

191/2019 - 17 December 2019

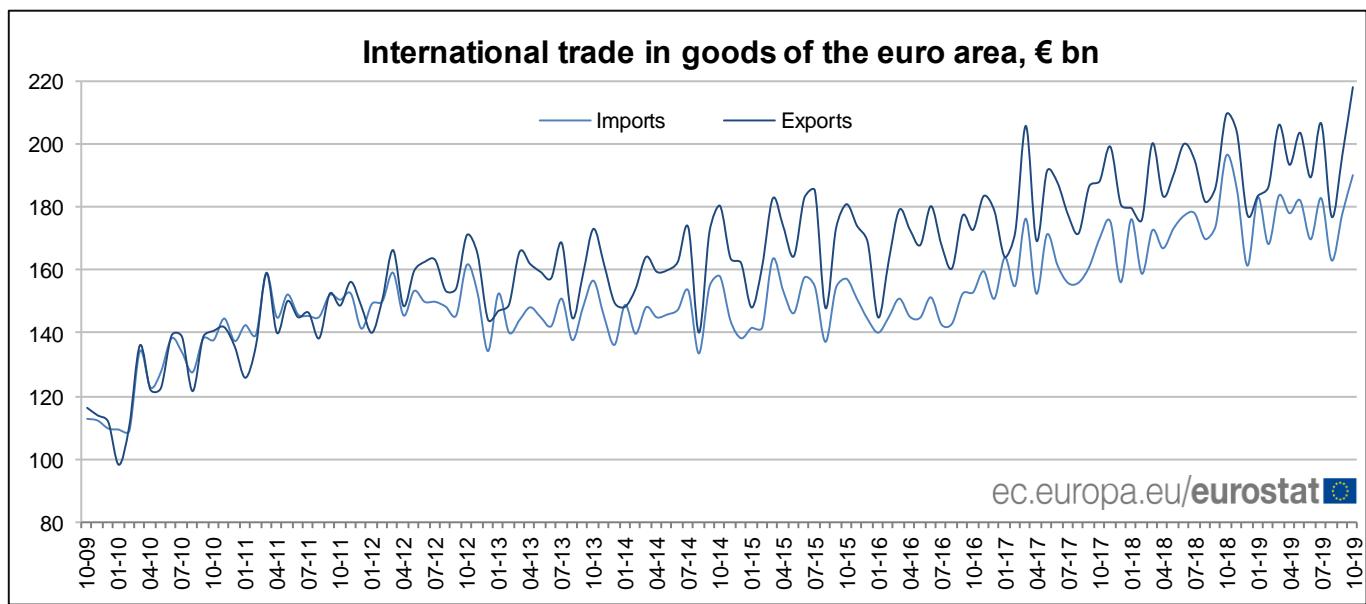

October 2019

**Euro area international trade in goods surplus****€28.0 bn**

€2.2 bn surplus for EU28

**Euro area**

The first estimate for **euro area** (EA19) exports of goods to the rest of the world in October 2019 was €217.9 billion, an increase of 4.1% compared with October 2018 (€209.3 bn). Imports from the rest of the world stood at €189.9 bn, a fall of 3.2% compared with October 2018 (€196.1 bn). As a result, the **euro area** recorded a €28 bn surplus in trade in goods with the rest of the world in October 2019, compared with +€13.2 bn in October 2018. **Intra-euro area** trade fell to €174.9 bn in October 2019, down by 1.4% compared with October 2018.

In January to October 2019, **euro area** exports of goods to the rest of the world rose to €1 959.8 bn (an increase of 3.1% compared with January-October 2018), and imports rose to €1 776.6 bn (an increase of 2% compared with January-October 2018). As a result the **euro area** recorded a surplus of €183.2 bn, compared with +€160.5 bn in January-October 2018. **Intra-euro area** trade rose to €1 647.7 bn in January-October 2019, up by 1.2% compared with January-October 2018.

**EA19 trade - non seasonally adjusted data**

## Geographical information

The **euro area** (EA19) includes Belgium, Germany, Estonia, Ireland, Greece, Spain, France, Italy, Cyprus, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Austria, Portugal, Slovenia, Slovakia and Finland.

The **European Union** (EU28) includes Belgium, Bulgaria, Czechia, Denmark, Germany, Estonia, Ireland, Greece, Spain, France, Croatia, Italy, Cyprus, Latvia, Lithuania, Luxembourg, Hungary, Malta, the Netherlands, Austria, Poland, Portugal, Romania, Slovenia, Slovakia, Finland, Sweden and the United Kingdom.

## Methods and definitions

Since the introduction of Intrastat for intra-EU trade on 1 January 1993, the value of intra-EU exports has been consistently higher than that of intra-EU imports. In theory, as exports are declared FOB and imports CIF, the value of corresponding imports should be slightly higher than that of exports. Eurostat uses intra-EU exports as the more reliable measure of total intra-EU trade as, at aggregated levels, total intra-EU exports has better coverage than total intra-EU imports. Due to this divergence in intra-EU trade, and to the difficulties of interpreting figures in absolute terms at the level of individual Member States, trade balances for individual Member States must be interpreted with caution. The same caution applies to the trade balance of the euro area, which includes some intra-EU trade.

Dutch trade flows are over-estimated because of the so-called 'Rotterdam effect' (or quasi-transit trade): that is goods bound for other EU countries arrive in Dutch ports and, according to EU rules, are recorded as extra-EU imports by the Netherlands (the country where goods are released for free circulation). This in turn increases the intra-EU flows from the Netherlands to those Member States to which the goods are re-exported. Although to a lesser extent, trade figures of other Member States like Belgium or Luxembourg may also be overestimated due to quasi-transit.

National concepts may differ from the harmonised methodology used by Eurostat, leading to differences between figures in this release and those published nationally, both for raw data and for seasonally adjusted series.

Products are classified according to the Standard international trade classification (SITC), Revision 4.

## Revisions and timetable

This News Release is based on data available on 11 December 2019. These are provisional figures based on information provided by Member States. They are subject to frequent revision for up to two years after the month in question.
