

189/2019 - 16 December 2019

Third quarter of 2019

Euro area job vacancy rate at 2.2%

EU28 rate at 2.3%

The job vacancy rate in the **euro area** (EA19) was 2.2% in the third quarter of 2019, down from 2.3% in the previous quarter and up from 2.1% in the third quarter of 2018, according to figures published by **Eurostat, the statistical office of the European Union**. In the **EU28**, the job vacancy rate was 2.3% in the third quarter of 2019, stable compared with the previous quarter and up from 2.2% in the third quarter of 2018.

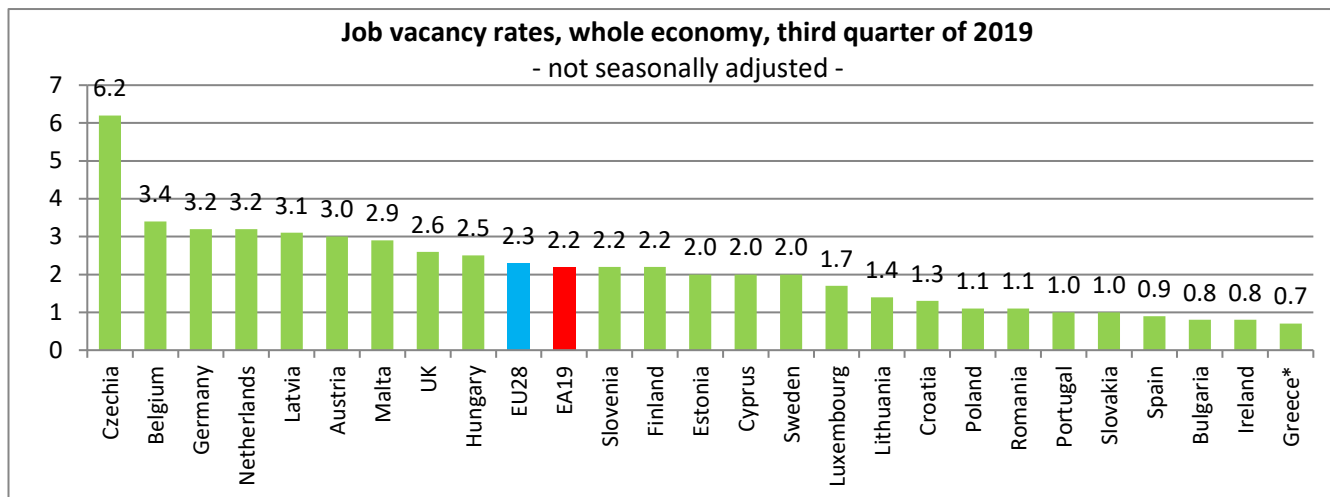

* Data for EU27 up to Q4 2009, data for EU28 from Q1 2010.

In the **euro area**, the job vacancy rate in the third quarter of 2019 was 1.9% in industry and construction, and 2.5% in services. In the **EU28**, the rate was 2.0% in industry and construction, and 2.5% in services.

Member States

Among the Member States for which comparable data are available (see country notes), the highest job vacancy rates in the third quarter of 2019 were recorded in **Czechia** (6.2%), **Belgium** (3.4%), **Germany** and the **Netherlands** (both 3.2%). In contrast, the lowest rates were observed in **Greece** (0.7%, data from the second quarter of 2019), **Ireland** and **Bulgaria** (both 0.8%) and **Spain** (0.9%).

Compared with the same quarter of the previous year, the job vacancy rate in the third quarter of 2019 rose in nine Member States, remained stable in **Denmark**, **Greece** (between the second quarters of 2018 and 2019), **Italy**, **Austria**, and **Portugal**, but fell in fourteen Member States. The largest increases were registered in **Latvia** (+0.6 pp), **Czechia** (+0.3 pp), **Germany** and the **Netherlands** (both +0.2 pp). The largest decreases were registered in **Slovenia** (-0.4 pp) and **Hungary** (-0.3 pp).

Denmark, France, and Italy: not shown, as data are not strictly comparable.

* Data from 2019Q2.

Geographical information

The **euro area** (EA19) includes Belgium, Germany, Estonia, Ireland, Greece, Spain, France, Italy, Cyprus, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Austria, Portugal, Slovenia, Slovakia and Finland.

The **European Union** (EU28) includes Belgium, Bulgaria, Czechia, Denmark, Germany, Estonia, Ireland, Greece, Spain, France, Croatia, Italy, Cyprus, Latvia, Lithuania, Luxembourg, Hungary, Malta, the Netherlands, Austria, Poland, Portugal, Romania, Slovenia, Slovakia, Finland, Sweden and the United Kingdom.

Methods and definitions

The **job vacancy rate** (JVR) measures the proportion of total posts that are vacant, expressed as a percentage:

$JVR = (\text{number of job vacancies}) / (\text{number of occupied posts} + \text{number of job vacancies})$.

A **job vacancy** is defined as a paid post (newly created, unoccupied or about to become vacant) for which the employer is taking active steps to find a suitable candidate from outside the enterprise concerned and is prepared to take more steps and which the employer intends to fill either immediately or in the near future. Under this definition, a job vacancy should be open to candidates from outside an enterprise. However, this does not exclude the possibility of the employer recruiting an internal candidate for the post. A vacant post that is open only to internal candidates should not be treated as a job vacancy. An occupied post is a paid post within an organisation to which an employee has been assigned.

Job vacancy rates cover NACE Rev. 2 sections B to S. This aggregate is referred to as "**Whole economy**" for the sake of simplification, even if agriculture, activities of households as employers and activities of extraterritorial organisations are excluded. NACE Rev. 2 sections B to S include the industry (B to E), construction (F) and services (G to N) sectors together with (mainly) non-market services (O to S).

The job vacancy rates for the EU and euro area aggregates are based on Member States data, including estimates for recent periods when values are not yet available. If national data are only available for a sub-population, for example excluding smaller units or some activities, this sub-population is used in the computation of the job vacancy rate for the aggregates.

Country notes:

Denmark, France, and Italy: data are not strictly comparable. In France and Italy, only business units with 10 employees or more are surveyed. Moreover, in the case of public administration, education and human health (NACE Rev. 2 sections O, P and Q), public institutions are not covered. In Denmark, only units within the business economy (NACE Rev 2 sections B to N) are surveyed.

Revisions and timetable

Compared with the rates published in News Release [142/2019](#) of 16 September 2019, the job vacancy rate for the second quarter of 2019 remains unchanged in both the euro area and the EU28.
