour Force Survey), SES (Structure of Earnings Survey) and EHIS (European Health Interview Survey). Focus on Gender Pay Gap 2022 from SES, including adjusted Gender Pay Gap. Product(s): • [Gender] Gender discrimination.	Process
3	**[LFS+Unempl] Labour Force Survey and monthly unemployment rates** Description: Collection, processing, dissemination and quality-assurance of LFS data under regulation 2019/1700; including transmission of data to the ECB. Dissemination of micro data for research purposes. Transmission of monthly unemployment data also based on regulation 2019/1700. Product(s): • [EmplUnempl] Employment and unemployment. • [Une] Unemployment rates. Other output(s): • Seasonally adjusted main labour market indicators. • Monthly unemployment rate (seasonally adjusted). • Delivery of indicators for the European Pillar of Social Rights and other high-level dashboards / scoreboards. • EU LFS special tabulations on request from other DGs and Agencies, including transmission to ECB. • Labour market dynamics and transitions and other labour market indicators. • Variance estimation for scoreboard indicators.• Global Conference on Measuring New Forms of Employment.	Process
3	**[850] Innovative sources and tools for HBS and TUS** Description: Development of innovative sources and tools for living conditions surveys. New technologies can be used at the level of collection of survey data from households and individuals using modern IT tools, smart devices and eTechnologies, to facilitate it and minimise the survey costs. The modernisation shall also relate to direct data collection directly from new sources such as administrative or Big Data including privately owned microdata. The modernisation for HBS (Household Budget Survey) and TUS (Time Use Survey) is foreseen in Regulation 2019/1700. Product(s): • [HBS] Household consumption expenditure. • [TUS] Time use. Other output(s): Pilot testing for large-scale use of innovative tools to be used for the HBS 2026 wave to be implemented under regulation 2019/1700.	Project (2017-2025)

SMP heading	Activities: [code] title, description, statistical products and/or other outputs	Project/ Process
3	**[EHIS] European Health interview survey** Description: Implementation at national level of the EHIS 2025 wave under Delegated Regulation (EU) 2024/297 and Implementing regulation (EU) 2023/2529. Development work with the countries on data collection for people not living in private households (call for pilot/feasibility studies to be launched in 2026, implementation in 2027). Product(s): • [Health-EHIS] Health. Other output(s): •development of methodological documents related to the work on people not living in private households. • updated dissemination of statistics on disability with additional data becoming available.	Process
3	**[EU-SILC] Income and living conditions statistics, including ad hoc modules – collection, dissemination, quality assurance, methodology and analysis of SILC data under regulation 2019/1700** Description: Preparation and dissemination of EU-SILC data and EU quality report. Analysis and publications (Statistics Explained). Every 2-year development of the ad hoc modules under regulation 2019/1700, including the legal basis. (EU-SILC = Statistics on Income and Living Conditions, IESS = Integrated European Social Statistics). Product(s): • [EU-SILC] Income and living conditions. • [EU-SILC2022] Health; Quality of life. • [EU-SILC2023] Labour and housing; Energy efficiency. • [EU-SILC2024] Children; Access to services. • [EU-SILC2025] Health; Energy and environment. • [EU-SILC2026] Labour and housing; Over indebtedness consumption and wealth. • [EU-SILC2027] Children; Mental wellbeing. Other output(s): • Statistics Explained. • Preparation and assessment of annual ad hoc modules. • Papers. • Feasibility and implementation of a web-service for NSIs to run remotely on Eurostat servers our validation SAS programs and automatically receive the corresponding validation reports.	Process
3	**[HBS] Household Budget Survey** Description: • Follow up the implementation of new tools in national data collection. • Preparatory work for the implementation of the HBS 2026 wave following adoption of implementing regulation (EU) 2022/2529 and delegated regulation (EU) 2023/126 in the consumption domain. Product(s): • [HBS] Household consumption expenditure.	Process
3	**[TUS] Time Use Survey** Description: • Follow up the implementation of the 2020 wave; Preparing data reception, validation and dissemination; Dissemination of TUS 2020 microdata for researchers. • Follow up the implementation of new tools in national data collection. • methodological work to capture unpaid work (revision of the ACL coding list of activities). •development of HETUS light instrument. • update of methodological supporting documents for 2030 (HETUS Guidelines). • Development and production of indicators for 2020 and 2030 (preparation of indicators manual). Product(s): • [TUS] Time use.	Process
3	**[128] Developing statistics on health - health care non-expenditure, morbidity and occupational diseases** Description: Developing health statistics based on administrative sources within the framework regulation 1338/2008 on public health and health and safety at work statistics. Output(s): • Occupational diseases: development of an improved pilot data collection European Occupational Diseases Statistics (EODS). Development of dissemination tables and country profiles.	Project (2013-2025)
3	**[EDUCATION] Education and training statistics** Description: Collection, validation and dissemination of annual education and training data based on administrative sources (UOE data collection). Methodological work. (UOE=The administrative data collection on education and training systems, jointly managed by the UNESCO Institute for Statistics, the OECD and Eurostat). Product(s): • [Educ-UOE] Education and training. Other output(s): • Methodological guidelines. Maintenance, interpretation and update of the UOE manual. • Quality of national statistics assessed. Dissemination of quality and metadata reports. • Maintenance and update of the legal basis, compliance monitoring for Member States, for candidate countries and potential candidates. • Enhanced dissemination of data and indicators, other publications.. • Evolutive maintenance of the production system ensured. Activities related with Information Technology for the databases. • Organisation of technical expert group meetings and production of related documents. • Internal training, training for national data producers. • Coordination of the other institutions (OECD and UNESCO-UIS) involved in the data collection.	Process

SMP heading	Activities: [code] title, description, statistical products and/or other outputs	Project/ Process
3	**[ESSPROS] Social protection statistics** Description: Collection, validation and dissemination of annual data on social protection based on administrative sources. Methodological work. Product(s): • [ESSPROS] Social protection. Other output(s): • Methodological guidelines. Maintenance, interpretation and update of statistical manuals. • Quality of national statistics assessed. Dissemination of quality and metadata reports. • Maintenance and update of the legal basis, compliance monitoring for Member States, for candidate countries and potential candidates. • Enhanced dissemination of data and indicators, other publications. • Evolutive maintenance of the production system ensured. Activities related with Information Technology for the databases. • Organisation of technical expert group meetings and production of related documents. • Internal training, training for national data producers.	Process
3	**[HEALTH-exp] Health statistics - expenditure** Description: Collection, validation and dissemination of annual healthcare expenditure data based on administrative sources. It is an annual data collection based on the Joint health accounts questionnaire (JHAQ) that countries submit to Eurostat (JHAQ is jointly managed with OECD and WHO). Methodological work. Product(s): • [Health-CARE] Health care. Other output(s): • Methodological guidelines. Maintenance, interpretation and update of statistical manuals. • Quality of national statistics assessed. Dissemination of quality and metadata reports. • Maintenance and update of the legal basis, compliance monitoring for Member States, for candidate countries and for potential candidates. • Enhanced dissemination of data and indicators, other publications.. • Evolutive maintenance of the production system ensured. Activities related with Information Technology for the databases. • Organisation of technical expert group meetings and production of related documents. • Internal training, training for national data producers. • Coordination of the other institutions (OECD and WHO) involved in the JHAQ data collection.	Process
3	**[HEALTH-nonexp] Health statistics - Public health (non-expenditure) and Occupational health** Description: Collection, validation and dissemination of data. It includes annual data based on administrative sources (Public Health: Health care non expenditure data and Causes of Death data). It also includes annual data collection on Accidents at work. Product(s): • [COD] Causes of death. • [Health-ESAW] Health and safety at work. • [Health-CARE] Health care. Other output(s): • Methodological guidelines. Maintenance, interpretation and update of statistical manuals. • Quality of national statistics assessed. Dissemination of quality and metadata reports. • Maintenance and update of the legal basis, compliance monitoring. • Enhanced dissemination of data and indicators, other publications. • Evolutive maintenance of the production system ensured. Activities related with Information Technology for the databases. • Organisation of technical expert group meetings and production of related documents. • Internal training, training for national data producers. • Coordination of the other institutions (OECD and WHO) involved in the data collection..	Process
3	**[LTC] Development of Long-term Care statistics** Description: Develop a conceptual framework and recommendations on the way forward for creating a data collection on long-term care statistics, also supporting to the possible extent the monitoring of the Council Recommendation on access to high quality and affordable LTC. Product(s): • [Health-CARE] Health care. Other output(s): Support the methodological developments of long-term care statistics via a dedicated task force.	Project (2022-2025)
3	**[UBR+EE] Improve timeliness and scope of social protection data** Description: Collection, validation and dissemination of early estimates for social protection expenditure and data for number of beneficiaries beyond pensioners. Methodological work and voluntary new data collections. Introduction of an ESS Agreement for ESSPROS early estimates. Output(s): •Methodological documents. •Voluntary data collections. •Implementation of ESS Agreement.	Project (2021-2026)
3, 1	**[977] Modernisation of Labour Market statistics based on Businesses (LMB)** Description: Modernise all Labour Market statistics based on Businesses, including job vacancies (JVS), Structure of Earnings Survey (SES), Gender Pay Gap, Labour Costs Index (LCI) and Labour Costs Survey (LCS) and develop a new legal framework; Develop experimental JVS statistics by ISCO and NUTS using administrative and innovative sources. Product(s): • [Gender] Gender discrimination. • [JVS] Job vacancies. • [LC] Labour costs. • [Earn] Earnings. Other output(s): Framework regulation and first related secondary acts.	Project (2021-2026)

