

47/2023 - 21 April 2023

Provision of deficit and debt data for 2022 - first notification

Euro area government deficit at 3.6% and EU at 3.4% of GDP

Government debt at 91.6% and 84.0% respectively

In 2022, the government deficit of both the **euro area (EA19)** and the **EU** decreased compared with 2021, as did the government debt. In the **euro area** the government deficit to GDP ratio shrunk from 5.3% in 2021 to 3.6% in 2022, and in the **EU** from 4.8% to 3.4%. In the **euro area** the government debt to GDP ratio decreased from 95.5% at the end of 2021 to 91.6% at the end of 2022, and in the **EU** from 88.0% to 84.0%.

In this release, **Eurostat, the statistical office of the European Union**, is providing government deficit and debt data for the years 2019-2022, based on figures reported by EU Member States in the first notification in 2023, for the application of the excessive deficit procedure (EDP). This notification is based on the ESA 2010 system of national accounts. This release also includes data on government expenditure and revenue.

In 2022, twenty Member States reported a deficit. The highest deficits were recorded in **Italy** (-8.0%), **Hungary** and **Romania** (both -6.2%) and **Malta** (-5.8%). Eleven Member States had deficits higher than 3% of GDP. Six Member States reported a surplus, the largest ones being recorded in **Denmark** (+3.3%), **Cyprus** (+2.1%) and **Ireland** (+1.6%). The **Netherlands** reported its general government sector being in balance.

At the end of 2022, the lowest ratios of government debt to GDP were recorded in Estonia (18.4%), Bulgaria (22.9%), Luxembourg (24.6%), Denmark (30.1%), Sweden (33.0%) and Lithuania (38.4%). Thirteen Member States had government debt ratios higher than 60% of GDP, with the highest registered in Greece (171.3%), Italy (144.4%), Portugal (113.9%), Spain (113.2%), France (111.6%) and Belgium (105.1%).

In 2022, government expenditure in the euro area was equivalent to 50.8% of GDP and government revenue to 47.1%. The figures for the EU were 49.8% and 46.5%, respectively. The government expenditure and revenue ratios decreased in both zones.

Reservations on reported data

Eurostat is expressing a reservation on the quality of data reported by France for the year 2022. Eurostat, in close cooperation with the French statistical authorities, is clarifying the recording of the capital increase by the State into the public energy company EDF (Électricité de France), as well as the application of the super-dividend test for the dividends paid by some public corporations to the French State. The deficit for 2022 might be underestimated by up to 0.2 pp of GDP.

Amendment by Eurostat to reported data

Eurostat has made no amendments to the data reported by Member States.

Issued by: Eurostat Press Office

Martina SKOCKOVA Tel: +352-4301-33 408 eurostat-pressoffice@ec.europa.eu

(?) Media requests: eurostat-mediasupport@ec.europa.eu / Tel: +352-4301-33 408

Geographical information

Up to 31 December 2022, the **euro area** (EA19) included Belgium, Germany, Estonia, Ireland, Greece, Spain, France, Italy, Cyprus, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Austria, Portugal, Slovenia, Slovakia and Finland. From 1 January 2023 the **euro area** (EA20) also includes Croatia.

The aggregate data series commented on in this News Release refer to the official composition of the euro area in the most recent period for which data is available. Thus, News Releases with data for 2022 comment on EA19 series, while Releases with data for 2023 onwards will comment on EA20 series.

European Union (EU27): Belgium, Bulgaria, Czechia, Denmark, Germany, Estonia, Ireland, Greece, Spain, France, Croatia, Italy, Cyprus, Latvia, Lithuania, Luxembourg, Hungary, Malta, the Netherlands, Austria, Poland, Portugal, Romania, Slovenia, Slovakia, Finland and Sweden.

Methods and definitions

According to Article 14 (1) of Council Regulation (EC) 479/2009, Eurostat publishes the actual government deficit and debt data for the application of the Protocol on the excessive deficit procedure, within three weeks after the reporting deadlines.

The Protocol on the excessive deficit procedure annexed to the EC Treaty, defines **government deficit (surplus)** as the net borrowing (net lending) of the whole general government sector (central government, state government, local government and social security funds). It is calculated according to national accounts concepts (European System of Accounts, ESA 2010).

Government debt (commonly known as Maastricht or EDP debt) is the consolidated gross debt of the whole general government sector outstanding at the end of the year (at nominal value).

- Table of euro area and EU aggregates: the data are in euro. For those countries not belonging to the euro area, the rate of conversion into euro is as follows:
 - for deficit / surplus and GDP data, the annual average exchange rate;
 - for the stock of government debt, the end of year exchange rate.
- Table of national data: the data are in national currencies.

Government expenditure and **revenue** are reported to Eurostat under the ESA 2010 transmission programme. They cover non-financial transactions of general government, and include both current and capital transactions. For definitions, see Regulation (EU) No 549/2013 of the European Parliament and of the Council of 21 May 2013 on the European system of national and regional accounts in the European Union.

Intergovernmental lending

For the purpose of proper consolidation of general government debt in European aggregates and to provide users with information, Eurostat is collecting and publishing data on government loans to other EU governments, including those made through the European Financial Stability Facility (EFSF). For the years 2019 to 2022 the intergovernmental lending figures relate mainly to lending to Greece, Ireland and Portugal.

Reservations and amendments

The term "**reservations**" is defined in article 15 (1) of Council Regulation (EC) 479/2009. The Commission (Eurostat) expresses reservations when it has doubts on the quality of the reported data.

According to Article 15 (2) of Council Regulation (EC) 479/2009, the Commission (Eurostat) may **amend** actual data reported by Member States and provide the amended data and a justification of the amendment where there is evidence that actual data reported by Member States do not comply with the quality requirements (compliance with accounting rules, completeness, reliability, timeliness and consistency of statistical data).

Revisions and timetable

In the previous provision of data for the excessive deficit procedure, the 2021 government deficit for the euro area (EA19) was 5.1% of GDP, for the EU it was 4.6%, and the government debt was 95.4% of GDP for the euro area and 87.9% for the EU. See News release 118/2022 of 21 October 2022.

For more information

For further information on the methodology of statistics reported under the excessive deficit procedure, please see the Eurostat publication "Manual on government deficit and debt – Implementation of ESA 2010 — 2022 edition", published in February 2023.

Note on main revisions: Eurostat publishes on its website a note containing specific explanations of the <u>largest revisions</u> in deficit and debt for 2019-2021 between the October 2022 and the April 2023 notifications, as well as in GDP.

Background note and supplementary tables on government interventions to support financial institutions: Eurostat publishes supplementary tables by Member State on the impact of the government support to financial institutions on its website. Eurostat also publishes a background note providing further information on the supplementary tables, including summary tables for the EU and the euro area. Table 2 of the background note shows government deficit/surplus data for 2021 and 2022 excluding the impacts of government interventions to support financial institutions. It should be noted that this adjusted measure of government deficit/surplus is only intended to be an improvement in the presentation of data for users.

Stock of liabilities of trade credits and advances: Eurostat publishes on its website, as complementary information on government liabilities, <u>data on trade credits and advances</u>, as reported by Member States for the years 2019 to 2022. According to Council Regulation (EC) 479/2009, the liabilities in trade credits and advances of government units are not part of EDP debt.

Stock-flow adjustment: Eurostat also publishes a note on the <u>stock-flow adjustment</u> which presents the contribution of deficit/surplus as well as other relevant factors to the variation in the debt level.

Eurostat will also be releasing information on the underlying government sector accounts on the government finance and EDP statistics section on its website.
