

57/2023 - 16 May 2023

GDP and employment flash estimates for the first quarter of 2023

GDP up by 0.1% and employment up by 0.6% in the euro area

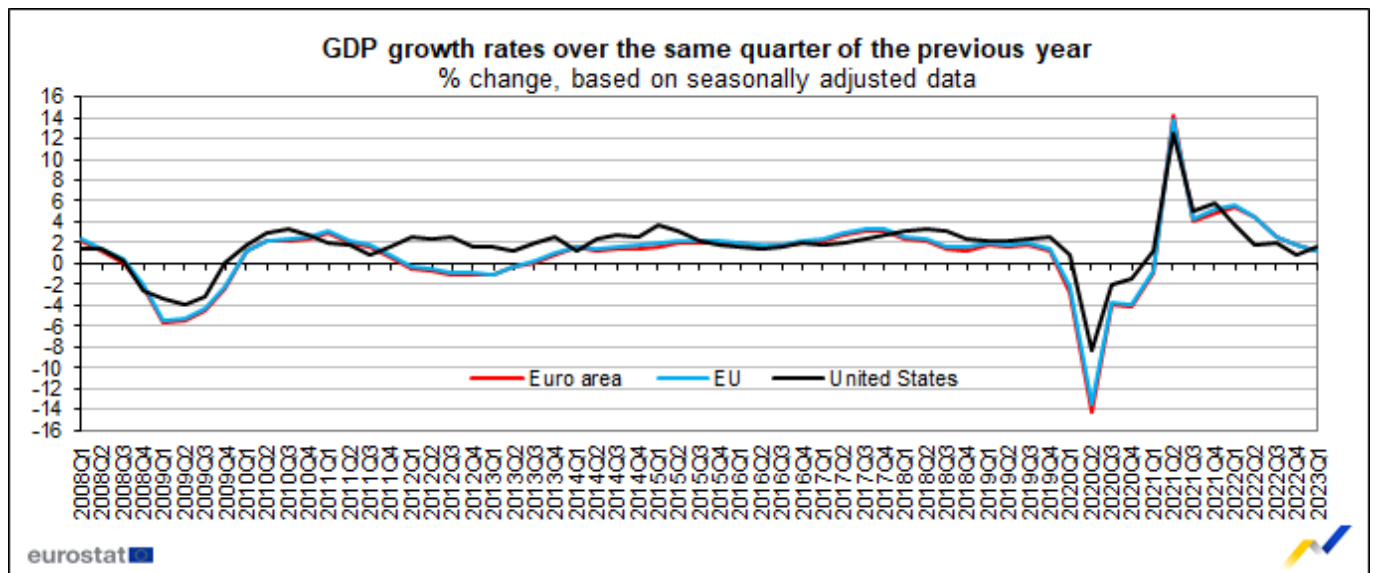

In the EU, GDP up by 0.2% and employment up by 0.6%

GDP growth in the euro area and EU

In the first quarter of 2023, seasonally adjusted GDP increased by 0.1% in the **euro area** and by 0.2% in the **EU**, compared with the previous quarter, according to a flash estimate published by **Eurostat, the statistical office of the European Union**. In the fourth quarter of 2022, GDP had remained stable in the **euro area** and had decreased by 0.1% in the **EU**.

Compared with the same quarter of the previous year, seasonally adjusted GDP increased by 1.3% in the **euro area** and by 1.2% in the **EU** in the first quarter of 2023, after +1.8% in the **euro area** and +1.7% in the **EU** in the previous quarter.

During the first quarter of 2023, GDP in the **United States** increased by 0.3% compared to the previous quarter (after +0.6% in the fourth quarter of 2022). Compared with the same quarter of the previous year, GDP increased by 1.6% (after +0.9% in the previous quarter).

Employment growth in the euro area and EU

The number of employed persons increased by 0.6% in both the **euro area** and the **EU** in the first quarter of 2023, compared with the previous quarter. In the fourth quarter of 2022, employment had increased by 0.3% in both the **euro area** and the **EU**.

Compared with the same quarter of the previous year, employment increased by 1.7% in the **euro area** and by 1.6% in the **EU** in the first quarter of 2023, after +1.5% in the **euro area** and +1.3% in the **EU** in the fourth quarter of 2022.

These data provide a picture of labour input consistent with the output and income measures of national accounts.

Growth rates of employment in persons

: Data not available

* Growth rates to the previous quarter and to the same quarter of the previous year presented in this table are generally both based on seasonally and calendar adjusted figures since unadjusted data are usually not transmitted for the compilation of GDP flash estimates.

** Percentage change compared with the same quarter of the previous year calculated from calendar adjusted data.

*** The seasonal adjustment does not include a calendar adjustment for Iceland.

Geographical information

Up to 31 December 2022, the **euro area** (EA19) included Belgium, Germany, Estonia, Ireland, Greece, Spain, France, Italy, Cyprus, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Austria, Portugal, Slovenia, Slovakia and Finland. From 1 January 2023 the **euro area** (EA20) also includes Croatia. The aggregate data series commented on in this €-indicators Release refer to the official composition of the euro area in the most recent month for which data is available. Thus, €-indicators releases with data for months up to December 2022 comment on EA19 series, while Releases with data for January 2023 onwards will comment on EA20 series.

European Union (EU27): Belgium, Bulgaria, Czechia, Denmark, Germany, Estonia, Ireland, Greece, Spain, France, Croatia, Italy, Cyprus, Latvia, Lithuania, Luxembourg, Hungary, Malta, the Netherlands, Austria, Poland, Portugal, Romania, Slovenia, Slovakia, Finland and Sweden.

Methods and definitions

European quarterly national accounts are compiled in accordance with the European System of Accounts 2010 (ESA 2010). They include key policy indicators of GDP and employment.

Gross domestic product (GDP) at market prices measures the production activity of resident production units. Growth rates are based on chain-linked volumes.

Employment covers employees and self-employed working in resident production units (domestic concept). While employment flash estimates are limited to total employment in persons, regular estimates also cover hours worked and industry breakdowns.

Release schedule of main aggregates

Comprehensive estimates of European main aggregates (including GDP and employment) are based on countries regular transmissions and published around 65 and 110 days after the end of each quarter. To improve the timeliness of key indicators, Eurostat also publishes flash estimates for GDP (after around 30 and 45 days) and employment (after around 45 days). Their compilation is based on estimates provided by EU Member States on a voluntary basis.

This news release presents flash estimates for euro area and EU GDP and employment growth after around 45 days.

The GDP estimates of the first quarter 2023 are based on Member States' data covering 99% of the EA and the EU GDP, while employment estimates are based on Member States' data covering 96% of the EA and 93% of the EU total employment.

Revisions and timetable

The reliability of GDP and employment flash estimates was tested by dedicated working groups and revisions of subsequent estimates are continuously monitored. Further information can be found on Eurostat website. The method used for compilation of European GDP and employment estimates is the same as for previous releases.

With these flash estimates, euro area and EU employment and GDP figures for earlier quarters are not revised.

A preliminary flash estimate of GDP growth was published in News Release [51/2023](#) issued on 28 April 2023. This included published GDP estimates for twelve Member States.

The EA and EU estimates for the last quarter were revised as presented in the following table:

Growth rates Estimates	To the previous quarter (Q/Q-1)		To the previous year (Q/Q-4)	
	Previous	Current	Previous	Current
GDP EA	0.1	0.1	1.3	1.3
GDP EU	0.3	0.2	1.3	1.2

All figures presented in this release may be revised with Eurostat's regular estimates of GDP and main aggregates (including employment) scheduled for 8 June 2023 and 20 July 2023.