SMP heading	Activities: [code] title, description, statistical products and/or other outputs	Project/ Process
3, 1	**[Labour] Statistics on labour costs (labour cost survey and labour cost index) and earnings; job vacancies; minimum wages** Description: Collection, processing, dissemination and quality assurance of Labour Cost Index, Labour Cost Survey, Structure of Earnings Survey, Annual net earnings, Job Vacancy Statistics, Minimum Wages data. Adoption of the reports to the EP and the Council on the implementation of the regulations on the labour cost index and of Job Vacancy Statistics. Preparation of the implementation of the LMB Framework Regulation including adaptation of IT production chains. Product(s): • [Earn] Earnings. • [JVS] Job vacancies. • [LC] Labour costs. • [PEEIs] Principal European Economic Indicators. Other output(s): • Quarterly dissemination of the PEEIs JVS and LCI, publication of the results of the Structure of Earnings Survey (SES) 2022 and follow-up with MS the implementation of the Labour Costs Survey (LCS) 2024.	Process
3, 2	**[LFS-Mod] Statistics from the Labour Force Survey ad hoc modules** Description: • 2021 module on labour market situation of migrants: EU results disseminated. • 2022 ad hoc subject on job skills: EU results disseminated. • 2023 regular module on pension and labour market situation: dissemination of EU results. • 2024 regular module on young people: implementation at national level. • 2025 regular module on reconciliation of work and family life: preparation at national level. • 2026 ad hoc subject module on digital platform employment: adoption of Regulations. Product(s): • [LFS21Mig] Labour market situation of migrants 2021. • [LFS22Ski] Job Skills 2022. • [LFS23Pens+LM] Pension and labour market situation 2023. • [LFS24YoungP] Young people on the labour market 2024. • [LFS25Rec] Reconciliation of work and family life 2025. Other output(s): • Dissemination of results from LFS modules. • Results of the 2024 data on pension and young people on the labour market published.	Process
3, 5	**[Crime] Crime and criminal justice; gender-based violence** Description: • Police-recorded crime, prosecution, court and prison statistics, police numbers: joint collection with UNODC, validation and dissemination of data (and associated meta-data), including data on victims of violent crime broken down by sex. Technical advice to policy DG as required. • Statistics on trafficking in human beings, migrants smuggling and cybercrime; • Promotion of the ICCS (UN international crime classification for statistical purpose). • Develop a regular gender-based violence survey to respond to policy needs(UNODC=United Nations Office on Drugs and Crime). Product(s): • [Crime] Crime and criminal justice. Other output(s): • Joint data collection with UNODC. • Implementation of the new international classification of crimes for statistics ICCS of UNODC. • Technical advice to policy DG, if required. • GBV survey data collection and dissemination.	Process
4	**[AAct] Economic Accounts for Agriculture** Description: Collection, validation, production and dissemination of data and metadata. Coordination of process improvement; creation of templates for data exchange; addition of pre-validation rules. Continuous process improvement using corporate IT tools. Product(s): • [AAct] Economic accounts for agriculture. Other output(s): Project expanding the Economic accounts for agriculture.	Process
4	**[APri] Agricultural Prices and Indices** Description: Collection, validation, production and dissemination of data and metadata. Coordination of process improvement; creation of templates for data exchange; addition of pre-validation rules. Continuous process improvement using corporate IT tools. Product(s): • [APri] Prices of agricultural products (input and output). • [APriInd] Agricultural price indices. • [AgriPR] Prices and rents of agricultural land. Other output(s): • Updated Handbooks and other methodological outputs. • First year of SAIO compliant statistics.	Process
4	**[APro] Animal production statistics** Description: Collection, validation, production and dissemination of data and metadata. Coordination of process improvement; creation of templates for data exchange; addition of pre-validation rules. Continuous process improvement using corporate IT tools. Development of implementing regulation for quality reporting under SAIO Regulation. Product(s): • [AProMe] Animal production - meat. • [AProPo] Animal production - poultry. • [AProMi] Milk, milk products and dairies structure. • [OrgFarm] Organic farming. Other output(s): • Updated Handbooks. •First year of SAIO compliant statistics.	Process
4	**[Crop] Crop statistics** Description: Collection, validation, production and dissemination of data and metadata. Coordination of process improvement; creation of templates for data exchange; addition of pre-validation rules. Continuous process improvement using corporate IT tools. Product(s): • [Crop] Crop production. • [CropBal] Crop balances. Other output(s): • Updated Handbook. • First year of SAIO-compliant statistics.	Process

SMP heading	Activities: [code] title, description, statistical products and/or other outputs	Project/ Process
4	**[Fish] Fisheries statistics** Description: Collection, validation, production and dissemination of data and metadata. Coordination of process improvement; creation of templates for data exchange; addition of pre-validation rules. Continuous process improvement using corporate IT tools.. Product(s): • [FishCatch] Catches by fishing area. • [FishFleet] Fishing fleet. • [Aqua] Aquaculture. • [FishLand] Landing of fishery products. • [OrgFarm] Organic farming.	Process
4	**[FishSimpl] Streamlining and simplification of European fishery statistics** Description: Streamlining and simplification of fisheries statistics legal basis and data collection. Output(s): • Preparatory work for future update of the legal base. • Commission proposal for European Fisheries and Aquaculture Statistics. • Legal negotiations start.	Project (2017-2025)
4	**[IFS] Integrated farm statistics** Description: Collection, validation, production and dissemination of data and metadata. Coordination of process improvement; creation of templates for data exchange; addition of pre-validation rules. Continuous process improvement using corporate IT tools. Product(s): • [FSS] Structure of agricultural holdings. • [IFS] Integrated farm statistics (core). • [IFS_IR] Integrated farm statistics (irrigation). • [IFS_LF] Integrated farm statistics (Labour force). • [IFS_MA] Integrated farm statistics (machinery). • [IFS_ORCH] Integrated farm statistics (orchards). • [IFS_RD] Integrated farm statistics (rural development). • [IFS_SM] Integrated farm statistics (soil management). • [IFS_AH] Integrated farm statistics (animals and manure). • [IFS_VIN] Integrated farm statistics (vineyards). Other output(s): • Handbook for IFS 2026.	Process
4	**[IFS2030] Integrated Farm Statistics Regulation 2030 and beyond** Description: Set-up of the legal basis for Integrated Farm Statistics (IFS) data collection for 2030-2040. Streamline and update the IFS data collection. Output(s): Preparatory work for future update of the legal base.	Project (2024-2028)
4	**[NutrientStat] Nutrient statistics** Description: Collection, validation, production, dissemination of data and metadata. Continuous quality review on data, including historical time series. Coordination of process improvement; creation of templates for data exchange; addition of pre-validation rules. Continuous process improvement using corporate IT tools. Development of implementing regulation for nutrients under SAIO Regulation. Product(s): • [Fertilizers] Fertilizers. • [GNB] Gross Nutrient Balances. Other output(s): • New handbook. • Preparation of IT system for SAIO-compliant nutrient statistics.	Process
4	**[PlantPP] Plant protection product statistics** Description: Collection, validation, production, dissemination of data and metadata. Continuous quality review on data, including historical time series. Coordination of process improvement; creation of templates for data exchange; addition of pre-validation rules. Continuous process improvement using corporate IT tools. Development of the second implementing regulation for plant protection products under SAIO Regulation. Product(s): • [PlantProtect] Plant Protection Products sales and use in agriculture. • [AEI] Agro-environment. Other output(s): • Coordination role according to Memorandum of Understanding on agro-environmental-climate and health indicators (EC services involved: Eurostat, DG AGRI, DG CLIMA, DG ENV, DG SANTE, JRC and EEA). • Harmonised risk indicators for pesticides (HRIs 1 and 2) and 2 Farm to Fork pesticides indicators. • Implementing regulation as regards statistics on plant protection products (after transitional period) under SAIO regulation.	Process
4	**[EnvCircEco] Circular economy indicators** Description: Develop and maintain the circular economy indicator set and its metadata to support the monitoring of policies on circular economy and contributing to the European Green Deal. Maintain the set of indicators to monitor the effectiveness of the EU chemicals policy. Develop and update the diagram on material flows. Product(s): • [CircEco] Circular economy indicators. • [ChemInd] Chemical indicators. Other output(s): • Dedicated section on circular economy monitoring.	Process
4	**[EnvClimChange] Climate change related statistics and indicators** Description: Promote the use of official statistics for climate change information purposes with SE articles and one dedicated section about climate change information. Output(s): • Maintain and further develop a data hub with links to relevant statistics and indicators. • Support the CES (Conference of European Statisticians) initiative on climate change related statistics.	Process

