

140/2021 - 16 December 2021

October 2021

Euro area international trade in goods surplus €3.6 bn

€4.2 bn deficit for EU

Euro area

The first estimate for **euro area** exports of goods to the rest of the world in October 2021 was €214.0 billion, an increase of 7.3% compared with October 2020 (€199.4 bn). Imports from the rest of the world stood at €210.4 bn, a rise of 24.1% compared with October 2020 (€169.6 bn). As a result, the **euro area** recorded a €3.6 bn surplus in trade in goods with the rest of the world in October 2021, compared with +€29.8 bn in October 2020. **Intra-euro area** trade rose to €196.7 bn in October 2021, up by 17.3% compared with October 2020.

In January to October 2021, **euro area** exports of goods to the rest of the world rose to €1 989.6 bn (an increase of 13.9% compared with January-October 2020), and imports rose to €1 854.2 bn (an increase of 18.4% compared with January-October 2020). As a result the **euro area** recorded a surplus of €135.3 bn, compared with +€180.9 bn in January-October 2020. **Intra-euro area** trade rose to €1 780.3 bn in January-October 2021, up by 19.6% compared with January-October 2020.

European Union

The first estimate for **extra-EU** exports of goods in October 2021 was €190.7 billion, up by 6.4% compared with October 2020 (€179.2 bn). Imports from the rest of the world stood at €194.9 bn, up by 29.1% compared with October 2020 (€151.0 bn). As a result, the **EU** recorded a €4.2 bn deficit in trade in goods with the rest of the world in October 2021, compared with a surplus of €28.2 bn in October 2020. **Intra-EU** trade rose to €306.3 bn in October 2021, +13.8% compared with October 2020.

In January to October 2021, **extra-EU** exports of goods rose to €1 780.4 bn (an increase of 12.7% compared with January-October 2020), and imports rose to €1 692.9 bn (an increase of 19.4% compared with January-October 2020). As a result, the **EU** recorded a surplus of €87.5 bn, compared with +€162.2 bn in January-October 2020. **Intra-EU** trade rose to €2 798.5 bn in January-October 2021, +19.1% compared with January-October 2020.

Annual comparison by Member State

In October 2021, compared with October 2020, all the Member States registered an increase in **extra-EU** exports except **Slovakia** (-22%), **Czechia** (-8%) and **Netherlands** (-7%). The highest increases were registered in **Cyprus** (+228%), **Greece** (48%), **Malta** (+37%) and **Ireland** (34%).

Extra-EU exports by Member State - October 2021
% change compared to October 2020

ec.europa.eu/eurostat

With regard to the extra-EU imports, all Member States registered an increase in **extra-EU** imports in October 2021 compared to October 2020, except **Cyprus** (-53%). The highest increases were observed in **Greece** (+91%), **Latvia** (+76%) and **Lithuania** (+62%).

Geographical information

The **euro area** (EA19) includes Belgium, Germany, Estonia, Ireland, Greece, Spain, France, Italy, Cyprus, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Austria, Portugal, Slovenia, Slovakia and Finland.

The **European Union** includes Belgium, Bulgaria, Czechia, Denmark, Germany, Estonia, Ireland, Greece, Spain, France, Croatia, Italy, Cyprus, Latvia, Lithuania, Luxembourg, Hungary, Malta, the Netherlands, Austria, Poland, Portugal, Romania, Slovenia, Slovakia, Finland and Sweden.

Methods and definitions

Since the introduction of Intrastat for intra-EU trade on 1 January 1993, the value of intra-EU exports has been consistently higher than that of intra-EU imports. In theory, as exports are declared FOB and imports CIF, the value of corresponding imports should be slightly higher than that of exports. Eurostat uses intra-EU exports as the more reliable measure of total intra-EU trade as, at aggregated levels, total intra-EU exports has better coverage than total intra-EU imports. Due to this divergence in intra-EU trade, and to the difficulties of interpreting figures in absolute terms at the level of individual Member States, trade balances for individual Member States must be interpreted with caution. The same caution applies to the trade balance of the euro area, which includes some intra-EU trade.

Dutch trade flows are over-estimated because of the so-called 'Rotterdam effect' (or quasi-transit trade): that is goods bound for other EU countries arrive in Dutch ports and, according to EU rules, are recorded as extra-EU imports by the Netherlands (the country where goods are released for free circulation). This in turn increases the intra-EU flows from the Netherlands to those Member States to which the goods are re-exported. Although to a lesser extent, trade figures of other Member States like Belgium or Luxembourg may also be overestimated due to quasi-transit.

The United Kingdom is considered as an extra-EU partner country for the EU for the reference time period covered by this news release. However, the United Kingdom was still part of the internal market until the end of the transition period (31 December 2020), meaning that data on trade with the United Kingdom for reference periods up to December 2020 were still based on statistical concepts applicable to trade between the EU Member States. The end of the transitory period thus had an impact on the trade flows between the United Kingdom and the EU Member States.

As of January 2021 onwards, data on trade with the United Kingdom is based on a mixed concept. In application of the Withdrawal Agreement Protocol on Ireland / Northern Ireland, for trade with Northern Ireland the statistical concepts applicable are the same as those for trade between Member States while for trade with the United Kingdom (excluding Northern Ireland) the same statistical concepts are applicable as for trade with any other extra-EU partner country.

For these reasons data on trade with the United Kingdom are not fully comparable with data on trade with other extra-EU trade partners, and for reference periods before and after the end of 2020.

National concepts may differ from the harmonised methodology used by Eurostat, leading to differences between figures in this release and those published nationally, both for raw data and for seasonally adjusted series.

Products are classified according to the [Standard international trade classification \(SITC\)](#), Revision 4.

Data collection for international trade in goods has in many countries been affected by the COVID-19 crisis. The data in this release are, for several Member States, based on fewer statistical observations than usual. For missing data, imputation and estimation methods were applied. Information on the compilation of international trade in goods statistics during the COVID-19 crisis can be found [here](#).

Revisions and timetable

This News Release is based on data available on 13 December 2021. These are provisional figures based on information provided by Member States. They are subject to frequent revision for up to two years after the month in question.
