

Second quarter of 2019

Household real income per capita up in both euro area and EU28

Real consumption per capita up in both euro area and EU28

In the **euro area**, in real terms, household income per capita increased by 0.4% in the second quarter of 2019, after an increase of 0.6% in the previous quarter. Household real consumption per capita increased in the second quarter of 2019 by 0.2%, after an increase by 0.2% in the first quarter of 2019.

Euro area real growth of household income and consumption per capita

%, seasonally adjusted

In the **EU28** household real income per capita increased by 0.2% in the second quarter of 2019, after an increase of 0.3% in the previous quarter. Household real consumption per capita increased by 0.4% in the second quarter of 2019, after a decrease of -0.3% in the first quarter of 2019.

EU28 real growth of household income and consumption per capita

%, seasonally adjusted

These data come from a detailed set of seasonally adjusted quarterly European sector accounts released by **Eurostat**, the statistical office of the European Union and the **European Central Bank (ECB)**. The [dataset](#) is available on the Eurostat website, and the key indicators are also presented in [Statistics Explained](#).

Geographical information

The **euro area** (EA19) consists of 19 Member States: Belgium, Germany, Estonia, Ireland, Greece, Spain, France, Italy, Cyprus, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Austria, Portugal, Slovenia, Slovakia and Finland, plus the European Central Bank and the European Stability Mechanism.

The **European Union** (EU28) consists of 28 Member States: Belgium, Bulgaria, the Czech Republic, Denmark, Germany, Estonia, Ireland, Greece, Spain, France, Croatia, Italy, Cyprus, Latvia, Lithuania, Luxembourg, Hungary, Malta, the Netherlands, Austria, Poland, Portugal, Romania, Slovenia, Slovakia, Finland, Sweden and the United Kingdom plus the EU institutions.

Methods and definitions

Household real income per capita is defined as the adjusted gross disposable income of households, in nominal terms, divided by the total population (source: National Accounts concept) and by the deflator (price index) of household final consumption expenditure.

Household real consumption per capita is defined as the actual final consumption expenditure of households, in nominal terms, divided by the total population (source: National Accounts concept) and by the deflator (price index) of household final consumption expenditure.

The compilation of the European sector accounts follows the **European System of Accounts 2010 (ESA 2010)** and covers the period from the first quarter of 1999 onwards.

Institutional sectors bring together economic units with broadly similar characteristics and behaviour, namely: households (including non-profit institutions serving households), non-financial corporations, financial corporations, government and the rest of the world. In the latter, to measure the external transactions of the euro area / European Union, it is necessary to remove cross-border flows within the area concerned.

Eurostat website includes detailed annual and quarterly sector accounts of Member States of the European Economic Area and derived key indicators published around 120 days after each quarter (which also cover annual indicators such as debt-to-income ratios). A subset of quarterly key indicators is published around 94 days after each quarter.

Due to the conversion to euro, the growth rates of European Union aggregates may be affected by movements in exchange rates.

As of 29 October 2019, the seasonally adjusted component series of the key indicators for the European Union are obtained by directly seasonally adjusting the unadjusted series.

Revisions and timetable

A first release, focussing on data for household saving and investment rates in the euro area, is published around 94 days after each quarter.

Compared with News Release [121/2019](#) of 26 July 2019, the growth rate of household income per capita in real terms for the first quarter of 2019 remains unchanged for both the EA19 at +0.6% and the EU28 at +0.3%. The growth rate of household consumption has been revised from +0.4% to +0.2% for the EA19 and from 0.0% to -0.3% for the EU28.

Please note that most EU countries are carrying out a benchmark revision of their national accounts estimates in 2019, which will be progressively integrated in European estimates. For further details, please consult the Eurostat [website](#) and in particular this [document](#).