SMP heading	Activities: [code] title, description, statistical products and/or other outputs	Project/ Process
4	**[EnvDirCoord] DIMESA secretariat, coordination and cooperation activities at Eurostat, EU and international level** Description: Secretariat of the directors' group on sectoral and environmental statistics and accounts (DIMESA). Contribute to the environmental knowledge community, involving several Commission DGs and the European Environment Agency. Contribute to international handbooks related to the System of Environmental Economic Accounts (SEEA). Output(s): • DIMESA planning and follow up (secretariat). • Assistance to DG ENV in the context of the environmental knowledge community. • International handbooks related to the System of Environmental Economic Accounts (SEEA).	Process
4	**[EnvKIP] Assistance on ecosystem accounts** Description: Assistance to DG ENV on ecosystem accounts including to support the 2030 Biodiversity Strategy and the European Green Deal. Product(s): • [BioDivInd] Biodiversity indicators. Other output(s): • Service to DG ENV: assistance on ecosystem accounts and biodiversity indicators.	Process
4	**[EnvMonAcc] Monetary environmental accounts** Description: Collect and disseminate environmental goods and services sector accounts, environmental taxes and environmental protection expenditure accounts including estimates for the main EU aggregates. Product(s): • [EGSS] Environmental goods and services sector accounts. • [EnvTax] Environmental taxes. • [EPEA] Environmental protection expenditure accounts. • [ESST] Environmental subsidies and similar transfers accounts. Other output(s): • Service to DG FISMA and ESCB: technical advice on sustainable and climate finance.	Process
4	**[EnvPhysAcc] Physical environmental accounts** Description: Collect and disseminate air emissions accounts, physical energy flow accounts and material flow accounts data including estimates for main EU aggregates. Compile and disseminate consumption-based accounts (footprints) for air emissions, energy use, material extraction, and land use. Compile and disseminate quarterly greenhouse gas emissions accounts. Product(s): • [AirEmAcc] Air emissions accounts. • [PEFA] Physical energy flow accounts. • [MFA] Material flow accounts. • [ClimChange] Climate change. • [CircEco] Circular economy indicators. Other output(s): • Service to DG ENV: technical advice on material flow accounts.	Process
4	**[EnvWaste] Waste statistics** Description: Collect and disseminate data on: generation and treatment of waste (Regulation EC No 2150/2002); municipal waste; transboundary waste shipments (Regulation (EC) No 1013/2006); waste electrical and electronic equipment; packaging waste; end-of-life vehicles; construction and demolition waste; waste batteries and accumulators; food waste. Maintain and further improve the quality of indicators on waste management and recycling. Product(s): • [Waste] Waste statistics. • [RegEnv] Regional environment. • [CircEco] Circular economy indicators. Other output(s): • Dedicated section on waste statistics. • Service to DG ENV: collect, validate and disseminate data on transboundary shipment of waste. • Service to DG ENV: collect, validate and disseminate data on generation and management of different waste streams.	Process
4	**[EnvWat] Water statistics and accounts** Description: Collect and disseminate water statistics. Product(s): • [Water] Water statistics and accounts. • [RegEnv] Regional environment.	Process
4	**[ForStAcc] Forestry statistics and accounts** Description: Collect and disseminate forestry statistics and accounts. Product(s): • [Forest] Forestry statistics and accounts. Other output(s): • Dedicated section on forestry.	Process
4	**[INCA(IT)] Maintenance of the information system on ecosystem accounting (INCA landing page)** Description: Assistance to DG JRC for maintaining and hosting an information system on ecosystem accounts. Product(s): • [BioDivInd] Biodiversity indicators. Other output(s): • Operational information system for the public on ecosystem accounting. • Service to DG JRC: Assistance on maintaining and hosting an information system on ecosystem accounts.	Process
4	**[SDI] Sustainable development indicators and European Green Deal indicators** Description: Maintain and further develop the set of indicators to monitor progress towards the sustainable development goals (SDGs) in an EU context, progress towards the European Green Deal as well as any future European growth strategy in cooperation with other services and Member States. Prepare analyses and dissemination products for the main users. Maintain the relevant sets of indicators on the Eurostat website. Contribute to the development of indicators to measure the SDGs at global level. Product(s): • [SDI] Sustainable development indicators. Other output(s): • SDI dedicated section. • Annually revised EU SDG indicator set. • Monitoring report on sustainable development in the EU. • Overview brochure on sustainable development in the EU. • Digital publication on sustainable development in the EU. • Input for the European Semester. • Dedicated products to monitor progress towards the European Green Deal.	Process

SMP heading	Activities: [code] title, description, statistical products and/or other outputs	Project/ Process
4	**[926] Common Questionnaire on inland transport statistics (Eurostat/ITF/UNECE)** Description: Manage the common questionnaire on inland transport statistics in collaboration with International Transport Forum (ITF) and UNECE. The indicators collected with the Common Questionnaire will be streamlined to reduce reporting burden and include new topics of relevance to the European Green Deal. Product(s): • [Tran-Road] Road transport. • [Tran-IWW] Inland waterway transport. • [Tran-Rail] Rail transport.	Process
4	**[Avia] Air transport statistics** Description: Annual/quarterly/monthly data collection on the carriage of passengers, freight and mail by commercial air services as well as on civil aircraft movements to or from Community airports, based on Regulation (EC) No 437/2003 of the European Parliament and of the Council, including regional and infrastructure statistics. The regular dissemination of aviation statistics by distance class will be established. The production of timely indicators on commercial flights for the European Statistical Recovery Scoreboard from innovative data sources will be pursued to evaluate recovery from the COVID-19 crisis. Product(s): • [Tran-Avia] Air transport.	Process
4	**[IWW] Inland WaterWay transport statistics** Description: Annual/quarterly data collection (goods transported by type, transport by nationality and type of vessels, vessel traffic) on inland waterway freight transport, based on Regulation (EU) 2018/974 of the European Parliament and of the Council on statistics of goods transport by inland waterways, including infrastructure and regional data statistics. Methodological work to develop passengers' statistics and data collection with pilot surveys. Product(s): • [Tran-IWW] Inland waterway transport.	Process
4	**[Mar] Maritime transport statistics** Description: Annual/quarterly data collection (carriage of goods and passengers by sea) on maritime transport statistics, based on Directive 2009/42/EC of the European Parliament and of the Council and Regulation (EU) 1090/2010, including regional statistics. Besides the currently produced statistics, Eurostat will continue the exploratory work on possible use of administrative data for maritime statistics in collaboration with the Member States and the development of experimental statistics on early estimates of maritime traffic based on AIS data, in cooperation with the European Maritime Safety Agency. Product(s): • [Tran-Mar] Maritime transport.	Process
4	**[Rail] Rail transport statistics** Description: Quinquennial/annual/quarterly data collection (goods and passengers) on rail transport, based on Regulation (EU) 2018/643 of the European Parliament and of the Council, including regional and infrastructure statistics. Dissemination of statistics on safety and interoperability of the railway network. Product(s): • [Tran-Rail] Rail transport.	Process
4	**[Road] Road transport statistics** Description: Freight transport: quarterly/annual data collection (vehicle, journey and goods -related data) on road freight transport, based on Regulation (EU) 70/2012 of the European Parliament and of the Council, including regional and infrastructure statistics. Develop methodology and launch pilot data collection on statistics on Light Utility Vehicles (LUV). Product(s): • [Tran-Road] Road transport.	Process
4	**[TranInd] Indicators and development of new transport statistics** Description: Modal split indicators (the relative share of each individual mode in the total transport performance measured in tonne kilometre and passenger kilometre); Intermodal transport statistics, including logistic indicators; Transport safety - accident data by transport mode; including the dissemination of more granular data on road accidents; Development of methodology and new transport indicators on traffic and mobility on the basis of Eurostat statistics and data from other trusted or innovative sources. Such indicators will also regard new and emerging means of transport (e.g. drones, e-bikes, bicycles). Product(s): • [Tran-Ind] Transport indicators.	Process
4	**[LUCAS] Land use and land cover statistics** Description: Preparation and carrying out of the regular Land use and land cover statistics (LUCAS) Survey. Collecting, processing and dissemination of European data on land use and land cover; by assessing and collecting available data in countries and by taking into account the need for harmonisation of these data and by co-operating with Commission DG, the European Economic Area, other international bodies and Member States. Develop a long-term strategy for land use land cover statistics. Integrate statistics, administrative sources and geospatial data for land use land cover information. Product(s): • [LUCAS] Land cover and use, landscape. Other output(s): • LUCAS in-situ micro data (including photos) on land-cover/land use, soil samples, land-cover/land use, detailed data for specific modules, e.g. grassland, landscape features and LUCAS for Copernicus.	Process

SMP heading	Activities: [code] title, description, statistical products and/or other outputs	Project/ Process
4	**[751] Supporting the Energy Union and the European Green Deal** Description: Compile data and provide services to facilitate the monitoring of progress towards the Green Deal and the Energy Union objectives. Support DG ENER - and DG CLIMA and DG ENV where appropriate - in proposing, evaluating and reviewing legal acts with monitoring requirements. Support DG ENER, DG CLIMA and DG ENV in implementing the 'Fit for 55' and the REPowerEU legal packages, notably the Regulation on the Governance of the Energy Union and Climate Action (in particular as regards its reporting requirements) and the legal acts with statistical implications, such as the Renewable Energy Directive and the Energy Efficiency Directive; where needed, adapt and complement energy statistics and its methodology. Support priority areas and their data needs such as on energy security (in particular, after the Russian invasion of Ukraine) or energy poverty. Follow up and contribute to other legal acts with implications for energy statistical reporting (e.g. Regulation on gas storage or gas-demand reduction, as well as Oil Stocks Directive). Contribute to conceptual and methodological developments of statistical indicators to monitor energy policies. Disseminate statistical information related to the Energy Union, the Green Deal, the Fit for 55 and the RePowerEU, including through high visibility publications. Output(s): • Contribute to DG ENER's State of the Energy Union report, country factsheets, SWD key indicators and other similar indicators.• Support DG ENER and DG CLIMA in implementing requirements related to statistical data in relation to the Regulation on the Governance of the Energy Union and Climate Action and related legislation, notably the National Energy and Climate Plans and Progress Reports.• Support the conceptual and methodological development of statistical data to design and monitor Energy Union objectives. • Disseminate statistical information related to the Energy Union, the Green Deal, the Fit for 55 and the REPowerEU.	Project (2016-2027)
4	**[77] Energy prices - natural gas and electricity; competition indicators** Description: Collect, validate, produce and disseminate natural gas and electricity prices according to Regulation (EU) No 2016/1952; produce and disseminate energy market statistics. Reports on compliance monitoring and quality assurance, propose amendment of Regulation (EU) 2016/1952 and its implementing act, user support output. Product(s): • [NRG-Price] Energy prices.	Process
4	**[919] Europe 2030 - energy indicators** Description: Produce indicators to support and monitor the Europe 2030 targets (energy efficiency and share of renewable energy); produce early estimates of CO2 emission to contribute to monitoring the greenhouse gas emission target. Manage the statistical methodology for Europe 2030 energy indicators. Product(s): • [NRG-DE] Energy dependence and efficiency. • [NRG-RES] Share of energy from renewable sources. • [CO2] CO2 emission estimates from fossil fuel combustion.	Process
4	**[920] Energy statistics - quantities** Description: Collect, validate and disseminate annual and monthly energy statistics data on solid fossil fuels, oil, natural gas, renewables and waste, nuclear energy, electricity and heat in accordance with Regulation (EC) No 1099/2008 on energy statistics (ESR) and its last amendment (Commission Regulation (EU) 2022/132). Collect, validate and disseminate data on new data collections, such as final energy consumption in services, for transport activities and in data centres, as European statistics (on basis of the amended ESR). Entry into force of the 7th amendment of Regulation (EC) No 1099/2008 on energy statistics. Produce energy policy indicators such as import dependency, energy security. Produce energy balances and prepare energy balance sheets. Republish indicators developed and produced by other Commission services (for example: heating and cooling degree-days from JRC). Publish reports on compliance monitoring and quality assurance. Update 'Statistics Explained' articles and other publications. Product(s): • [NRG] Energy. • [NRG-BS] Energy balance sheets. • [NRG-DE] Energy dependence and efficiency. • [HDD+CDD] Heating degree days and Cooling degree days. • [CO2] CO2 emission estimates from fossil fuel combustion. • [NRG-RES] Share of energy from renewable sources.	Process
4	**[922] Improving timeliness of energy statistics to support the Energy Union** Description: In view of the Russian invasion of Ukraine to collect monthly gas and (partial) monthly oil statistics before the legal deadline on a voluntary basis. Support DG ENER in collecting data for coordinated demand reduction measures for natural gas at T+15 days deadline. Assess the results of pilot projects launched in 2020 to encourage reporting before the mandatory deadline. Assess the feasibility of implementing the methodology developed by the contract aiming at using monthly data for nowcasting of energy balances. Collect, produce and disseminate early estimates of energy balances; analyse their accuracy. Continue developing a methodology for estimating the consumption side of energy balances and key indicators. Product(s): • [NRG] Energy. • [NRG-BS] Energy balance sheets. • [NRG-DE] Energy dependence and efficiency. • [NRG-RES] Share of energy from renewable sources. Other output(s): • Test, produce and improve year-0 estimates for the supply side of energy balances and key indicators (tender completion and publication of results). • Publish methodological manual for early estimates of energy balances and key indicators.	Project (2019-2027)

