

66/2021 - 8 June 2021

GDP main aggregates and employment estimates for the first quarter of 2021

GDP down by 0.3% and employment down by 0.3% in the euro area

In the EU, GDP down by 0.1% and employment down by 0.2%

GDP growth in the euro area and the EU

In the first quarter of 2021, seasonally adjusted GDP decreased by 0.3% in the **euro area** and by 0.1% in the **EU** compared with the previous quarter, according to an estimate published by **Eurostat, the statistical office of the European Union**. These declines follow falls in the fourth quarter of 2020 (-0.6% in the **euro area** and -0.4% in the **EU**) after a strong rebound in the third quarter of 2020 (+12.6% in the **euro area** and +11.7% in the **EU**). Before, the sharpest decreases since the time series started in 1995 were observed in the second quarter of 2020 (-11.5% in the **euro area** and -11.1% in the **EU**).

Compared with the same quarter of the previous year, seasonally adjusted GDP decreased by 1.3% in the **euro area** and by 1.2% in the **EU** in the first quarter of 2021, after -4.7% and -4.4% respectively in the previous quarter.

During the first quarter of 2021, GDP in the **United States** increased by 1.6% compared with the previous quarter (after +1.1% in the fourth quarter of 2020). Compared with the same quarter of the previous year, GDP increased by 0.4% (after -2.4% in the previous quarter).

GDP growth by Member State

Ireland (+7.8%) and **Croatia** (+5.8%) recorded the sharpest increases of GDP compared to the previous quarter, followed by **Estonia** (+4.8%) and **Greece** (+4.4%). The strongest declines were observed in **Portugal** (-3.3%) and **Slovakia** (-2.0%), followed by **Germany** (-1.8%) and **Latvia** (-1.7%).

GDP components and contributions to growth

During the first quarter of 2021, household final consumption expenditure decreased by 2.3% in the **euro area** and by 1.9% in the **EU** (after -2.9% in the euro area and -2.7% in the EU in the previous quarter). Gross fixed capital formation increased by 0.2% in the **euro area** and by 0.8% in the **EU** (after +2.5% and +2.0% respectively). Exports increased by 1.0% in the **euro area** and by 1.1% the **EU** (after +3.8% and +4.0%). Imports increased by 0.9% in the **euro area** and by 1.1% in the **EU** (after +4.5% and +4.4%).

Household final consumption expenditure had negative contribution to GDP growth in both the **euro area** and the **EU** (-1.2 and -1.0 percentage points – pp, respectively) while the contributions from gross fixed capital formation (+0.1 in the euro area and +0.2 in the EU) and changes in inventories (+0.7% in the euro area and +0.6 in the EU) were positive. The contribution from the external balance was slightly positive for the **euro area** and neutral for the **EU**, while the contributions from government final expenditure were neutral in both zones.

GDP levels in the euro area and EU

Based on seasonally adjusted figures, GDP volumes were 5.1% and 4.6% below their highest level of the fourth quarter 2019 for the **euro area** and **EU**, which corresponds to the level of the fourth quarter 2016 for the **euro area** and is slightly above the level of the first quarter 2017 for the **EU**. For the **United States**, GDP was 0.9% below the level of the fourth quarter 2019 but recovered to its previous level of the second quarter 2019.

Employment growth in the euro area and EU

The number of employed persons decreased by 0.3% in the **euro area** and by 0.2% in the **EU** in the first quarter of 2021, compared with the previous quarter. In the fourth quarter of 2020, employment had increased by 0.4% in both the **euro area** and the **EU**.

Compared with the same quarter of the previous year, employment decreased by 1.8% in the **euro area** and by 1.6% in the **EU** in the first quarter of 2021, after -1.8% and -1.5% respectively in the fourth quarter of 2020.

Hours worked decreased by 0.8% in the **euro area** and by 0.2% in the **EU** in the first quarter of 2021, compared with the previous quarter. Compared with the same quarter of the previous year the declines were 3.4% in the **euro area** and 2.6% in the **EU** respectively (see annex table on employment in hours worked).

These data provide a picture of labour input consistent with the output and income measure of national accounts.

