

136/2020 - 15 September 2020

Second quarter of 2020

Euro area and EU job vacancy rate both at 1.6%

In the second quarter of 2020, the quarter when COVID-19 containment measures have been widely implemented by Member States, the job vacancy rate in the **euro area** and in the **European Union (EU)** was 1.6%, down from 1.9% in the previous quarter and from 2.3% in the second quarter of 2019, according to figures published by Eurostat, the statistical office of the European Union.

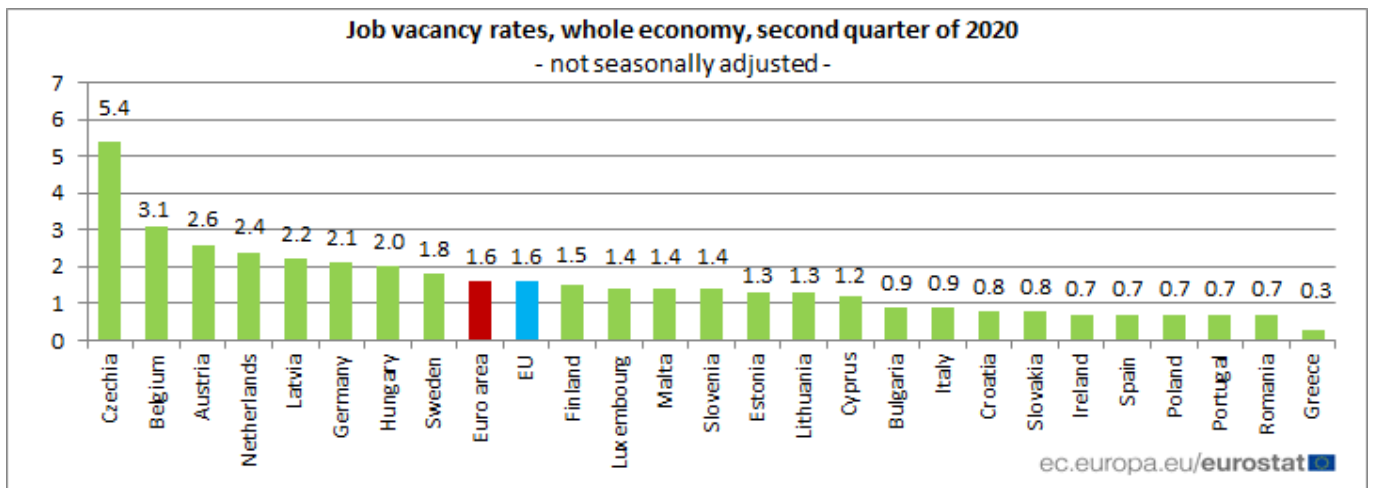

In the **euro area**, the job vacancy rate in the second quarter of 2020 was 1.3% in industry and construction, and 1.7% in services. In the **EU**, the rate was 1.4% in industry and construction, and 1.7% in services.

Member States

Among the Member States for which comparable data are available (see country notes), the highest job vacancy rates in the second quarter of 2020 were recorded in **Czechia** (5.4%), **Belgium** (3.1%) and **Austria** (2.6%). In contrast, the lowest rates were observed in **Greece** (0.3%), as well as in **Ireland**, **Spain**, **Poland**, **Portugal** and **Romania** (all 0.7%).

Compared with the same quarter of the previous year, the job vacancy rate fell in twenty-five Member States, remained stable in **Bulgaria** and increased in **France** (by 0.1 percentage points (pp)). The largest decreases were registered in **Malta** (-1.6 pp), **Germany** (-1.2 pp), **Latvia** and the **Netherlands** (both -1.0 pp).

Denmark and France: not shown, as data are not strictly comparable.

Geographical information

The **euro area** (EA19) includes Belgium, Germany, Estonia, Ireland, Greece, Spain, France, Italy, Cyprus, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Austria, Portugal, Slovenia, Slovakia and Finland.

The **European Union** (EU27) includes Belgium, Bulgaria, Czechia, Denmark, Germany, Estonia, Ireland, Greece, Spain, France, Croatia, Italy, Cyprus, Latvia, Lithuania, Luxembourg, Hungary, Malta, the Netherlands, Austria, Poland, Portugal, Romania, Slovenia, Slovakia, Finland and Sweden.

Methods and definitions

The **job vacancy rate** (JVR) measures the proportion of total posts that are vacant, expressed as a percentage:

$JVR = (\text{number of job vacancies}) / (\text{number of occupied posts} + \text{number of job vacancies})$.

A **job vacancy** is defined as a paid post (newly created, unoccupied or about to become vacant) for which the employer is taking active steps to find a suitable candidate from outside the enterprise concerned and is prepared to take more steps and which the employer intends to fill either immediately or in the near future. Under this definition, a job vacancy should be open to candidates from outside an enterprise. However, this does not exclude the possibility of the employer recruiting an internal candidate for the post. A vacant post that is open only to internal candidates should not be treated as a job vacancy. An occupied post is a paid post within an organisation to which an employee has been assigned.

Job vacancy rates cover NACE Rev. 2 sections B to S. This aggregate is referred to as "**Whole economy**" for the sake of simplification, even if agriculture, activities of households as employers and activities of extraterritorial organisations are excluded. NACE Rev. 2 sections B to S include the industry (B to E), construction (F) and services (G to N) sectors together with (mainly) non-market services (O to S).

The job vacancy rates for the EU and euro area aggregates are based on Member States data, including estimates for recent periods when values are not yet available. If national data are only available for a sub-population, for example excluding smaller units or some activities, this sub-population is used in the computation of the job vacancy rate for the aggregates.

Depending on the recording date(s) of job vacancies, the impact of the COVID-19 crisis may not be recorded in full in all countries.

Country notes:

Denmark and France: data are not strictly comparable. In Denmark, only units within the business economy (NACE Rev 2 sections B to N) are surveyed. In France, only business units with 10 employees or more are surveyed. Moreover, in the case of public administration, education and human health (NACE Rev. 2 sections O, P and Q), public institutions are not covered.

Revisions and timetable

Compared with the rates published in News Release [95/2020](#) of 16 June 2020, the job vacancy rate for the first quarter of 2020 remains unchanged in the euro area and the EU.