SMP heading	Activities: [code] title, description, statistical products and/or other outputs	Project/ Process
4, 6	**[923] Improving accessibility and clarity of energy statistics** Description: Maintain, improve and adapt visualisation tools for energy statistics using the deliverables of the respective contract. Assess the results of the contracts on tapping new data sources, including from ACER, ENTSO-E and ENTSO-G, administrative data or from big data sources. Launch a call for grants to support countries in improving their systems to collect and process data, including from new data sources such as administrative data or big data. Output(s): • Prepare and follow up contract on visualisation tools for energy statistics. • Facilitate the reporting of annual energy statistics by considerably simplifying the questionnaire used by the NSI. •Decomposition analysis of energy consumption.	Project (2019-2026)
5	**[EO4NS] Earth observation for statistics** Description: Investigate the opportunities offered by Earth observation tools and techniques to facilitate, complement or improve statistical production processes. Output(s): • Test cases for the use of earth observation data for statistical purposes.	Process
5	**[GISCO(IT)] GISCO geographical information system - IT part** Description: IT part of the operation and maintenance of the Geographic Information System as well as related tools and services in Eurostat including further development of the technical system and related tools; Provision of GIS (Geographical Information System) tools. Development of ad hoc IT programs for the different GISCO services. Product(s): • [GISCO] Demographic data at geospatial grid level. Other output(s): • Technically improved tools for the operation and further development of GISCO services. • Maintenance of the Commission internal Geoportal. • Design and evolutive maintenance of the distance calculation tool for transport statistics. • Design and evolutive maintenance of the tool for the creation of statistical and thematic maps.	Process
5	**[GISCO] GISCO geographical information system** Description: Operation and evolutive maintenance of the Geographic Information System as well as related tools and services in Eurostat; - Procurement, processing and dissemination of reference geographic datasets for statistical and policy purposes in Eurostat and the Commission. - Production of statistical and thematic maps based on extractions from statistical databases. - Design and provision of GIS (Geographical Information System) tools. Product(s): • [GISCO] Demographic data at geospatial grid level. Other output(s): • Geospatial reference spatial datasets and services for Eurostat and Commission DGs. • Generalised reference datasets for the general public. • Statistical maps. • CENSUS 2022 validation and visualisation. • Data and services for the Commission internal Geoportal. • Spatial analyses for statistical or policy relevant issues.	Process
5	**[NUTS] Maintenance of the Nomenclature of Territorial Units for Statistics Classification and territorial typologies** Description: • Safeguard and enhance the framework of territorial classifications for statistical purposes. • Manage the Nomenclature of Territorial Units for Statistics (NUTS) classification and its amendments (by means of delegated and implementing acts). • Coordinate the implementation of changes. • Collect and publish the list of Local Administrative Units (LAU) annually. • Set up IT infrastructure to support management of territorial classifications and update of typologies (in particular the LAU data collection, validation and dissemination). • Maintain and publish Union typologies composed of territorial units at the levels of NUTS, LAU and grid cells. • Support candidate countries, potential candidates, EFTA countries and third countries in their efforts to establish and maintain territorial classifications. Product(s): • [LAU] LAU list. • [Reg] EU regions and regions' typology. Other output(s): • Implementation of the NUTS changes. • Preparation of the next NUTS update. • Annual LAU list. • Update of territorial typologies. • Improved management of territorial classifications and update of typologies. • Statistical regions.	Process
5	**[SubN] Sub-National statistics** Description: - Provision of comprehensive statistical indicators on territorial typologies composed of territorial units at the levels of NUTS, LAU, to monitor and evaluate territorial development policies, and to evaluate the territorial impacts of sectoral policies. • Processing, validation and dissemination of aggregates based on regional typologies. • Calculation of indicators, including dispersion rates based on regional data. • Dissemination of regional area data. Product(s): • [TERRA] Regional aggregates.	Process
5	**[Urb] Urban statistics** Description: Provision of statistical indicators on cities and Functional Urban Areas (including all steps of the statistical production process: specifying needs, design, build, collect, process, analyse, disseminate, evaluate.). The process includes the management of grants supporting sub-national and city statistics. Exploration of new data sources and development of new methodologies. Product(s): • [Urb] Key indicators on European cities.	Process

SMP heading	Activities: [code] title, description, statistical products and/or other outputs	Project/ Process
5, 4, 7	**[531] Coordination of geospatial information in the Commission within the European Statistical System and on international level** Description: Cooperation with Member States on implementing the Global Statistical Geospatial Framework (GSGF) through a Member States Working Group and the European Forum for Geography and Statistics (EFGS). Coordination within the Commission via the Inter-service Group (COGI) and the related technical committee (UTC). Key aspects are: • Integration of geospatial information and statistical information. • Availability of European Union called geospatial information. • Active participation in the United Nations initiated UN-GGIM and its European branch UN-GGIM: Europe. (COGI=Commission interservice group for geographical information, UTC=User and Technical Committee, UN-GGIM=United Nations Global Geospatial Information Management). Output(s): • Cooperation with Member States on project series through Working Group and EFGS. • Coordination of geographic information in the Commission, operation of the COGI Interservice Group and the User and Technical Committee. • Services to assist Commission DGs and Eurostat units in GIS (Geographical Information System) work, such as via framework contracts. • Capacity building and exchange of best practices within the European Statistical System and on international level. • Improving data quality of geospatial data through better specifications and guidelines.	Process
5, 6, 8	**[Reg] Coordination of Regional Statistics** Description: • Cooperate with Eurostat thematic units on regional and other sub-national statistics production in all phases of the process to better meet user needs: development of indicators and methodology, production of new indicators by using new data sources and innovative methods, metadata maintenance, dissemination. • Coordinate with policy DGs of the Commission and other stakeholders (Committee of Regions, OECD, etc.) on regional, rural and urban statistics. • Cooperate with ESS on regional, rural and urban statistics related issues. • Publish the Eurostat regional Yearbook and update the related content of the Statistical Atlas. • Communicate and promote regional and other sub-national statistics and facilitate their use by policy-makers, citizens, businesses, researchers and the media. • Support the implementation of the harmonised methodology to define cities, towns and rural areas for international statistical comparison in collaboration with the UN Statistical Division. Output(s): • Management and coordination of relations, exchange of information, support to other Commission services, participation in meetings, etc. • Eurostat Regional Yearbook and Regions in Europe interactive publication. • Update/creation of Statistics Explained articles focusing on sub-national statistics . • Support for interactive visualisations focusing on sub-national statistics. • Regional statistics newsletter. • Contribution to the implementation of the degree of urbanisation at global level.	Process
6	**[885] Advice to management on communications** Description: Improve communication with external partners of Eurostat. Improve communication in house on senior management's decisions and actions. Output(s): • Maintain strategic overview and plan of external communications • Provide regular fora for exchanges of views and feedback • Enhance reporting and transparency of senior management meetings and decision-making. • Provide advice and support for communication materials of strategic importance. • Strategic communication as well as public relations. • Communication with other EU institutions including Commission DGs.	Process
6	**[972] Eurostat's Communication and Dissemination Strategy** Description: Communication. Output(s): • Implementation of communication strategy. • Organising meetings and drafting action points of the Coordination Group on Communication.	Process
6	**[973] Cooperation in the area of communication in the ESS and internationally** Description: Cooperation in the area of communication in the ESS. Participation in UNECE meetings on the development of strategic communications for official statistics. Output(s): • Organisation of meetings of the Expert Group on ESS Strategic Communication. • Strategy for communication in the ESS. • Contributions to international initiatives in the field of strategic communication.	Process
6	**[Trust] Measuring the public's trust in official statistics** Description: Eurobarometer survey. Output(s): • Follow-up of results of Eurobarometer survey.	Project (2022-2025)
6	**[402] Manage and improve the reference environment for dissemination** Description: • Improve the quality of data presentation. • Maintain and monitor the data navigation tree (EN, FR, DE). • Contribute and advise on the definition of data structures and their harmonisation. • Create and maintain the derived tables, including EU policy indicators. • Implement and maintain code lists (EN, FR, DE). • Manage Eurostat standard code lists and their implementation. • Provide support to domain managers in Eurostat and upon request to other Commission DGs for statistical data dissemination. Output(s): • Central data production and dissemination services provided for European and other statistics. • Further harmonised and unified data structures and code lists.	Process