Employment growth in Member States

In the first quarter of 2021, **Hungary** (+1.1%), **Spain** (+1.0%), **Cyprus** and **Lithuania** (both +0.8%) recorded the highest growth of employment in persons compared with the previous quarter. The largest decreases were observed in **Latvia** (-3.9%), **Greece** (-1.7%) and **Slovakia** (-1.1%). At this stage, data for Ireland and Romania are not included in the graph, due to a delayed publication in Ireland and series break observed in the first quarter 2021 in Romania.

Employment levels in the euro area and EU

Based on seasonally adjusted figures, Eurostat estimates that in the first quarter of 2021, 205.6 million people were employed in the **EU**, of which 157.6 million were in the **euro area**.

In relation to the COVID-19 pandemic, employment in persons was 3.4 million in the **euro area** and 3.8 million in the **EU** below the level of the fourth quarter of 2019.

Evolution of labour productivity in the euro area and EU

The combination of GDP and employment data allows an estimation of **labour productivity**. The analysis of growth compared to the same quarter of the previous year shows that productivity growth (based on employed persons) fluctuated around 1% for both zones between 2013 and 2018.

In relation to the COVID-19 pandemic, productivity based on persons increased compared to the same quarter of the previous year with 0.6% for the **euro area** and 0.4% for the **EU**.

Based on hours worked, productivity compared to the same quarter of the previous year increased by 2.0% for the **euro area** and to 1.1% for the **EU**.

Geographical information

The **euro area** (EA19) includes Belgium, Germany, Estonia, Ireland, Greece, Spain, France, Italy, Cyprus, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Austria, Portugal, Slovenia, Slovakia and Finland.

The **European Union** (EU27) includes Belgium, Bulgaria, Czechia, Denmark, Germany, Estonia, Ireland, Greece, Spain, France, Croatia, Italy, Cyprus, Latvia, Lithuania, Luxembourg, Hungary, Malta, the Netherlands, Austria, Poland, Portugal, Romania, Slovenia, Slovakia, Finland and Sweden.

Methods and definitions

European quarterly national accounts are compiled in accordance with the European System of Accounts 2010 (ESA 2010). They include key policy indicators on GDP and employment.

Gross domestic product (GDP) at market prices measures the production activity of resident producer units. Growth rates are based on chain-linked volumes.

Employment covers employees and self-employed working in resident production units (domestic concept). Employment flash estimates are limited to total employment in persons, but regular estimates also cover hours worked and industry breakdowns.

Labour productivity is compiled as the ratio of economic output (GDP, chain-linked volumes with reference year 2010) to labour input (total employment measured in persons or hours worked, for all industries, according to the domestic concept).

Release schedule of main aggregates

This news release presents estimates for euro area and EU GDP and employment aggregates based on national accounts transmission from almost all Member States due after t+2 months.

A further estimation is done at around t+110 days after some countries transmit updated estimates. To increase the timeliness of key indicators, Eurostat also publishes flash estimates for GDP (after around 30 and 45 days) and employment (after around 45 days). Their compilation is based on estimates provided by most EU Member States on a voluntary basis.

Revisions and timetable

The reliability of GDP and employment flash estimates was tested by dedicated working groups and revisions are continuously monitored. Further information can be found on Eurostat website. The method used for compilation of European GDP and employment estimates is the same as for previous releases.

With these estimates, euro area and EU employment and GDP figures for earlier quarters are revised.

Flash estimates of employment and GDP growth were published in News Release 58/2021 issued on 18 May 2021. They were based on a more limited data set than the one used for the present News Release and additionally, on preliminary estimates which have now been revised by some Member States. Revisions for the last quarter are highlighted in bold in the table below:

Growth rates	to the previous quarter (Q/Q-1)				to the previous year (Q/Q-4)			
	Previous		Current		Previous		Current	
Zone	Euro area	EU	Euro area	EU	Euro area	EU	Euro area	EU
GDP	-0.6	-0.4	-0.3	-0.1	-1.8	-1.7	-1.3	-1.2
Employment	-0.3	-0.3	-0.3	-0.2	-2.1	-1.8	-1.8	-1.6

All estimates presented in this release may be revised with the t+110 database update scheduled for 19 July 2021.

* Growth rates to the previous quarter and to the same quarter of the previous year presented in this table are generally both based on seasonally and calendar adjusted figures since unadjusted data are usually not transmitted for the compilation of GDP flash estimates.

** Percentage change compared with the same quarter of the previous year calculated from calendar adjusted data.

*** The seasonal adjustment does not include a calendar adjustment for Iceland.
