

36/2022 – 31 March 2022

February 2022

Euro area unemployment at 6.8%

EU at 6.2%

In February 2022, the **euro area** seasonally-adjusted unemployment rate was 6.8%, down from 6.9% in January 2022 and from 8.2% in February 2021. The **EU** unemployment rate was 6.2% in February 2022, down from 6.3% in January 2022 and from 7.5% in February 2021. These figures are published by **Eurostat, the statistical office of the European Union**.

Eurostat estimates that 13.267 million men and women in the **EU**, of whom 11.155 million in the **euro area**, were unemployed in February 2022. Compared with January 2022, the number of persons unemployed decreased by 221 000 in the **EU** and by 181 000 in the **euro area**. Compared with February 2021, unemployment decreased by 2.568 million in the **EU** and by 2.150 million in the **euro area**.

Youth unemployment

In February 2022, 2.581 million young persons (under 25) were unemployed in the **EU**, of whom 2.101 million were in the **euro area**. In February 2022, the youth unemployment rate was 14.0% in both the **EU** and in the **euro area**, down from 14.3% in both areas in the previous month. Compared with January 2022, youth unemployment decreased by 38 000 in the **EU** and by 26 000 in the **euro area**. Compared with February 2021, youth unemployment decreased by 602 000 in the **EU** and by 512 000 in the **euro area**.

Unemployment by sex

In February 2022, the unemployment rate for women was 6.5% in the **EU**, down from 6.6% in January 2022. The unemployment rate for men was 5.9% in February 2022, down from 6.0% in January 2022. In the **euro area**, the unemployment rate for women remained stable at 7.2% in February 2022, while the unemployment rate for men decreased from 6.6% in January 2022 to 6.4% February 2022.

Additional labour market indicators

These estimates are based on the globally used International Labour Organisation (ILO) standard definition of unemployment, which counts as unemployed people without a job who have been actively seeking work in the last four weeks and are available to start work within the next two weeks. The COVID-19 crisis and the measures applied to combat it have triggered a sharp increase in the number of claims for unemployment benefits across the EU. At the same time, a significant part of those who had registered in unemployment agencies might be no longer actively looking for a job or no longer available for work. This may still lead to discrepancies in the number of registered unemployed and those measured as unemployed according to the ILO definition.

To capture in full the unprecedented labour market situation triggered by the COVID-19 outbreak, the data on unemployment have been complemented by additional indicators, e.g. underemployed part-time workers, persons seeking work but not immediately available and persons available to work but not seeking, released together with LFS data for the third quarter of 2021. LFS data for the fourth quarter of 2021 will be released on 13 April 2022.

Geographical information

Euro area (EA19): Belgium, Germany, Estonia, Ireland, Greece, Spain, France, Italy, Cyprus, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Austria, Portugal, Slovenia, Slovakia and Finland.

European Union (EU27): Belgium, Bulgaria, Czechia, Denmark, Germany, Estonia, Ireland, Greece, Spain, France, Croatia, Italy, Cyprus, Latvia, Lithuania, Luxembourg, Hungary, Malta, the Netherlands, Austria, Poland, Portugal, Romania, Slovenia, Slovakia, Finland and Sweden.

Methods and definitions

Eurostat publishes harmonised unemployment rates for individual EU Member States, the euro area and the EU. These unemployment rates are based on the definition recommended by the International Labour Organisation (ILO). The measurement is based on a harmonised data source, the European Union Labour Force Survey (LFS).

Based on the ILO definition, Eurostat defines **unemployed persons** as persons aged 15 to 74 who:

- are without work;
- are available to start work within the next two weeks;
- and have actively sought employment at some time during the previous four weeks.

The **unemployment rate** is the number of people unemployed as a percentage of the labour force.

Series published before 31 March 2022 have been **seasonally adjusted** using the seasonal factors estimated in the period up to December 2019 included. Series published as of 31 March 2022 are seasonally adjusted using seasonal models estimated in the period up to December 2021 included.

The **labour force** is the total number of people employed plus unemployed. In this news release unemployment rates are based on employment and unemployment data covering persons aged 15 to 74.

The **youth unemployment rate** is the number of people aged 15 to 24 unemployed as a percentage of the labour force of the same age. Therefore, the youth unemployment rate should not be interpreted as the share of jobless people in the overall youth population.

When data for the most recent month are not available for a Member State, EU and EA aggregates are calculated using the latest data available for that Member State.

Country notes

Germany, the Netherlands, Finland, Sweden and Iceland: the trend component is used instead of the more volatile seasonally adjusted data.

Denmark, Estonia and Portugal: 3-month moving averages of LFS data are used instead of pure monthly indicators.

Revisions and timetable

The data in this News Release can be subject to revisions, caused by updates to the seasonally adjusted series whenever new monthly data are added; the inclusion of the most recent LFS data in the calculation process; update of seasonal adjustment models with complete annual data.

Compared with the rates published in News Release [27/2022](#) of 3 March 2022, the unemployment rate for January 2022 has been revised for the euro area from 6.8% to 6.9% and for the EU from 6.2% to 6.3%. Among EU Member States, the rate has been revised by more than 0.1 percentage points (pp) downwards for Greece (by 0.5 pp) as well as for Bulgaria, Italy and Portugal (all by 0.2 pp). The rate has been revised by more than 0.1 percentage points upwards for France and Cyprus (both by 0.5 pp), Estonia (by 0.4 pp), as well as for Croatia, Poland and Slovakia (all by 0.2 pp).