SMP heading	Activities: [code] title, description, statistical products and/or other outputs	Project/ Process
6	**[403] Manage the production, dissemination and standardisation of reference metadata in the European Statistical System** Description: • Manage the production, dissemination and standardisation of ESS reference metadata using the Single Integrated Metadata Structure (SIMS); • Provide reference metadata services to other DGs of the European Commission reusing the Eurostat dissemination chain; • Disseminate ESS classifications and related metadata assets using Linked Open Data standards. • Collect feedback and formulate new user requirements for the evolution of the metadata management including ESS Metadata Handler. Output(s): • Production and dissemination of standardised reference metadata at both European and national level. • Classifications and related metadata disseminated as Linked Open Data.	Process
6	**[697] Statistical services to DGs** Description: Manage the Eurostat Catalogue of Statistical Services. Output(s): • Catalogue migrated to a new platform and maintained as appropriate.	Process
6	**[707] Standardisation and harmonisation of ESS structural and reference metadata and alignment** Description: This process entails the standardisation of code lists, titles and other metadata used in Eurobase, i.e. with the Statistical Data and Metadata Exchange (SDMX) and their harmonisation across data sets. Output(s): • Availability of standard code lists, aligned with SDMX and/or EC standards. • Harmonisation of structural and reference metadata. • Contribution to the work of the EC Corporate Reference Data Management Group.	Process
6	**[Data Hub] Dissemination of large datasets based on topics** Description: Improve user accessibility of large datasets through a topic-driven interface. Output(s): • A3 business case approved. • Agreed list of requirements. • Initial developments based on pilot.	Project (2025-2027)
6	**[368] Maintain and further develop the quality management system of the European Statistical System** Description: Maintain and further develop/enhance the common quality framework of the European Statistical System. Output(s): • Standardisation of quality related articles in statistical legislation promoted. • Continuously updated ESS Quality Glossary available, as appropriate. • Proposals and ideas for further enhancing and adjusting common ESS the quality framework collected from peer reviews and other sources. • Proposals and ideas for a possible revision of the ESCoP collected and presented to the ESSC for a strategic decision on the revision. • Development of quality frameworks for specific data sources initiated.	Process
6	**[375] Coordinate and communicate quality work in the ESS and ensure its governance** Description: • Coordinate and communicate quality work in Eurostat through the Coordination Group Quality (internal Eurostat group). • Coordinate and communicate quality work in the ESS through the working group on quality in official statistics, the Directors of Methodology group, the European Statistical System Committee, the European Statistical System Task Force on peer reviews, the European Statistical Governance Advisory Board. Output(s): • Quality matters and standards communicated and coordinated in Eurostat. • Quality matters and standards communicated and coordinated in the ESS. • Quality matters and activities reported to the ESSC, DIME/ITDG, ESGAB, as appropriate. • Work on finalising the 3rd round of ESS peer reviews and the final reporting on the peer reviews coordinated in the ESS through the ESS Task Force on peer reviews. • Quality issues, standards and work, as well as work on further enhancing the common ESS quality framework communicated to and consulted with other stakeholders, as required.	Process
6	**[666] Implement the quality management system of the European Statistical System** Description: Finalising the 3rd round of ESS peer reviews and prepare, discuss and agree on the final reports on this round of peer reviews, Implementation of Quality Reviews in Eurostat, Eurostat Error management procedure, Quality reporting in the ESS. Output(s): • Final reporting on the 3rd round of ESS peer reviews. • Lessons learnt from the peer reviews summarised and presented to the ESSC. • Quality Review reports for selected domains prepared and agreed. • Reporting on the implementation of quality reviews, including on horizontal issues provided. • Eurostat's Inventory of Error Reports produced. • Presentations, explanations, contributions provided, as appropriate. • Advice and positions on quality reporting provided and published, as appropriate.	Process
6	**[857] Promote the quality management system of the European Statistical System** Description: Quality conferences, training courses, international cooperation, communication. Output(s): • (Internal and external like ESTP) training courses and presentations on quality issues implemented, as requested. • Support and guidance on quality projects within statistical cooperation programmes provided. • Contributions to international cooperation/standards provided, as requested. • ESS quality frameworks, standards and initiatives promoted in the ESS and beyond, as feasible. • The external Eurostat web pages and internal Cybernews Intranet maintained. • Seminars and workshops on promoting the Handbook for quality and metadata reports held for countries outside the EU.	Process

SMP heading	Activities: [code] title, description, statistical products and/or other outputs	Project/ Process
6	**[412] Eurostat website, Statistics explained, development of interactive publications and tools** Description: Evolutionary maintenance and quality assurance of the website and Statistics Explained. Development of responsive and innovative interactive publications/visualisation tools/info graphics strengthening the user orientation of Eurostat website. Output(s): • Ensure high availability, performance and continuous improvements of functionality, usability and web content in line with user expectations. • Develop innovative and responsive interactive publications/ visualisation tools/info graphics on Eurostat website. • Maintain and further develop the Assist application for user support.	Process
6	**[421] Publications** Description: Widespread dissemination of Eurostat's high-quality output through electronic and paper publications. Production, dissemination and stock management of statistical dissemination products, including the implementation of the annual publications programme. Output(s): • Full range of publications oriented to users' needs, all available via the website. Editorial services offered to the production units.	Process
6	**[504] Media relations** Description: Press office activities such as preparation and dissemination of news releases, preparation and organisation of press briefings, relations with the spokesperson service regarding data dissemination, maintaining networks of journalists and of press officers within the ESS. Output(s): • Publication of euro indicator news releases in three languages. • Dissemination of other main data releases to journalists. • Press briefings, if and when appropriate. • Activity of networks: journalists, data journalists, prESSnet.	Process
6	**[613] Events** Description: Production and development of different communication and promotional tools about Eurostat and European statistics. Promotion of European statistics in events. Output(s): • Production and dissemination of communication tools for representation of Eurostat in events. • Participation in international events and fairs to promote European statistics to users. • Organisation of webinars.	Process
6	**[614] User support** Description: Support for users from the EU institutions, the media and the public. Management of external user support network. Output(s): • Answering user requests. • Providing training on Eurostat and its data as required. • Manage the user support network in ESS.	Process
6	**[745] Continuous adaptation of dissemination products and services to user needs** Description: Production of attractive and innovative dissemination products and services responding to evolving user needs. Engage with users of European statistics in order to better identify their needs. . Output(s): • Increase the visibility and impact of Eurostat dissemination products and services by following the evolution of modern communication and design trends. • Carry out usability testing and user research as input for the (further) development of products and services. • Ensure content on the website is relevant, up to date and in line with guidelines and requirements (Eurostat visual style guide, web writing guidelines and accessibility requirements).	Process
6	**[802] Promotion of European statistics through social media and Latest news section** Description: Editorial planning. Dissemination of Eurostat output via social media; relations with the Commission social media network and ESS social media officers. Coordination, editing and publishing latest news articles. Output(s): • Weekly editorial calendar. • Regular dissemination of latest statistics via social media. • Latest news articles on Eurostat website.	Process
6	**[963] European Statistics Competition** Description: Organisation of the annual European Statistics competition. Output(s): • European Statistics competition.	Process
6	**[ModernNews] Modernisation of news releases** Description: Improve the production and design of news releases in order to ensure quality and security of the production and dissemination and to make the news releases more attractive to users, with innovative visualisation solutions. Output(s): • Improved user-friendly format of news releases. • Digital workspace for the production of news releases. • Automated production of drafts and dissemination.	Project (2020-2025)
6	**[StatExpl] Statistics Explained** Description: Further development and content management of Statistics Explained. Output(s): • Wide range of explanatory information and analysis is continuously updated. • Preparation of relevant new articles. • All articles are presented in a visual and attractive way.	Process
6	**[StatLit] Statistical literacy** Description: Expand the range of statistical literacy products and increase their uptake. Share good practices with NSIs in the framework of LitNet.	Process

