

74/2021 – 1 July 2021

May 2021

Euro area unemployment at 7.9%

EU at 7.3%

In May 2021, the **euro area** seasonally-adjusted unemployment rate was 7.9%, down from 8.1% in April 2021 and up from 7.5% in May 2020. The **EU** unemployment rate was 7.3% in May 2021, down from 7.4% in April 2021 and up from 6.9% in May 2020. These figures are published by **Eurostat, the statistical office of the European Union**.

Eurostat estimates that 15.278 million men and women in the **EU**, of whom 12.792 million in the **euro area**, were unemployed in May 2021. Compared with April 2021, the number of persons unemployed decreased by 382 000 in the **EU** and by 306 000 in the **euro area**. Compared with May 2020, unemployment rose by 949 000 in the **EU** and by 803 000 million in the **euro area**.

Youth unemployment

In May 2021, 2.979 million young persons (under 25) were unemployed in the **EU**, of whom 2.403 million were in the **euro area**. In May 2021, the youth unemployment rate was 17.3% in the **EU** and 17.5% in the **euro area**, down from 18.2% and 18.4% respectively in the previous month. Compared with April 2021, youth unemployment decreased by 174 000 in the **EU** and by 138 000 in the **euro area**. Compared with May 2020, youth unemployment increased by 119 000 in the **EU** and by 70 000 in the **euro area**.

Unemployment by gender

In May 2021, the unemployment rate for women was 7.6% in the **EU**, down from 7.8% in April 2021. The unemployment rate for men was 7.0% in May 2021, down from 7.1% in April 2021. In the **euro area**, the unemployment rate for women decreased from 8.5% in April 2021 to 8.3% in May 2021 while the unemployment rate for men decreased from 7.8% in April 2021 to 7.6% in May 2021.

Additional labour market indicators

These estimates are based on the globally used International Labour Organisation (ILO) standard definition of unemployment, which counts as unemployed people without a job who have been actively seeking work in the last four weeks and are available to start work within the next two weeks. The COVID-19 outbreak and the measures applied to combat it have triggered a sharp increase in the number of claims for unemployment benefits across the EU. At the same time, a significant part of those who had registered in unemployment agencies were no longer actively looking for a job or no longer available for work, for instance, if they had to take care of their children. This leads to discrepancies in the number of registered unemployed and those measured as unemployed according to the ILO definition.

To capture in full the unprecedented labour market situation triggered by the COVID-19 outbreak, the data on unemployment have been complemented by additional indicators, e.g. underemployed part-time workers, persons seeking work but not immediately available and persons available to work but not seeking, released together with LFS data for the fourth quarter of 2020.

LFS data for the first quarter of 2021 will be released on 15 July 2021.

Geographical information

Euro area (EA19): Belgium, Germany, Estonia, Ireland, Greece, Spain, France, Italy, Cyprus, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Austria, Portugal, Slovenia, Slovakia and Finland.

European Union (EU27): Belgium, Bulgaria, Czechia, Denmark, Germany, Estonia, Ireland, Greece, Spain, France, Croatia, Italy, Cyprus, Latvia, Lithuania, Luxembourg, Hungary, Malta, the Netherlands, Austria, Poland, Portugal, Romania, Slovenia, Slovakia, Finland and Sweden.

Methods and definitions

Eurostat publishes harmonised unemployment rates for individual EU Member States, the euro area and the EU. These unemployment rates are based on the definition recommended by the International Labour Organisation (ILO). The measurement is based on a harmonised data source, the European Union Labour Force Survey (LFS).

Based on the ILO definition, Eurostat defines **unemployed persons** as persons aged 15 to 74 who:

- are without work;
- are available to start work within the next two weeks;
- and have actively sought employment at some time during the previous four weeks.

The **unemployment rate** is the number of people unemployed as a percentage of the labour force.

Series have been **seasonally adjusted** using the seasonal factors estimated in the period up to December 2019 included. Those seasonal factors will be kept unchanged ('controlled concurrent adjustment method') until the impact of the COVID-19 outbreak can be integrated in seasonal adjustment models.

The **labour force** is the total number of people employed plus unemployed. In this news release unemployment rates are based on employment and unemployment data covering persons aged 15 to 74.

The **youth unemployment rate** is the number of people aged 15 to 24 unemployed as a percentage of the labour force of the same age. Therefore, the youth unemployment rate should not be interpreted as the share of jobless people in the overall youth population.

When data for the most recent month are not available for a Member State, EU and EA aggregates are calculated using the latest data available for that Member State.

Country notes

Germany, the Netherlands, Finland, Sweden and Iceland: the trend component is used instead of the more volatile seasonally adjusted data.

Denmark, Estonia and Portugal: 3-month moving averages of LFS data are used instead of pure monthly indicators. Austria, Italy and Portugal: the data are provisional up to May 2021 included.

Germany: Starting from May 2021 the monthly unemployment rate is calculated on the basis of the labour force survey. The estimated results from January 2020 to April 2021 are revised on this basis.

Revisions and timetable

The data in this News Release can be subject to revisions, caused by updates to the seasonally adjusted series whenever new monthly data are added; the inclusion of the most recent LFS data in the calculation process; update of seasonal adjustment models with complete annual data.

Compared with the rates published in News Release [63/2021](#) of 1 June 2021, the unemployment rate for April 2021 has been revised from 8.0% to 8.1% for the euro area and from 7.3% to 7.4% for the EU. Among EU Member States, the rate has been revised by more than 0.1 percentage points (pp) downwards for Germany (by 0.6 pp), Estonia and Slovakia (both by 0.3 pp) as well as Cyprus and Luxembourg (both by 0.2 pp). The rate has been revised by more than 0.1 percentage points upwards for Ireland (by 2.1 pp), Austria (by 1.7 pp), Bulgaria (by 1.5 pp), Belgium (by 1.4 pp), Poland (by 0.8 pp), France (by 0.5 pp) as well as Croatia and Hungary (both by 0.2 pp).