SMP heading	Activities: [code] title, description, statistical products and/or other outputs	Project/ Process
6	**[IND] Coordinating indicator work and developing conceptual approaches; development, coordination and commentary for the European Statistical Recovery Dashboard.** Description: The Unit has responsibility for coordinating indicator work in Eurostat, in areas such as conceptual approaches and policy use of indicators. In particular this action includes the development and preparation of the European Statistical Recovery Dashboard. Output(s): • Well-coordinated Eurostat approach to indicators and accompanying conceptual approaches developed as necessary. • Publication of the European Statistical Recovery Dashboard.	Process
6, 7	**[SDCMA] Statistical confidentiality and microdata access** Description: Manage and coordinate the statistical confidentiality activity in Eurostat and within the European Statistical System (ESS), including access to European confidential data for scientific purposes. Output(s): • Coordination of statistical confidentiality methodology and implementation at Eurostat and the ESS. • Support on statistical disclosure control methodology and implementation.; • Provision and continuous improvement of access to European microdata for research purposes.	Process
7	**[372] Enterprise Architecture** Description: Integrate and standardise the EU statistics production processes and data management. Output(s): • Development and review of an enterprise reference architecture for Eurostat, including review of IT projects for the IT Design Board and implementation roadmaps. • Support for the business implementation for Trusted Smart Statistics. • Support for the implementation of the ESS innovation agenda and of innovative processes. • Support for the data lab.	Process
7	**[901] Methodologies, frameworks and proofs-of-concept for the use of mobile network operator data** Description: Develop methodological frameworks for extracting spatio-temporal statistics from mobile network operator (MNO) data. Output(s): • Development of methodological frameworks for Eurostat and the ESS on using MNO data for official statistics. • Development of proofs-of-concept for processing methodologies for population and tourism statistics. • Development of proofs-of-concept for privacy-enhancing technologies.	Project (2019-2025)
7	**[METHODOLOGY] Methodology in official statistics** Description: Provide and coordinate within Eurostat, the European Statistical System and the European Commission expertise, user support and training related to methodology in official statistics. Output(s): • Provision of methodological support in official statistics within Eurostat, incl. publishing results in the Eurostat Statistical Working Paper collection and publishing program code as open source where relevant; • Provision of methodological support to the European Commission; • Coordination of topics related statistical methodology in the European Statistical System; • Preparation and execution of the NTTS (New Techniques and Technologies for Statistics) conference.	Process
7	**[SA(CoE)] Centre of Excellence on statistical methods: Time Series, Seasonal Adjustment** Description: Manage and coordinate the centre of excellence for time series analysis and seasonal adjustment within the European Statistical System. Output(s): • Coordination and management of the Centre of Excellence on time series analysis and seasonal adjustment in the European Statistical System and with the European System of Central Banks; • Development, implementation and release of methods, tools and applications for time series analysis and seasonal adjustment; • Coordination of a user group on time series analysis and seasonal adjustment.	Process
7	**[SDC(CoE)] Centre of Excellence on statistical methods: Statistical Disclosure Control** Description: Manage and coordinate the centre of excellence for the development and maintenance of methodology for statistical disclosure control within the European Statistical System. Output(s): • Coordination and management of the Centre of Excellence on statistical disclosure control in the European Statistical System; •Development and implementation of methods, tools and applications for the protection of microdata and tabular data; • Coordination of an ESS user group on statistical disclosure control; • Fostering access to confidential data for the research community including communication activities.	Process
7	**[TSSSSH] Trusted Smart Statistics - Smart surveys hub** Description: Develop a concept and platform for conducting and provisioning smart surveys to Eurostat, the ESS and the European Commission and developing towards citizen statistics. Output(s): • Development of a concept for integrating surveys with smart devices and sensors; • Building capabilities related to new technologies, e.g. machine learning capabilities for processing sensor data, and other non-structured information; • Development of solutions for processing the input personal data in a privacy-preserving fashion; • Promotion of citizen engagement through e.g. incentives, participatory mechanisms, etc. • Adjustment and improvement of the quality framework related to smart survey.	Project (2019-2025)

SMP heading	Activities: [code] title, description, statistical products and/or other outputs	Project/ Process
7, 2	**[TSS-PET] PoC of a general-purpose privacy-preserving computation platform for processing confidential data across organisations** Description: Design, build and deploy a minimum viable product providing a combination of technological and organisational measures that enable to implement an end-to-end process with a minimal set of features providing to the ESS and the European Commission the capability to implement usage scenario based on the privacy-preserving computation paradigm. Output(s): • Development of organisational measures to achieve strong guarantees of computation security and full compliance with data protection legislation; • Development of a computational platform based on advanced technologies in the field of Secure Private Computing.	Project (2021-2026)
7, 2	**[TSSWIH] Trusted Smart Statistics - Web intelligence hub** Description: Develop and implement a Web Intelligence Hub to provide Eurostat and the ESS with fundamental capabilities for harvesting information from the web for official statistics. Output(s): • Development and implementation of an infrastructure to collect, process and produce statistical data from web sources; • Development of processes for web scraping and for the use of APIs; • Development of conditions and entering into agreements with trans-national players (platform owners, web aggregators etc.); • Development and implementation of a portfolio of multi-purpose text processing and analytics services; • Development and coordination of the production of new and enhanced statistical products.	Project (2019-2025)
7, 6, 8	**[RESEARCH] Research and innovation in official statistics** Description: Support and promote research in official statistics.; Disseminate innovation and research project results; Facilitate and support collaboration between researchers and official statisticians. Output(s): • Support and coordination of development and dissemination experimental statistics. • Support, coordination and management of research projects (grants) involving academia and statistical offices to foster innovation in European statistics; • Support and maintenance communication and collaboration platform for research and methodology in official statistics (CROS).	Process
7, 8	**[794] Trusted Smart Statistics** Description: Develop cross cutting capabilities (methodologies, infrastructure, skills, governance, access and use modalities) for the use of new data sources to implement Trusted Smart Statistics concept in official statistics. Output(s): • Development and implementation of a strategy related to access, integration and use of new data sources for official statistics; • Development of an IT infrastructure for new data sources and provision of data lab services; • Development and implementation of governance for Trusted Smart Statistics in collaboration with MS, fostering the exploiting of synergies between EU and national level; • Development and implementation of communication and outreach activities; • Development and implementation of partnerships with external stakeholders.	Project (2018-2027)
7, 8	**[ESTP] European Statistical Training Programme** Description: Design, implement and coordinate the European Statistical Training Programme (ESTP) for the European Statistical System. Output(s): • Definition and execution of the annual European Statistical Training programme (ESTP) to provide training to the ESS members on all aspect related to the development, production and dissemination of official statistics.	Process
8	**[IO-manage] Coordinate international cooperation** Description: Coordinate the implementation of Eurostat's external cooperation strategy. Manage and coordinate Eurostat's relations with international organisations and bodies (UN family, UN Regional commissions, OECD, ISI, WTO, IMF, FAO, CCSA). Output(s): • Management and coordination of relations, exchange of information, support to EU Delegations and other Commission services, participation in meetings, establishment of specific Administrative Arrangements, monitoring of the financial contribution.	Process
8	**[SPC] Manage the cooperation with the strategic partner countries in the statistical domain** Description: Implementation of specific arrangements and promote cooperation. This concerns countries on the American continent, Middle East, OECD countries outside of the EU, Russia (cooperation currently on hold), and the regional organisations such as GCC-Stat = Statistics Centre of the Gulf Cooperation Council and CIS-STAT = Statistical Committee of the Commonwealth of Independent States. Output(s): • Memoranda of Understanding and specific arrangements, activities related to the implementation of roadmaps.	Process
8	**[EMOS] European Master in Official Statistics** Description: Coordinate and further develop the European Master in Official Statistics (EMOS). to include official statistics in master's programme curricula of universities across Europe and to foster a network of European producers of official statistics, academia and students. Output(s): • Inclusion of official statistics in master's programme curricula of European universities; • Creation and fostering of a network of European producers of official statistics, academia and students across Europe; • Award, review and further development of the EMOS label for eligible master's programmes; • Coordination and organisation of events and other activities within the EMOS network; • Development and implementation of a revised strategy on the future development of EMOS.	Process

SMP heading	Activities: [code] title, description, statistical products and/or other outputs	Project/ Process
8	**[405] Implement the SDMX standards and the related validation services in the European Statistical System (ESS)** Description: • Implement the Statistical Data and Metadata Exchange (SDMX) standard for data exchange in statistical domains. • Implement SDMX-based corporate validation services in statistical domains. • Manage the structural metadata related to data transmission. • Collect feedback and formulate new user requirements for the evolution of the SDMX standard and the supporting IT tools. Output(s): • Implementation of SDMX and the related corporate validation services in statistical domains. • Validation services provided to DG ECFIN.	Process
8	**[409] Management and support of European Statistical System classifications** Description: - Produce, maintain and disseminate ESS horizontal classifications and related metadata in line with EC and ESS standards. • Ensure user support for classifications to the ESS, Commission services and professional organisations. • Support the drafting of legislation of statistical and technical standards in statistical domains. Output(s): • Standardisation services related to ESS classifications. • Classification forums and accessibility of explanatory notes. • Support provided for the drafting of legislation related to ESS standard. • Organisation of and contributions to the Standards Working Group.	Process
8	**[410] Provide input to the international work on statistical standards and metadata (UNECE, UNSD, SDMX)** Description: Provide input and support to international work on statistical standardisation and metadata by active contribution to the Economic Commission for Europe of the United Nations (UNECE) MOS HLG Supporting Standards Working Group, active participation in the United Nations Statistics Division (UNSD) Expert Group on international statistical classifications and global Statistical Data and Metadata Exchange (SDMX). Latter includes efficient collaboration with the 7 international organisations, the sponsors of SDMX, in the SDMX secretariat and working groups. Output(s): • Representing Eurostat in international work on statistical standardisation and metadata. • SDMX: representing Eurostat in the Secretariat and Sponsors committees, coordinating the implementation of SDMX and contribution to global capacity building. • UNECE: Contribution to the ModernStats World Workshop on standards, contribution to the Task Teams maintaining the UNECE standards such as the Generic Statistical Business Process Model (GSBPM) and the Generic Statistical Information Model (GSIM) and to other thematic work.	Process
8	**[REVNACECPA] Cyclical review of NACE and CPA** Description: Review of NACE and CPA aligned with the UN cycle to ensure their socio-economic relevance and consistency with ISIC and CPC. Output(s): • Collection of requirements and stakeholder consultations. • Up-to-date Delegated Act on NACE and CPA. • Up-to-date explanatory notes and introductory guidelines on NACE and CPA. • Organisation and running of the NACE/CPA Review Task Force (sub-group of the ESS Standards Working Group).	Process
8	**[CostAssess] Cost assessment - production of statistics in Eurostat and the European Statistical System** Description: Plan and coordinate cost exercises to support reporting obligations of the Commission as well as evaluations, impact assessments, and priority setting in the ESS. Output(s): • Annual cost analysis of European statistics in the ESS for selected products. • Cost assessment survey of production of official statistics in the ESS (every three years).	Process
8	**[EEA/EFTA] Manage the cooperation with EEA/EFTA countries and Switzerland in the statistical domain. Contribute to negotiations regarding an Association Agreement with non-EU Small Western European countries.** Description: Implement specific agreements and update relevant annexes, coordinate annual statistical programmes and promote cooperation in the statistical domain. Contribute to negotiations led by the Secretariat General regarding an Association Agreement with non-EU Small Western European countries (in the field of statistics). (EEA = European Economic Area, EFTA = European Free Trade Association). Output(s): • Annual statistical programmes, Memoranda of Understanding and specific agreements, activities related to the implementation of roadmaps.	Process
8	**[ESGAB/ESAC] Provide the secretariat for ESGAB and ESAC** Description: Provide the secretariat for the European Statistical Governance Advisory Board (ESGAB) and the European Statistical Advisory Committee (ESAC), manage the relations with these advisory bodies and assist in the preparation of the annual ESGAB report to the EP and the Council. Organise workshops and conferences such as the CESS for these advisory bodies. Output(s): • Meetings / seminars and respective formal reports, as well as opinions of the advisory bodies. • Peer review of Eurostat by ESGAB.	Process
8	**[IB-secr] Provide the secretariat for ESS governance bodies and committees** Description: Provide the secretariat for the European Statistical System Committee (ESSC) and the Partnership Group (PG), the DGINS conference, High-level Meetings (HLM), extraordinary DGs meetings, informal workshops of DGs and manage the relations with these ESS governance bodies. Output(s): • Meetings and respective formal reports, opinions of the bodies. • Organisation of the DGINS conference in collaboration with the host country.	Process

SMP heading	Activities: [code] title, description, statistical products and/or other outputs	Project/ Process
8	**[230] Coordinate, design, contract, implement and follow up cooperation programmes and activities for IPA beneficiary countries** Description: Coordinate, design, contract, implement and follow up cooperation programmes and activities for IPA beneficiary countries, to assist the alignment of their statistical production with the EU acquis. Output(s): •Co-delegated regional IPA (Instrument for Pre-Accession Assistance) programmes under implementation (IPA 2022) and finalisation (IPA 2019). • Contributions to the National IPA programmes provided to ensure that the programmes address relevant EU acquis and are well coordinated with regional cooperation programmes. .	Process
8	**[233] Assess and monitor the statistical systems in the Enlargement, European Neighbourhood Policy (ENP) and Central Asia countries** Description: Monitor the statistical systems in the Enlargement, European Neighbourhood Policy (ENP) and Central Asia countries using different assessment instruments (such as global assessments (GA), peer reviews (PR), sector reviews, Eurostat missions to the countries). Output(s): • Assessment reports and mission reports are available for the assessed countries.	Process
8	**[234] Coordination of statistical cooperation** Description: Support and promote coordination of statistical cooperation activities for the Enlargement, European Neighbourhood Policy (ENP) and Central Asia countries through donor coordination, meetings with MS and DG NEAR on statistical cooperation. Output(s): • Annual donor coordination survey for the Enlargement, European Neighbourhood Policy East and South and Central Asian countries carried out. • Expert group meeting on statistical cooperation (MGSC) successfully held and key decisions on cooperation taken. • Follow-up of the implementation of Memorandum of understanding with DG NEAR and revision of its annexes if necessary.	Process
8	**[236] Support the EU enlargement policy** Description: Support the EU enlargement policy through participation in sub-committee meetings under the Stabilisation and Association Agreements / Association Agreements, following up on commitments on chapter 18 in the accession process, contributing to the annual enlargement reports. Output(s): • Input to sub-committees provided and meetings attended. • Input to the annual enlargement reports including the statistical annex provided to DG NEAR. • Input to the Economic Reform Programme (ERP) process (including the table on statistics in the European Commission's assessment of the country's ERPs) and the economic and financial dialogue with the Western Balkans and Türkiye. • Negotiations on the statistics chapter with candidate countries pursued as relevant.	Process
8	**[250] Support the implementation of the EU's European Neighbourhood Policy, the Africa-EU Partnership and policy towards Central Asia** Description: Support the implementation of the EU's European Neighbourhood Policy, the Africa-EU Partnership and policy towards Central Asia through advice on statistical matters and input provided to EC meetings with partners. Output(s): • Advice on statistical matters provided to NEAR, INTPA and other EC services and the EEAS. • Input provided to EC meetings with partner countries (such as association councils, association committees and economic dialogues) and relevant meetings attended. • Regional cooperation promoted and facilitated by sharing experiences of the ESS model of working.	Process
8	**[252] Support to other Commission services in the design and implementation of cooperation programmes with relevance for statistics in the ENP countries, Africa and Central Asia** Description: Support the programming, implementation and evaluation of regional or bilateral cooperation programmes/projects through technical advice on statistical matters. Output(s): • Technical advice on statistics and statistical cooperation provided to NEAR, INTPA and other relevant EC services with regard to bilateral and regional programmes on statistics. • Input provided to relevant documents. • Contribution to programme evaluation if necessary.	Process
8	**[256] Support to production and dissemination of statistics** Description: Support the increased utilisation of statistical and cooperation tools by NSIs and organisations providing technical assistance (donors) through promotion, training, user-friendly dissemination and the visibility of statistics on non-EU third countries and regions. Output(s): • Training on Eurostat cooperation tools implemented. • Guide to statistics in European Commission development cooperation reviewed.	Process
8	**[660] Information on European standards in statistics** Description: Collect information on legal acts, data requirements and methodology for the entire statistical acquis. Prepare for launching, processing, finalising and monitoring the compliance of the statistical systems of the candidate countries and potential candidates with EU statistical acquis. Output(s): • Statistical Requirements Compendium updated. • Reports on compliance evaluation produced annually for candidate countries and potential candidates.	Process

SMP heading	Activities: [code] title, description, statistical products and/or other outputs	Project/ Process
8	**[661] Statistical cooperation programmes/projects for ENP countries and Central Asia** Description: Design, contract and implement statistical cooperation programmes and projects for the ENP countries and Central Asia to strengthen the partner countries capacity to develop, produce and disseminate reliable and comparable statistics in line with European and international norms and standards. Output(s): • Co-delegated regional statistical programmes for the ENP countries planned and implemented. • Smaller scale Eurostat budget statistical cooperation projects for ENP countries and Central Asia contracted and implemented.	Process
8	**[662] Management of high-level seminars and meetings with Western Balkans, Türkiye and European Neighbourhood Policy countries to promote strategic discussions** Description: Organisation and management of high-level meetings and seminars for the Enlargement and European Neighbourhood Policy (ENP) countries to stimulate strategic discussions, promotion of European Statistical System initiatives and increased availability of good quality data. Output(s): • FORUM meeting for the ENP South countries' NSIs' top management held. • High-level Seminars for the ENP East and Central Asia countries' NSIs' top management held. • Policy Group meeting (PGSC) organised with the NSIs' top management of the enlargement countries.	Process
8	**[732] Implementation of the PAS II service contract** Description: Implement and follow up the Pan African Statistics (PAS II) service contract and coordinate its activities with the five other PAS II components. Output(s): • Smooth implementation of the PAS II service contract ensured. • Consistency with activities by other PAS II components. • Requests from DG INTPA met on time. • Strengthening the Statistical capacity of the African Union Statistics Division (Statafric), supporting the coordination of the African Statistical System.	Process
8	**[CPC-ENP] Statistics on enlargement and on European Neighbourhood Policy (ENP) countries** Description: Collection and dissemination in Eurobase of statistical data mainly from the European Neighbourhood Policy (ENP) countries and selected indicators from enlargement countries. Product(s): • [CPC-ENP] Enlargement and ENP-East and ENP-South countries. Other output(s): • Data available in Eurobase for enlargement and ENP countries. • Production of statistical annexes to the EU reports on the enlargement policy. • Electronic publications in Statistics Explained available for theWestern Balkans, Türkiye and the ENP countries.	Process
8	**[671] Committee on Monetary, Financial and Balance of Payments Statistics and ESF activities** Description: Assist in drawing up and implementing work programmes on monetary, financial and balance of payments statistics; offer opinions in these areas and other areas of economic statistics, in particular national accounts; advise on statistical issues related to Excessive Deficit Procedure co-ordinate work of statisticians from National Statistical Institutes and Eurostat together with National Central Banks and the European Central Bank (ECB-DG Statistics); implement cross-cutting issues adopted in the work programmes of the European Statistical Forum. Manage and coordinate Eurostat's relations with the European System of Central Banks and implement the Memorandum of Understanding between the European Statistical System and European System of Central Banks. Output(s): • Organisation and participation in the meetings of the CMFB Executive body and CMFB plenary meetings. • Organisation of ESF meetings.	Process
8	**[Eurotrace] Eurotrace basic (corrective) maintenance** Description: Corrective and evolutive maintenance of Eurotrace, limited as the tool is to be phased out in the coming years, an open-source statistical software for statistical data treatment and management, currently used by two Member States (Cyprus and Malta) and around 100 non-EU countries, including EU candidate countries. Output(s): Limited corrective and evolutive maintenance of the Eurotrace open-source software.	Process
9(SP)	**[215] Business Continuity Management** Description: Provide a framework enabling Eurostat to respond effectively to threats that could impact its operations, safeguarding the interests of its key stakeholders, its reputation and its key activities. The framework involves the following processes: • Determining the BCM strategy. • Determining and implementing the BCP response. • Developing awareness raising and carrying out evaluation of the process. Output(s): • Update of Eurostat business impact assessment if necessary. • Drafting of the BCP if necessary and delivering regular updates. • Critical staff training. • Tests.	Process

SMP heading	Activities: [code] title, description, statistical products and/or other outputs	Project/ Process
9(SP)	**[381] Digital Workplace (DWP) Services management** Description: Ensure and facilitate the effective delivery of Digital Workplace services (that DIGIT provides) to ESTAT. Provide hardware and software to fulfil specific needs by Eurostat users (outside the scope of DIGIT) and provide 2nd level user support for them. Develop solutions or customisations of corporate digital collaboration tools to meet the specific needs of Eurostat. Lead the "IT Engagement Team" in charge to provide the above-mentioned services. Output(s): • Regular SLA / Service reviews with service providers. • Client satisfaction surveys and related service improvement plans. • Management of software's licenses for Eurostat specific software (client and server). It includes all licenses for other Units previously financed with their operational budget. • Proper management of hardware used by end-users. This includes the timely provisioning of PCs/laptops to Eurostat staff and the correct inventory of equipment. • Provide 2nd level support for "office automation environment" and ITIC service level management. • User satisfaction on overall IT services. • Alignment of business projects with IT projects. • Identification of business needs and alignment with IT services portfolio. .	Process
9(SP)	**[683] Maintenance of local in-house IT applications** Description: . Develop and maintain Information Systems supporting Eurostat's needs (for financial, planning and project management) that are not fulfilled through corporate Information Systems. Ensure their interoperability with corporate tools. Output(s): • Up-to-date local applications, including developments based on user requests and business needs. • Ensure compatibility with EC corporate tools.	Process
9(SP)	**[ITHOSTINGESTAT] IT Hosting and Cloud management** Description: Manage the delivery of Hosting and Cloud services within Eurostat. Facilitate and coordinate the provision of such services by DIGIT and other external service providers (e.g. Cloud). Complement as needed these services to fill gaps to ensure that Eurostat's specific needs for IT infrastructure are fulfilled. Output(s): • Regular Service Level Agreement / Service reviews with service providers. • Support and maintenance of ESTAT's secure environment. • Provision of middleware services required by Eurostat and not included in the catalogue of services provided by DIGIT. • Management and monitoring of the hosting costs at Eurostat, including process for regularly identifying opportunities for rationalisation. • Provision of infrastructure management for cloud-based infrastructures.	Process
9(SP)	**[ITSEC-ESS] Coordination of different activities around IT security in the ESS** Description: Coordinate and follow up the process to ensure continuation of the IT security assurance mechanism in the European Statistical System (ESS). Define and put in place with ESS members IT security standards in order to ensure secure and reliable exchange of confidential information. Support business units in the classification of the information exchanged with the ESS. Output(s): • Management of the Expert Group on ESS IT security for elaborating and monitoring security aspects of information (data, email, micro-data, documentation) exchange in the ESS. • Follow-up of the actions related with the ESS IT Security Framework. • Advice on Implementation and communication about the common IT security standards for Information exchange. Documentation of ESS IT architectures for security purposes in order to cope with the diversity of the ESS environments. • Coordination and follow-up on ESTAT IT Security plans for the different applications used for exchanging and processing data with the ESS Members.	Process
9(SP)	**[IT4diss] IT for data and metadata dissemination** Description: Develop, maintain and evolve Information Systems (IS) used for the dissemination of data and metadata for Eurostat, and their potential sharing in the European Statistical System (ESS), ensuring the corrective and evolutive maintenance of the IT tools, and including the needed features to ensure the proper dissemination of data and metadata according to Eurostat standards. Output(s): • Dissemination chain for reference data: support, and corrective and evolutionary maintenance. • COMEXT (Eurostat reference database for external trade statistics production and dissemination). • Data hub/ Farm Hub and other activities related to data dissemination.	Process
9(SP)	**[IT4exchange] IT for data exchange** Description: Develop, maintain and evolve Information Systems (IS) used for the exchange of data and metadata in the European Statistical System (ESS) and other data sources, ensuring the corrective and evolutive maintenance of the IT tools, and including the needed features for the proper exchange of data and metadata according to Eurostat standards. Output(s): • eDAMIS (Electronic Data files Administration and Management Information System): support, and corrective and evolutionary maintenance. • ESDEN, support and corrective and evolutionary maintenance. • MDE, support and corrective and evolutionary maintenance.	Process

SMP heading	Activities: [code] title, description, statistical products and/or other outputs	Project/ Process
9(SP)	**[IT4metadata] IT tools and services for metadata and standards** Description: Develop, maintain and evolve Information Systems (IS) used for the development of common standards for statistical data and metadata exchange, ensuring the corrective and evolutive maintenance of the IT tools, the development of new tools as well as ensuring the collaboration with all external stakeholders, both inside and outside the ESS. Output(s): - Organization of the ESS ITWG (IT Working Group) and the ESS Shared tools Expert group. • SDMX (Statistical Data and Metadata Exchange) tools: support, and corrective and evolutionary maintenance. • Participation in international activities related to SDMX, in particular representing Eurostat in the SDMX Technical Working Group. • SDMX tools Task Force. • Census hub: support, and corrective and evolutionary maintenance, and information of Member States. • ESS-MH (Metadata Handler): support, and corrective and evolutionary maintenance, including improvements in interoperability with national metadata system.	Process
9(SP)	**[IT4prod] IT for statistical production** Description: Develop, maintain and evolve Information Systems (IS) used for statistical production and validation of received data, ensuring the corrective and evolutive maintenance of the IT tools and platforms. Output(s): • Information systems for statistical production and validation. • EDSHARESIT. • FAME. • MDT. • SAS. -INPUTHALL. • COOL. • SERV (Jdemetra+, etc). • Data virtualization tools.	Process
9(SP)	**[ITMODPROG] IT for statistical production - Modernization program** Description: Modernize the IT tools for statistical production and validation, covering the different aspects of statistical production and validation, aiming to streamline both tools and platforms used for statistical production and validation, as well as fostering the standardization of statistical tools and processes and the use of new and innovative technologies to improve efficiency and enable the use of new and innovative data sources. Output(s): As a program, these are the different projects/products which will be part of the program, spread between different units: • Enterprise architecture; • Migration strategy; • Data Integration; • Audit and monitoring; • DaaS (Data As a Service); • Data processing and domain management GUI; • Data processing pipelines management; • Data Lake; • Validation engine; • Data Analytics and Reporting tools; • Cloud delivery model; • Data confidentiality; • Hybrid and Multi-cloud service management; • IAM in hybrid and multi-cloud; • AI/ML integration; • Data acquisition via Web Scraping; • End-user experimentation (DataLab); • Reference Data Management; • Structural Data Management; • Validation Rules Management; • SAS VIYA production platform.	Project (2025-2029)
9(SP)	**[1024] Domain-driven management of ESS validation rules** Description: Migration towards a domain-based management of validation rules in selected statistical domains. Output(s): • Validation rule manager (VRM) fully integrated with CONVAL. • Roll-out in selected domains; validation programmes translated.	Project (2023-2025)
9(SP)	**[406] Provide user support and training for data and metadata exchange activities** Description: - Provide first level support for Eurostat's data and metadata exchange infrastructure(e.g. EDAMIS, the ESS Metadata Handler and, corporate applications for validation) to European Commission and ESS users. - Provide first level support for Eurostat's data and metadata exchange standards (e.g. SDMX, SIMS) to European Commission and ESS users. • Provide capacity building and training activities for Eurostat's data and metadata exchange infrastructure and standards. • Collect feedback and formulate new user requirements for the evolution of Eurostat's data and metadata exchange infrastructure and standards. Output(s): • Guidelines, training and end user support for Eurostat's data and metadata exchange infrastructure and standards. • Organisation and running of the Data Transmission Coordination Group (DTCG).	Process
9(SP)	**[ITMODPROG-MET] Modernization program for IT systems for statistical production - Metadata support** Description: Complement the unit A3 project ITMODPROG through the implementation of a centralised structural metadata system and a metadata governance to support the new production systems implemented under MODSPS. As this project is linked to ITMODPROG, it is covered by the same business case. Output(s): • Participation in the MODSPS Task Force and Community of Practice; • Mid-term modernisation plan for structural metadata, in line with the plan for production systems developed by the ITMODPROG project; • Implementation of new IT requirements or of new governance processes to migrate domains to the target structural metadata system.	Project (2025-2029)
9(SP)	**[PMF] Process management framework** Description: Maintenance of Eurostat's process management framework. Output(s): • Support to Eurostat staff in the description of Eurostat processes. • Maintenance of central process description repository.	Process

SMP heading	Activities: [code] title, description, statistical products and/or other outputs	Project/ Process
9(SP)	**[TSI] Technical Support Instrument** Description: Coordinate the work on the annual TSI exercise, inform the ESS about funding opportunities and liaise with DG REFORM. Output(s): • Information to the ESS on annual TSI funding opportunities. • Feedback to DG REFORM on requests concerning statistics.	Process
9(SP)	**[OS] Coordination of development of "other statistics" within the Commission** Description: Coordinate the development of "other statistics" and ensure cooperation and regular dialogue with DGs as stated in the Commission Decision on Eurostat. Support the Commission actions relating to data, information and knowledge management and performance frameworks. Steering of the Statistical Correspondents Network. Output(s): • Annual update of the inventory of other statistics. • Actions relating to data, information and knowledge management and performance frameworks.	Process
9(SP)	**[BusArc] National Accounts business coordination of pre-validation services** Description: Coordinate pre-validation services projects for national accounts statistics from the business side. Output(s): • Support and coordinate the developments of pre-validation services from the business side.	Process
9(SP), 8	**[SPP] Strategic Planning and Programming** Description: Formulate and review Eurostat's multiannual priorities. Coordinate the work on the priority setting mechanism in the ESS and the reviews in statistical domains. Output(s): • ESP multiannual action plan (MAP). • Reviews in statistical domains.	Process
